000-889

IBM

*Fundamentals of Ent Solutions Using IBM Tivoli Security
2007*

<http://www.ipass4sure.com/exams.asp?examcode=000-889>

The 000-889 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-889 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-889 exam is very challenging, but with our 000-889 questions and answers practice exam, you can feel confident in obtaining your success on the 000-889 exam on your FIRST TRY!

IBM 000-889 Exam Features

- Detailed questions and answers for 000-889 exam
- Try a demo before buying any IBM exam
- 000-889 questions and answers, updated regularly
- Verified 000-889 answers by Experts and bear almost 100% accuracy
- 000-889 tested and verified before publishing
- 000-889 examcollection vce questions with exhibits
- 000-889 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-889 exam are now continuously updating and accepting this challenge is itself a task. This 000-889 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-889 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-889 Test and save time and money while developing your skills to pass your IBM 000-889 Exam? Let us help you climb that ladder of success and pass your 000-889 now!

Question: 1

What information should a customer's baseline document include?

- A. proof that there are no existing orphan accounts
- B. the naming convention in place for all current users
- C. the customer's key business processes related to security
- D. a list of all authentication mechanisms used by the customer

Answer: C

Question: 2

In order to correctly understand the data protection requirements, which two groups of people must be interviewed? (Choose two.)

- A. all managers
- B. IT department personnel
- C. Business Unit management
- D. Legal department personnel
- E. Human Resource department

Answer: C, D

Question: 3

In security solution design development, when do you document the business and IT organizational structure map?

- A. when establishing the customer's baseline for planning purposes
- B. when identifying opportunities for business partner security offerings
- C. when evaluating the customer's IT processes, people and technologies
- D. when defining a long-term vision for the future direction of the customer's security solutions

Answer: A

Question: 4

Which is an accurate description of a highly mature company, in the area of authorization?

- A. They are highly mature, because they use a single authorization engine, shared by many applications.
- B. Their approach to authorization is in a leadership position, because they address WS- Provisioning, SAML and Liberty.
- C. They are addressing authorization optimally because they are handling authorization within the application, and its best to address authorization decisions close to the decision point.
- D. Their approach to authorization is highly secure and therefore highly mature, because their infrastructure uses many different authorization standards and thus is least likely to be penetrated.

Answer: A

Question: 5

Which technology needs to be available when managing a nonstandard database with an IBM Tivoli Identity Manager adapter?

- A. SQL
- B. JDBC
- C. ODBC

D. TCP/IP

Answer: B

Question: 6

What is the purpose of the context diagram for a security solution?

- A. It provides a detailed listing of the software used in the solution and how the software is connected.
- B. It provides a detailed listing of the hardware used in the solution and how the hardware is connected.
- C. It scopes the security system's responsibilities and provides a black box view of the system interface.
- D. It provides a listing of the hardware and software used in the system and how they are interconnected.

Answer: C

Question: 7

What information is needed when creating a document on a customer's IT and business organizational structure? (Choose two.)

- A. number of business units
- B. annual expenditure on IT assets
- C. number of employees in IT organization
- D. list of divisions within the IT department
- E. total number of systems used by the company

Answer: A, D

Question: 8

A customer shows a good level of maturity regarding IT security compliance when they understand two essential elements as a basis for achieving and demonstrating compliance. One element is a security policy that clearly states goals. What is the second essential element?

- A. audit
- B. workflow
- C. data integrity
- D. administration

Answer: A

Question: 9

A customer has resources being managed in different facilities. When you configure a security solution, what is the most important element to consider in the design of the system?

- A. use of a fiber optic backbone
- B. the encryption protocol to be used
- C. location of firewalls in the internal network
- D. the time zone in which each facility is located

Answer: C

Question: 10

Which statement is true about "new initiative deployment"?

- A. New initiatives typically involve advanced authentication, and advanced authentication must be properly provisioned.
- B. New initiatives are typically coded in Java, .NET or C++, and each of these requires a tool that measures security compliance.
- C. All new initiatives require a service-oriented architecture (SOA), and SOA standards demand that a security component be present.
- D. When you deploy new applications, you can get them coded, tested and updated more quickly if you use an authentication and authorization solution that avoids coding security into the application.

Answer: D

Question: 11

In describing their business processes, the customer has described the following aspects of "audit/compliance":

- 1. Physical building access security
- 2. Security of servers
- 3. Security of desktops
- 4. Audit of user identities/accounts
- 5. Audit of access control (policy and actuals)
- 6. Audit of security of business partners
- 7. Revoke compromised certificates

From this list, what can be addressed by IBM Tivoli security solutions?

- A. 2, 3, 5, 7
- B. 2, 3, 4, 5
- C. 2, 3, 4, 6
- D. 4, 5, 6, 7

Answer: B

Question: 12

Business rules catalogs are effective in gathering requirements for what items?

- A. user registry layout
- B. password strength policies
- C. user interaction with the system
- D. administrator interaction with the system

Answer: B

Question: 13

Which document describes what needs to be addressed in a security solution for a customer?

- A. Installation History
- B. Design Specification
- C. Interface Specification
- D. Requirements Specification

Answer: D

Question: 14

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
