000-347

IBM

Websphere Portal V5.0, Deployment And Administration

http://www.ipass4sure.com/exams.asp?examcode=000-347

The 000-347 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-347 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-347 exam is very challenging, but with our 000-347 questions and answers practice exam, you can feel confident in obtaining your success on the 000-347 exam on your FIRST TRY!

IBM 000-347 Exam Features

- Detailed questions and answers for 000-347 exam
- Try a demo before buying any IBM exam
- 000-347 questions and answers, updated regularly
- Verified 000-347 answers by Experts and bear almost 100% accuracy
- 000-347 tested and verified before publishing
- 000-347 examcollection vce questions with exhibits
- 000-347 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-347 exam are now continuously updating and accepting this challenge is itself a task. This 000-347 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-347 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 000-347 Test and save time and money while developing your skills to pass your IBM 000-347 Exam? Let us help you climb that ladder of success and pass your 000-347 now!

Question: 1
In order to configure Search in clustered portal environment, which of the following is the best solution?

A. Create an index on each node.
B. Store the documents on a mounted file system.
C. Create the index on the deployment manager node.
D. Replicate the index to each cluster member.

Answer: B

Question: 2
What authentication options can be selected by the administrator when creating a new web clipping portlet?

A. Form-based Authentication
B. TAI (Trust Association Interceptor)
C. Client Certificate Authentication
D. HTTP Basic Authentication

Answer: A, D

Question: 3
In order to make a portlet the source portlet in a cooperative portlet scenario, what must be added to the portlet?

A. custom JSP tag library
B. WSDL with custom extensions
C. portlet parameter name
D. security.xml

Answer: A

Question: 4
Which of the following statements is TRUE regarding the PortletSettings configuration object?

A. Contains configuration parameters for all instances of a concrete portlet
B. Initialized by the developer and cannot be modified by the administrator
C. Allows each user to customize their own settings
D. Available to every portlet in the portlet application

Answer: A

Question: 5
The administrator has installed a portlet from development and placed it on a page called "Human Resources". Employee Dave cannot see the portlet on this page with the other portlets when he logs in, but the other employees in his department can. From the options below, what could be the problem?

A. The portlet application WAR did not contain the appropriate page information in the portlet.xml file
B. The portlet was not activated after it was installed
C. The appropriate access rights for this portlet were never given to Dave
D. Dave does not have rights to view the Human Resources page

Answer: C

Question: 6
Which of the following statements are TRUE regarding portlet applications?

A. Each portlet application can contain multiple portlets
B. The application is inside of a Web Application Archive (WAR) file
C. Portlet applications are not required since portlets can be deployed by themselves
D. Only one portlet application can be contained in a Web Application Archive (WAR) file

Answer: A, B

Question: 7
An administrator needs to have a configuration parameter available for all of the portlets in the portlet application and requires the ability to change them if needed. Currently, he must add the name/value pairs each time the portlet is installed. Where can he instruct the developer to place the parameters in the portlet application to help reduce the time it takes to configure the portlet?

A. Use the <init-param> in the web.xml
B. The parameters would have to be programmatically added in the portlet source
C. Use the <context-param> in the portlet.xml
D. Portlet application parameters can not be defined before the application is installed

Answer: C

Question: 8
Which of the following statements is true if a portlet is updated by uninstalling and reinstalling the portlet application?

A. Since the portlet data is stored in the database based on the portlet name, uninstalling and reinstalling the portlet will maintain the portlet data and user specific configuration
B. All portlet data including user configuration, saved portlet and portlet application parameters and portlet page placement are deleted and must be reconfigured
C. User specific configuration data for this portlet will be maintained since it's stored in the WMM database, however, placement of the portlet on pages will have to be reconfigured
D. Since page layout is maintained through the Manage Pages portlet, the portlet will remain on the page until removed, however, the portlet configuration data will be lost

Answer: B

Question: 9
When cloning a portlet using the administrative pages, which of the following is true regarding the data associated with the portlet and portlet application?

A. The portlet application parameters are copied from the cloned application, but the portlet parameters are left blank since this is a new version of the portlet
B. The new portlet application parameters and portlet parameters are created from the original portlet.xml as base configuration data for the clone
C. The portlet application and portlet are cloned, but the parameters are left blank for configuration by the administrator
D. The portlet application data and the portlet data are duplicated to the clone from the portlet being copied

Answer: D

Question: 10
Considering best production environment practices, which of the following should reside in the de-militarized zone (DMZ)?

A. WebSphere Application Server and the master repository
B. HTTP Server and WebSphere Application Server plugin file
C. WebSphere Portal and xmlaccess.bat
D. LDAP directory server

Answer: B

Question: 11
When running multiple cluster members in a vertical clustering configuration, what can be done to ensure that there are no port conflicts between cluster members?

A. Assign Custom Unique Names to the portlets in each cluster member.
B. Check the Generate Unique HTTP Ports option in the WebSphere Application Server Admin Console.
C. Edit the port numbers of each member in the web server plug-in.
D. Check the create replication entry in this server option in the WebSphere Application Server Admin Console.

Answer: B

Question: 12
In a production environment, where is the BEST location for the LDAP directory?

A. The LDAP directory co-resident with WebSphere Portal.
B. The LDAP directory co-resident with WebSphere Application Server (WAS)
C. The LDAP directory located on a separate machine from WebSphere Portal.
D. The LDAP directory co-resident with the HTTP Server.

Answer: C

Question: 13
Which of the following database scenarios is NOT valid in a horizontal clustering configuration for WebSphere Portal?

A. One centralized Oracle database for the entire cell.
B. DB2 database clients on each node.
C. One centralized Cloudscape database for the entire cell.
D. One centralized DB2 database for the entire cell.

Answer: C

Question: 14
A customer has decided to use WebSphere Portal V5. The customer already has an IBM Directory Server 5.1 based LDAP-Server. The customer wants to enable the already deployed users as WebSphere Portal users. Which of the following statements are TRUE regarding the required integration?

A. There must be a user named wpsadmin with the password wpsadmin prior to installation.
B. After portal installation, passwords for wpsadmin and wpsbind should not be changed.
C. A group named wpsadmins must exist in the directory.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
