000-373

IBM

IBM WebSphere Business Monitor V6.2 Solution Development

<http://www.ipass4sure.com/exams.asp?examcode=000-373>

The 000-373 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-373 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-373 exam is very challenging, but with our 000-373 questions and answers practice exam, you can feel confident in obtaining your success on the 000-373 exam on your FIRST TRY!

IBM 000-373 Exam Features

- Detailed questions and answers for 000-373 exam
- Try a demo before buying any IBM exam
- 000-373 questions and answers, updated regularly
- Verified 000-373 answers by Experts and bear almost 100% accuracy
- 000-373 tested and verified before publishing
- 000-373 examcollection vce questions with exhibits
- 000-373 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-373 exam are now continuously updating and accepting this challenge is itself a task. This 000-373 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-373 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-373 Test and save time and money while developing your skills to pass your IBM 000-373 Exam? Let us help you climb that ladder of success and pass your 000-373 now!

QUESTION: 1

The functional requirements need a set of KPIs to support business activity monitoring. Which of the following components can be used to define KPIs?

- A. Business Space
- B. WebSphere Process Server
- C. WebSphere Business Modeler
- D. WebSphere Integration Developer
- E. WebSphere Monitor Development Toolkit
- F. WebSphere Service Registry and Repository

Answer: A, C, E

QUESTION: 2

Nonfunctional requirements need a topology that supports high performance and throughput. What is the recommended method for Monitor to fulfill the requirements?

- A. Queue Based
- B. Queue Bypass
- C. WSEventing
- D. WSNotification

Answer: B

QUESTION: 3

A solution developer is testing a monitor model using the Unit Test Environment (UTE). While testing, the events are emitted synchronously from the event source. The events are accumulating in the system exception queue in the correct order and are not consumed by the monitor model. What is the possible cause of this problem There is a problem in:

- A. the Global Instance ID.
- B. the Event Sequence Path.
- C. evaluating the filter condition.
- D. in evaluating the correlation condition.

Answer: A

QUESTION: 4

A business analyst created a process model with associated KPIs in WebSphere Business Modeler and exported it to the Monitor Development Toolkit. The solution developer created another monitor model with measures to support alerts based on instance measures for the same process. Assuming both of the monitor models are valid, what is the best way for the solution developer to put the KPIs and alerts definitions together in the same monitor model?

- A. Combine the models with the Combine Monitor Models menu option, and choose to create a new monitor model.
- B. Compare the models in a text editor, manually apply the changes from the business analyst and create a new monitor model by copying the XML.
- C. Compare the models with the Compare With >Each Other menu option, accept each of the highlighted changes, and create a new monitor model by clicking Save a Copy.
- D. Compare the models with the Compare With >Each Other menu option, accept each of the highlighted changes, and overwrite the previous monitor model by clicking Save as Right Contributor.

Answer: A

QUESTION: 5

The solution developer installed Business Space within a deployment environment with a remote database, and has successfully completed the initial Business Space configuration from the WebSphere Application Server admin console. How would the solution developer proceed with the database configuration?

- A. Grant permissions on the existing tables for the Business Space application.
- B. Business Space does not require separate tables from the monitor database, so not additional setup is required.
- C. The tables must be created manually on the database server before using Business Space.
- D. The tables have already been created by checking Create tables checkbox during the Business Space configuration process.

Answer: C

QUESTION: 6

Which of the following is a measure in the context of Business Activity Monitoring (BAM)?

- A. The minimal latency of the network.
- B. The average score of a credit check.
- C. The number of currently logged on users.
- D. The maximal response time of the database system.

Answer: B

QUESTION: 7

What does Business Activity Monitoring encompass?

- A. Measuring business performance.
- B. Observing realtime and completed business processes
- C. Analyzing business plans
- D. Reporting on business operations
- E. Planning business organizations.
- F. Funding business operations.

Answer: A, B, D

QUESTION: 8

Which components are not scalable in a high availability clustered monitor topology?

- A. Action services
- B. CEI event service
- C. Data services scheduler
- D. Monitor model logic modules
- E. Service integration bus message engine for WebSphere Business Monitor

Answer: C, E

QUESTION: 9

A telecommunication company is introducing a business process monitoring solution. Since the scope of the application is welldefined by the business department, the IT department decides to build up a four cluster environment. This means that BPEL processes and Monitor models share the same cluster. Which order must be followed during profile creation?
