QUESTION 1

What is the default duration of a security token generated to access a resource manager object?

- A. 1 day
- B. 2 days
- C. 2 hours
- D. 30 minutes

Answer: B

QUESTION 2

A new user has just been added to the Content Manager system. The administrator wants to assign this userid a privilege set in an already existing access control list. The userid is not shown in the access control list modification panel. Which of the following is the most likely reason for this?

- A. The access control list is already in use and cannot be modified anymore.
- B. The userid has an assigned privilege set which includes the ItemSuperAccess privilege.
- C. The password for the new userid is expired immediately, and therefore, this userid cannot be accessed.
- D. The Content Manager System Administration client needs to be restarted after a userid is created to refresh the cache.

Answer: B

QUESTION 3

The migrator process has been set to check for data to migrate at intervals of 15 minutes between 8:30 PM and 4:30 AM. Sometimes the migration process takes about 20 minutes to complete. What happens when the last migration process commences?

- A. The migrator will start logging errors as soon as it hits 4:30 AM.
- B. The migrator will stop if it runs past 4:30 AM and resume at 8:30 PM from where it stopped.
- C. The migrator will complete the last migration process and will stop until the next cycle begins.
- D. The migrator will stop at 4:30 AM and an optional flag can be set to email an administrator of a stalled migration.

Answer: C

QUESTION 4

Which TWO of the following are valid delete rules that may be applied to a child component definition?

- A. Cascade
- B. Restrict
- C. SetToNull
- D. No Action
- E. SetDefault

Answer: A,B

QUESTION 5

Additional privileges were added to a privilege set associated with a user group, which has been assigned to an ACL. However, a user in this user group does not see these privileges. Which of the following is a possible reason for this outcome?

- A. The user belongs to a subdomain.
- B. The privilege was added to a different privilege set.
- C. The user is not a Content Manager system administrator.
- D. An ACL cannot grant more access than a user has in the privilege set associated with their user ID.

Answer: D

QUESTION 6

In a system with administrative domains enabled, which of the following objects can exist in more than one domain?

- A. User IDs
- B. Collections
- C. Resource Managers
- D. Access Control Lists

Answer: D

QUESTION 7

An Item Type must contain which of the following?

- A. A root component
- B. A resource component
- C. At least one child component
- D. An item constructor component

Answer: A

QUESTION 8

During installation, which of the following options must be configured to connect to an LDAP server and retrieve user names and groups into Content Manager?

- A. Base DN and group names
- B. Server name and Base DN
- C. Server name and group attributes
- D. Base DN and minimum number of records to retrieve

Answer: B

QUESTION 9

A collection point provides which of the following functions?

- A. Defines the data storage volumes for document routing folders and folder items.
- B. Waits for external documents to collect in a folder. It sends documents to another work node after administrator approval.
- C. Waits for external documents to collect in a folder. The types of documents collected are specifically determined by the business task. The collected documents are automatically sent to the next defined work node.
- D. Waits for external documents to collect in a folder. It sends documents to another work node after a folder has collected the required number of documents or sets a notification flag if the time allotted to wait for the required documents has expired.

Answer: D

QUESTION 10

In a system that uses DB2 Information Integrator for Content and Workflow, how can a user be deleted from Workflow that has already been deleted in DB2 Information Integrator for Content?

- A. Run the EIPUser2WF.bat to delete the users from Workflow.
- B. Run the fmcibie utility to delete users and user groups from Workflow.
- C. Add the deleted persons to the DeletePersons.fdl file and restart the Workflow service.
- D. These users are always synchronized and therefore will never have to delete users directly from Workflow.

Answer: B

QUESTION 11

Which item type classification does NOT allow text searching on the content of a text document?

- A. Item
- B. Document
- C. Resource
- D. Document Part

Answer: A

Pass4sure Certification Exam Features;
