# 000-183

## IBM

*IBM WebSphere Message Broker V7.0 Solution Development*

<http://www.ipass4sure.com/exams.asp?examcode=000-183>

The 000-183 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-183 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-183 exam is very challenging, but with our 000-183 questions and answers practice exam, you can feel confident in obtaining your success on the 000-183 exam on your FIRST TRY!

### IBM 000-183 Exam Features

- Detailed questions and answers for 000-183 exam
- Try a demo before buying any IBM exam
- 000-183 questions and answers, updated regularly
- Verified 000-183 answers by Experts and bear almost 100% accuracy
- 000-183 tested and verified before publishing
- 000-183 examcollection vce questions with exhibits
- 000-183 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-183 exam are now continuously updating and accepting this challenge is itself a task. This 000-183 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-183 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-183 Test and save time and money while developing your skills to pass your IBM 000-183 Exam? Let us help you climb that ladder of success and pass your 000-183 now!

**QUESTION: 1**

View the Exhibit:

The above flow processes a large incoming file line by line once every four hours. Performance is unsatisfactory even though the server has spare memory and unused processors. Configuring additional instances does not improve this. The following pair of flows was suggested by an architect. The first flow will slice the incoming file into messages without any further processing, which is to be done by the second flow.

What is the expected outcome if the second flow is configured with a large number of additional instances?

- A. Throughput will improve somewhat. Message sequence will not be affected.
- B. Throughput will be unaffected. Message sequence will most likely be affected.
- C. Throughput will improve significantly. Message sequence will most likely be affected.
- D. Throughput will deteriorate slightly due to the extra queuing. Message sequence will not be affected.

**Answer: C**

**QUESTION: 2**

As part of an Order Process flow, a developer must add a new section to an existing XML message. The relevant section of the incoming message is as follows:

```

<OrderMsg>
  <OrderItem>
    <Number>111</Number>
  </OrderItem>
  <OrderItem>
    <Number>222</Number>
  </OrderItem>
  <OrderItem>
    <Number>444</Number>
  </OrderItem>
</OrderMsg>
  
```

The developer must add the following Order Item, to fall in the correct numeric sequence:  
 <OrderItem> <Number>333</Number> </OrderItem> How would the developer achieve this?

- A. DECLARE FieldRef REFERENCE TO OutputRoot;  
 CREATE FIELD OutputRoot.XMLNSC.OrderMsg.OrderItem[3].Number AS FieldRef; SET  
 FieldRef = '333';
- B. DECLARE FieldRef REFERENCE TO OutputRoot.XMLNSC.OrderMsg.OrderItem[2];  
 CREATE NEXTCHILD OF FieldRef NAME 'Number';  
 SET FieldRef = '333';
- C. DECLARE FieldRef REFERENCE TO OutputRoot.XMLNSC.OrderMsg.OrderItem[2];  
 CREATE NEXTSIBLING OF FieldRef NAME 'OrderItem';  
 SET FieldRef.Number = '333';
- D. DECLARE FieldRef REFERENCE TO OutputRoot.XMLNSC.OrderMsg.OrderItem[2];  
 CREATE NEXTSIBLING OF FieldRef AS FieldRef NAME 'OrderItem';  
 SET FieldRef.Number = '333';

**Answer: D**

### QUESTION: 3

Consider the following ESQL code snippet from a Compute node.

```
DECLARE myRef REFERENCE TO InputRoot.XMLNSC.DetailedMsg.Body.Player[3];
MOVE myRef NEXTSIBLING;
SET OutputRoot.XMLNSC.Winner.Name = myRef.Wane;
```

The following input message is passed to the Compute node.

```
<DetailedMsg>
  <Header>
    <Date>'10-03-2010'</Date>
    <Type>Register</Type>
    <Id>0010031963</Id>
  </Header>
  <Body>
    <Player>
      <Name>Robert</Name>
      <Age>45</Age>
    </Player>
    <Player>
      <Name>Smith</Name>
      <Age>50</Age>
    </Player>
    <Player>
      <Name>Rocky</Name>
      <Age>40</Age>
    </Player>
  </Body>
</DetailedMsg>
```

What is the value of OutputRoot.XMLNSC?

- A. NULL
- B. <Winner/>
- C. <Winner Name="Robert"/>
- D. <Winner><Name>Rocky</Name></Winner>

**Answer:** D

**QUESTION:** 4

A developer needs to generate a monotonically increasing sequence number for each message in a given message flow. What is the MOST efficient way to achieve this?

- A. Use the Create Sequence operator of ESQL.
- B. Use the Generate Sequence operator of Java.
- C. Use the Sequence function of an external database.
- D. Use the Sequence node of WebSphere Message Broker.

**Answer:** D

**QUESTION:** 5

A message flow reads a file, record by record. Based on the content of each record, it will be propagated to one or more output queues. The File Input node has the Transaction property set to yes and all output nodes are configured to be Automatic node has the transaction property set to yes and all output nodes are configured to be automatic In the event that flow execution is interrupted by a hardware failure, which one of the following is true?

- A. Processing will resume at the beginning of the file; previously created messages will be duplicated.
- B. Processing will resume at the beginning of the file; previously created messages will be backed out.
- C. Processing of the file resumes at the last checkpoint; any extraneous messages will have been rolled back.
- D. The file will be deleted or archived depending on the setting of the File Input node; unprocessed records will be missing from the output.

**Answer:** A

**QUESTION:** 6

A customer needs to dynamically choose which web service URL to call from a WSDL in the WebSphere Service Registry and Repository (WSRR), based on a company acronym in the input message received by Message Broker. Which node should the solution developer choose when implementing this type of retrieval operation?

- A. EndpointLookup
- B. RegistryLookup
- C. EndpointRetrieval
- D. DatabaseRetrieval

**Answer:** A

**QUESTION: 7**

A company has decided to use WebSphere Message Broker to integrate several legacy systems which generate batch files into the company WebSphere MQ backbone. What is the quickest way the developers can accomplish this task?

- A. Build a user defined node.
- B. Create a user defined extension.
- C. Create a program that processes the batch files into WebSphere MQ messages and then send the messages to WebSphere Message Broker for processing.
- D. Use the Record Distribution to WebSphere MQ one-way built-in pattern.

**Answer:** D

**QUESTION: 8**

When a message is received by an Input node in a message flow, the message assembly is created. Which tree or trees are populated when an error free message is received by a FileInput node?

- A. The Message tree only.
- B. The Message tree and Environment tree.
- C. The Message tree and LocalEnvironment tree.
- D. The Message tree, Environment tree, LocalEnvironment tree, and ExceptionList tree.

**Answer:** C

**QUESTION: 9**

Which Message Broker artifact type is not analyzed by Impact Analysis?

## Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
