QUESTION 1:

Certkiller .com is starting up a new division. Their current configuration is 10 GB of hard disk space and 512 MB of memory. These are also the minimum requirements for the software. The division will be expanding rapidly and users are expected to double in size within six months. What server should the division start with to meet current and future needs?

- A. 2 processors, 1 GB memory, 20 GB Hard Disk space
- B. 4 processors, 1 GB memory, 10 GB Hard Disk space
- C. 1 processors, 512 MB memory, 40 GB Hard Disk space
- D. 3 processors, 512 MB memory, 40 GB Hard Disk space

Answer: A

QUESTION 2:

The finance group at Certkiller .com has just approved a new financial package that runs on a RS/6000. The old data will be converted to the new system. Currently they have 10 GB of data but will be growing to 18 GB with the new system because they want to maintain 1 year of history online. The new system is a pSeries 620 with 512 MB of RAM, an SSA card, two 9.1 GB SSA drives and a single FDDI card. What would be the best addition to this system for redundancy?

- 1. One SSA card
- 2. Two 9.1 GB SSA drives
- 3. Error correction RAM
- 4. Two additional processors

- A. 1.2
- B. 4.1
- C. 4.2
- D. 301

Answer: A

QUESTION 3:

What is the correct command to reject applied software?

- A. Instfix-r
- B. Installp-u
- C. Installp-r
- D. Instfix-u

Answer: C

QUESTION 4:

A system administrator installed the trusted computing base to accommodate the arrival of a new system although the OS requirements did not specify this as a necessity. The application developers have requested that the trusted computing base be removed, since it is not needed. What must the administrator do to remove this feature?

- A. Run "lspp -f bos.security.tcb.rte"
- B. Remove the bos.security.tcb.rte fileset.
- C. Run "tcbconfig -c off" to turn off the trusted computing base.
- D. Re-install the system without the trusted computing base option.

Answer: D

QUESTION 5:

A system administrator has decided to perform a preservation installation on one of the machines to see how the process works. There are several files in var that the system administrator would like to save. However, in reading about the preservation process, the system administrator notices that /var is one of the filesystems that is overwritten. In order to prevent the files from being overwritten, what must the system administrator do?

- A. Use the "mkpreservefile - f" command
- B. Copy the files to /usr prior to the upgrade.
- C. Update /etc/preserve.list with the files to be saved.
- D. Run "restore - xvqf/dev/hdisk0" after doing the preservation installation.

Answer: C

QUESTION 6:

An AIX server called test123, has approximate 120 MB of physical memory. The system administrator has been experiencing paging space problems. Using the output below, what might the system administrator do to alleviate the paging space problem?

```
root@test123:/  
#isps -a  
page space physical volume volume group size %used active  
auto type  
hd6 hdisk0 rootvg 60MB 98 yes yes iv paging00  
hdisk0 rootvg 60MB 92 yes yes iv
```

- A. Remove all paging space and use only RAM.

- B. Delete paging00, and increase hd6 by 60 MB.
- C. Increase the total size of paging space so that it is at least 240 MB.
- D. Move paging00 to hdisk0, so that both paging space occupy the same hdisk.

Answer: C

QUESTION 7:

After completing the installation of the Base Operating System on one of the servers, the system administrator would like for all users who telnet into this machine to see a specific message after they log in successfully. Which files should be edited to provide this message?

- A. /etc/motd
- B. /etc/massage
- C. /etc/environment
- D. /etc/security/login.cfg

Answer: A

QUESTION 8:

A system administrator has just finished installing the Performance Toolbox on a system and would like to list the files that are associated with this particular product. Which of the following commands will display this information?

- A. lpchk - f perfagent.tools
- B. lspp - perfagent.tools
- C. installp - f perfagent.tools
- D. cat/stc/objrepos/perfagent.tools

Answer: B

QUESTION 9:

Certkiller .com would like to install a their third party product called Applet.rte. Upon trying to install the product, the system administrator receives an error indicating that the prerequisite software. BaseProdnet. Is missing. BaseProd net is located on another CD. When the system administrator tries to install that product, it fails and indicates that it is missing Applet.rte. Which of the following approaches would assist in silving this problem?

- A. Copy both products into a directory and install from there.
- B. Go back to the first CD and try installing Applet.rte again.
- C. Install BaseProd.net and then switch CDs during the installation.
- D. Get another CD-ROM and install from both CD-ROMs at the same time.
