Answer: D

QUESTION: 9
YoujustupgradedtoR71 and are using the IPS Software Blade You want toenable all critical protections while keeping the rate of false positively verylow.How can you achieve this?

A. The new IPS system is basedon policies, but it has no abilitytocalculate or change the confidence level, so it always has a high rate of falsepositives.
B. This can't be achieved; activating any IPS system always causes ahigh rate of false positives.
C. The new IPS system is based on policies and gives you the abilitytoactivate all checks with critical severity and a high confidence level.
D. As in SmartDefense,this can be achieved by activating all the criticalchecks manually.

Answer: C

QUESTION: 10

Refer to the network topology below. You have IPS Software Blades active on the Security Gateways sglondon, sgla, andsgny, but still experience attacks on the Web server in the New York DMZ. How is this possible?
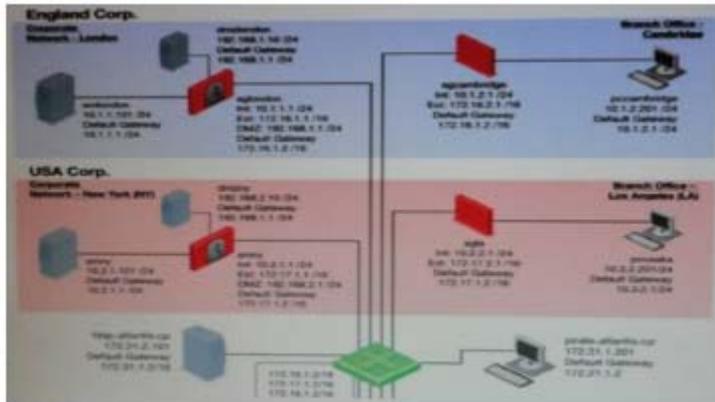

A. AH of these options are possible.

B. The attacker may have used a bunch of evasion techniques likeusing escape sequence instead of cleartext commands.It is also possible that thereare entry points not shown in the network layout, like rogue access points.

C. Since other Gateways do not have IPS activated, attacks may originate from their network without anyone noticing.

D. An IPS may combine different detection technologies, but is dependent on regular signature updates and well-turned anomaly algorithms.Even if this is accomplished, notechnology can offer 100 % protection.

Answer: C

QUESTION: 11
