000-375

IBM

WebSphere Process Server V6.2, System Administration

<http://www.ipass4sure.com/exams.asp?examcode=000-375>

The 000-375 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-375 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-375 exam is very challenging, but with our 000-375 questions and answers practice exam, you can feel confident in obtaining your success on the 000-375 exam on your FIRST TRY!

IBM 000-375 Exam Features

- Detailed questions and answers for 000-375 exam
- Try a demo before buying any IBM exam
- 000-375 questions and answers, updated regularly
- Verified 000-375 answers by Experts and bear almost 100% accuracy
- 000-375 tested and verified before publishing
- 000-375 examcollection vce questions with exhibits
- 000-375 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-375 exam are now continuously updating and accepting this challenge is itself a task. This 000-375 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-375 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-375 Test and save time and money while developing your skills to pass your IBM 000-375 Exam? Let us help you climb that ladder of success and pass your 000-375 now!

Exam Name:	WebSphere Process Server V6.2, System Administration		
Exam Type:	IBM	Exam Code:	000-375
Certification:	IBM WebSphere	Total Questions:	107

Question: 1

A company has an IBM Web Sphere Process Server clustered environment running. A system administrator is asked to configure a LDAP people directory provider to be used by human tasks. Which action should the system administrator take?

- A. Configure the URL of the local LDAP server on all nodes within the cluster.
- B. Configure the people directory provider on the cell that contains the cluster.
- C. Configure the people directory provider on every node that hosts members of the cluster.
- D. Configure a custom property listing on the nodes within the cluster; then configure the people directory provider on the node associated with the custom property.

Answer: C

Question: 2

A developer is trying to change the settings for the Business Process Choreographer container authentication alias (BPC_Auth_Alias) that was created during the profile creation step. An error message indicating the developer does not have sufficient authority to change the settings is displayed. Which one of the following is the minimum role a system administrator should grant to the developer to correct this error?

- A. Deployer role
- B. Operator role
- C. Configuration role
- D. Administrator role
- E. Adminsecuritymanager role

Answer: C

Question: 3

A new business integration application retrieves and processes sensitive information from an Enterprise Integration System (EIS). The connection is established using a Web Sphere JCA adapter export component. To protect the target component (wired) processing the data, the system administrator plans to enable security on Web Sphere Process Server. Which action should be performed to integrate the adapter component in this environment?

- A. No action is required because the JCA adapter does not support any inbound authentication mechanisms.
- B. No action is required. In a security enabled environment all EIS connections to back-end systems are secured by default.
- C. The run-as role should be set on the target component of the adapter export to protect downstream component access.
- D. The adapter export component should be configured to use a J2C authentication alias to access the downstream components.

Answer: C

Question: 4

A company plans to use Web Sphere Business Space widgets. The development team has implemented custom widgets using the Representational State Transfer (REST) services of the Business Process Choreographer API. Security is an important aspect and all communication channels and APIs must be security enabled. Before the development team can test the installed widgets in a secured environment, which action should be performed by the system administrator?

- A. Change the communication protocol of all relevant REST service endpoints to use HTTPS.
- B. No action needs to be taken because the REST service endpoints do not support HTTPS protocols for API access.

Exam Name:	WebSphere Process Server V6.2, System Administration		
Exam Type:	IBM	Exam Code:	000-375
Certification:	IBM WebSphere	Total Questions:	107

- C. Enable administrative security and disable application security on the server or cluster hosting the REST service endpoints.
- D. Remove all HTTP port mapping from the list of virtual hosts to automatically use HTTPS ports and communication channels.

Answer: A

Question: 5

When a system administrator creates an IBM Web Sphere Process Server profile and selects Enable administrative security, an administrator user name must be supplied. This identity is used as a default for all underlying components. After the installation, which of the following components should be configured to appropriate users from the user repository?

- A. Human Task Manager
- B. Business State Machine
- C. Business Process Choreographer
- D. Common Event Infrastructure (CEI)
- E. Service component architecture (SCA)

Answer: C, D, E

Question: 6

A business process event has failed. Assuming events are enabled, how may an administrator most easily examine the end-to-end process flow that led to the failed event, working from the Failed Event Manager?

- A. From the failed event Details page, click rowse Related Common Base Events?
- B. From the failed event Details page, click pen calling process in Business Process Choreographer Explorer?
- C. Select the failed event, click submit with Trace? and view component logs.
- D. Enable tracing on the Failed Event Manager, and resubmit the original request.

Answer: A

Question: 7

A Web Sphere Process Server deployment environment is used by the development team. The Common Event Infrastructure (CEI) was configured to be on its own Derby database. The functional and recovery tests have passed the Proof of Concept (PoC). The next stage will be to conduct performance tests on a staging environment. For consistency, the production environment will use the same topology as the staging environment. Which action must the system administrator take to improve performance for the staging system?

- A. Configure CEI to use multiple Derby databases.
- B. Configure a deployment environment referencing a high performance database instead of Derby.
- C. Configure the CEI database to be on the same server as the Web Sphere Process Server db
- D. Configure the CEI database to be on the same server as the Messaging database to minimize network latency.

Answer: B

Question: 8

The Service Integration Bus Browser is a tool available from the Integrated Solutions Console (ISC) that allows the system administrator to perform which tasks?

- A. View runtime properties of messaging engines.
- B. View runtime properties of messaging engines, and modify message contents.
- C. View runtime properties of messaging engines, queue depths, and message contents.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
