- A. @GetAdminECLStatus
- B. @AdminECLIsLocked
- C. @IsAdminECLLocked
- D. @AdministrationECLStatus

Answer: B

QUESTION 2

Mike has enabled AutoSave for a form in his Invoice.nsf Domino application. What must he do to make sure the AutoSave information does not contain outdated documents?

- A. Run compact on the AutoSave database.
- B. Nothing. Documents are removed automatically.
- C. Set the "Remove AutoSave documents older than nn days" value in Database Properties.
- D. Run compact on the Invoice.nsf Domino application.

Answer: B

QUESTION 3

Rebecca has a number of shared actions in her Domino application, but she needs to quickly determine which actions display in the action bar and which actions display in the menu. What feature in Domino Designer can she check to find this information?

- A. The shared actions design columns for action bar and menu locations.
- B. The Location field in the Shared Action property dialog box.
- C. The Find Shared Actions button in the Action Bar design element.
- D. The Shared Action Location section of the Design Synopsis.

Answer: A

QUESTION 4

Mark wants to use @Command([DiscoverFolders]) to check which folder(s) contain a certain document. This command does not appear to be working for him. What property should Mark check?

- A. Folder Properties - Allow Folder Discovery
- B. Database Properties - Don't Maintain Unread Marks
- C. Form Properties - Don't Maintain Unread Marks
- D. Database Properties - Allow Folder Discovery

Answer: D

QUESTION 5

What most accurately describes a Web service?

- A. A Web service is a self-contained, self-describing, modular application, based on XML, which can be published to and invoked from the Web.
- B. A Web service is an XML agent running on a Domino server that can be called from a browser and returns information in HTML format.
- C. A Web service is a Java program in a W3C standard format that allows web-based invocation.
- D. A Web service is a LotusScript agent that can be called from a browser and returns information via XML.

Answer: A

QUESTION 6

Scott has created a Web service in his Domino application. He would like to analyze the performance of the Web service. How would he do this?

- A. Select "Enable web service profiling" from File - Tools - Debugging Preferences.
- B. Select "Enable web service profiling" in Database Properties.
- C. Select the web service in Domino Designer and click the "Enable Profiling" button.
- D. Select "Profile This Web Service" in the Web Service Properties.

Answer: D

QUESTION 7

Dennis needs to determine if a Notes setting cannot be changed due to policy rules. What function will give Dennis this information?

- A. @PolicyIsFieldLocked
- B. @PolicyFieldUnavailable
- C. @IsPolicyFieldLocked
- D. @GetPolicyFieldSetting

Answer: A
