Exam Name:	CIW Site Designer		
Exam Type:	CIW		
Exam Code:	1D0-420	Total Questions	95

Question: 1

What is a database?

- A. A database stores information for a Web server.
- B. A database stores numerically formatted information about users.
- C. A database analyzes stored data.
- D. A database stores information for retrieval.

Answer: D

Question: 2

In programming languages, which term is used to describe object behaviors?

- A. Attributes
- B. Properties
- C. Methods
- D. Classes

Answer: C

Question: 3

You are creating a database of contact information for all the employees at your company. Which term describes the rows in your database table, each of which contains a complete set of information (name, phone number and e-mail address) for one person?

- A. Field
- B. Schema
- C. File
- D. Record

Answer: D

Question: 4

Why is the model that drives the Web not considered a procedural model?

- A. The nature of the procedural model is represented extensively, but only in specific event-driven environments.
- B. There is a lack of sequential interaction in most daily interactions on the Web.
- C. There are no methods on the Web to enforce the procedural model's rules.
- D. The Web is not mature enough to support the structure of the procedural model, so it must support the event-driven model.

Answer: B

Question: 5

Which technology was created to provide a manner of describing both structure and content in Web pages?

- A. Hypertext Markup Language (HTML) 4.01
- B. Dynamic HTML (DHTML)
- C. Extensible Markup Language (XML)
- D. Cascading Style Sheets (CSS)

Answer: C
