000-175

IBM

IBM eServer pSeries Solution Sales

The 000-175 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-175 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-175 exam is very challenging, but with our 000-175 questions and answers practice exam, you can feel confident in obtaining your success on the 000-175 exam on your FIRST TRY!

IBM 000-175 Exam Features

  - Detailed questions and answers for 000-175 exam
  - Try a demo before buying any IBM exam
  - 000-175 questions and answers, updated regularly
  - Verified 000-175 answers by Experts and bear almost 100% accuracy
  - 000-175 tested and verified before publishing
  - 000-175 examcollection vce questions with exhibits
  - 000-175 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-175 exam are now continuously updating and accepting this challenge is itself a task. This 000-175 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-175 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 000-175 Test and save time and money while developing your skills to pass your IBM 000-175 Exam? Let us help you climb that ladder of success and pass your 000-175 now!

Question: 1
AIX 5L and SUN Solaris have differing approaches at handling processor failures. Which statement best describes how AIX handles processor failures?

A. If AIX discovers a processor with too many recoverable errors during runtime, it will dynamically turn off that processor, while the rest of the system keeps running.
B. If AIX detects a failing processor it will automatically move all resources to another processor. The failed processor can be hot-swapped and the new replacement becomes the active processor.
C. If AIX determines a processor is failing, it will perform diagnostics to determine which processor function can be disabled and dynamically reallocate all CPU and memory resources thus isolating the failure condition and preventing a reboot.
D. If AIX senses a processor level error condition, internal diagnostics are activated to determine the severity of the problem. After the failure threshold is met, a message is broadcast to the service processor informing the operator to perform a system reboot.

Answer: A

Question: 2
In addition to better overall price performance, which other factor most significantly contributes to a lower three-year TCO advantage for a pSeries customer than for a SUN customer?

A. Sharing commonly used peripherals
B. Maximum capacity of CPU, Memory and I/O
C. Minimum number of processors in a partition
D. Support for different versions of the operating system

Answer: C

Question: 3
A data processing company is comparing the specifications of the SunFire 6800, SunFire 12k and the IBM pSeries 670 for a server consolidation project. Which of the following p670 capabilities would provide the most significant benefit for server consolidation?

A. Maximum memory
B. Maximum processor speed
C. Maximum number of PCI slots
D. Maximum number of partitions

Answer: D

Question: 4
A manufacturing business is presently supporting multiple UNIX platforms and considering the advantages of consolidating environments, adding new applications and standardizing on HP-UX with IA-64. Which advantage should be communicated as the most compelling reason to consider pSeries as the platform of choice?

A. The pSeries family of servers offers many choices from small entry servers to data-center class systems
B. pSeries systems support both AIX and Linux operating systems providing a single platform for both environments
C. AIX contains the tools and utilities necessary to convert all their UNIX software onto a single pSeries server
D. Thousands of AIX operating system-based applications, middleware, and tools are available today and already optimized

Answer: D

Question: 5
An HP customer would like to discuss IBM system advantages. Their current system platform is a partitioned HP rp8400. Which of the following pSeries systems and advantages should be discussed?

A. p630. Maximum partitions, maximum storage, I/O bus speed
B. p670. Maximum partitions, maximum memory, number of I/O slots
C. p655. Maximum number of CPUs, processor speed, number of I/O slots
D. p690. Maximum number of CPUs, peak system bandwidth, peak I/O bandwidth

Answer: B

Question: 6
A sportswear company recently had a visit from a sales rep of a well-known computer vendor. The sales rep gave a presentation on the advantages of VPAR and NPAR. Which of the following companies made this presentation?

A. HP
B. IBM
C. SUN
D. Dell

Answer: A

Question: 7
An HP UNIX server customer running Oracle is interested in knowing more about IBM's future direction because of the uncertainty of HP hardware platforms changing to Itanium. Which of the following advantages should be communicated as a compelling reason to consider a pSeries server solution?

A. IBM pSeries servers support Oracle on both POWER4 and Itanium
B. AIX has Itanium affinity with any ISV application including Oracle
C. Oracle and thousands of other ISV applications are already available for AIX on pSeries
D. IBM Data Migration Services can migrate the HP UNIX operating system to a pSeries solution

Answer: C

Question: 8
On what metrics is Software Maintenance for AIX (SWMA) priced?

A. Clock speed and memory capacity
B. AIX version and number of users
C. pSeries class and number of CPUs
D. pSeries model and number of LPARs

Answer: C

Question: 9
A customer with p615, p630 and p650 pSeries servers installed and running AIX is considering Linux as an additional environment. Which Linux capabilities can the pSeries Sales Specialist present as choices that are available to enhance the existing systems?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
