000-114

IBM

Storage Implementation Entry/Mid Range DS Series

<http://www.ipass4sure.com/exams.asp?examcode=000-114>

The 000-114 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-114 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-114 exam is very challenging, but with our 000-114 questions and answers practice exam, you can feel confident in obtaining your success on the 000-114 exam on your FIRST TRY!

IBM 000-114 Exam Features

- Detailed questions and answers for 000-114 exam
- Try a demo before buying any IBM exam
- 000-114 questions and answers, updated regularly
- Verified 000-114 answers by Experts and bear almost 100% accuracy
- 000-114 tested and verified before publishing
- 000-114 examcollection vce questions with exhibits
- 000-114 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-114 exam are now continuously updating and accepting this challenge is itself a task. This 000-114 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-114 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-114 Test and save time and money while developing your skills to pass your IBM 000-114 Exam? Let us help you climb that ladder of success and pass your 000-114 now!

Question: 1

You see an amber light flashing on an EXP810 ESM. Where should you start to find information on how to handle the flashing amber light?

- A. Recovery Guru
- B. Major Event Log (MEL)
- C. Storage Manager online help
- D. Read Link Status counters related to the specific ESM

Answer: A

Question: 2

How often will a Windows operating system without multi-pathing software detect a target LUN?

- A. Once per controller
- B. Once per bus
- C. Once per path
- D. Once per port

Answer: C

Question: 3

Before opening a call with support on your DS5300, other than the serial number and description of the failure, what additional information should be expected? Outputs of:

- A. Supportshow
- B. Collect all support data
- C. Health check
- D. Config Show

Answer: B

Question: 4

A customer has attempted to migrate an existing 4 drive, RAID 1+0 array group to a RAID 6 Array group and been unsuccessful. Why is this?

- A. You can't mix RAID levels on the same controller
- B. RAID 6 is not supported on the DS5000 storage array
- C. DS5000 storage arrays require 5 drives in an RAID 6 array group.
- D. RAID 6 is a premium feature on the DS5000 and needs to be activated

Answer: C

Question: 5

Which different drive expansion modules can be attached to a DS5000 subsystem?

- A. EXP810, EXP710
- B. EXP5000 and EXP810
- C. EXP5000, EXP100, EXP810
- D. EXP5000, EXP810, EXP710

Answer: B

Question: 6

The global background media scan setting can be enabled to scan for media errors on the disk drives. Which increment is used when configuring media scans?

- A. Minutes
- B. Hours
- C. Days
- D. Weeks

Answer: C

Question: 7

A customer finds that their storage administration coverage is too thin. They want to have their system call IBM when there is a critical alert. Which configuration enables this capability?

- A. RSM on any Linux Intel server
- B. RsM on an IBM power system server
- C. IBM Director running on an IBM server
- D. Agent installed on a management server

Answer: A

Question: 8

A customer has ordered a DS4800 with four EXP810s. They will use 48 FC drives and 16 SATA drives. Which configuration allows the DS4800 the highest bandwidth?

- A. All SATA drive should be placed in one EXP810 as they will run slower.
- B. Pairing EXP810 on redundant drive port pairs.
- C. Each EXP810 should be on separate loops and contain 12 FC drives and 4 SATA drives.
- D. All FC drives should be connected to the first channel on each controller to obtain the lowest drive channel IDs

Answer: C

Question: 9

The DS4000 series uses the Automatic Drive Transfer (ADT) feature to allow implicit logical drive transfers between controllers. The DS4000 series uses the Automatic Drive Transfer (ADT) feature to allow implicit logical drive transfers between controllers. What determines if ADT should be enabled?

- A. HBA type
- B. ESM firmware
- C. Controller firmware version
- D. Host multi-pathing software

Answer: D

Question: 10

The customer is considering expanding an existing Logical drive using the Dynamic Volume Expansion function in Storage Manager. Which operating system, below does not support a volume expansion?

- A. AIX
- B. Windows Dynamic Disk
- C. Netware
- D. Solaris

Answer: D

Question: 11

A customer is asking for a quick way to get the latest information about fixes, new firmwares, and new features about DS5000. What is the best way to get this information?

- A. The IBM contact will send you the information anyway
- B. Ask IBM BP organization to add the customer on the mailing list
- C. It is provided during IBM CE visits
- D. Subscribe to "support notifications" on ibm.com

Answer: D

Question: 12

How would you cable 2 EXP5000 to a DS5300 on one drive channel? Cable from each controller to the _____.

- A. 1A port of the first ESM and then cable from 1B port to the 1A port of the second ESM
- B. 1B port of the first ESM and then cable from 1A port to the 1B port of the second ESM
- C. 2A port of the first ESM and then cable from 2B port to the 2A port of the second ESM
- D. 2B port of the first ESM and then cable from 2A port to the 2B port of the second ESM

Answer: B

Question: 13

Which statement is true about storage partitioning?

- A. Host clustering is only supported with storage partitioning enabled.
- B. Attachment of a single host is only supported with storage partitioning enabled.
- C. Mixed drive types are only supported with storage partitioning enabled.
- D. None of the above

Answer: D

Question: 14

A customer is running a DS4700 at firmware level 6.16 and it is in optimal condition. The customer wishes to upgrade to firmware level 07.10.23.00. Which is the recommended way doing the upgrade?

- A. Upgrade is done by Storage Manager 10 Firmware Upgrade Utility
- B. All applications must be stopped and upgrade is done by SMclient
- C. All applications must be stopped and upgrade is done by Storage Manager 10 Firmware Upgrade Utility
- D. Firmware upgrade can be done online by using SMclient

Answer: C

Question: 15

When bringing up the SM Client, which window first shows "at a glance" a DS4000 storage subsystem that has a problem?

- A. Enterprise Management
- B. Subsystem Manager
- C. View Pulldown

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
