1. Which of the following steps may be necessary when adding a new device to a Linux machine?
A. Copy the device driver to the device driver directory.
B. Add a module.
C. Insert the device into the Linux system, and allow the system to choose the device files from its device directory.
D. Insert the CD-ROM with the device driver into the machine; Linux will detect it and prompt you through installation.
Answer: B

2. Bjorn is installing a Linux system and needs to change the IP address. He uses the ifconfig command to change the address, but he notices that it reverts back to the original address when he reboots the system. Why does the address revert after Bjorn has changed it?
A. The ifconfig command is used to change the broadcast address only.
B. The ifconfig command is not permanent; it changes parameters only for the current session.
C. The ifconfig command is used to change the default subnet mask only.
D. The ifconfig command syntax has been changed to ipconfig for Linux systems.
Answer: B

3. Which of the following is a characteristic of the linuxconf program?
A. It can be used to install device drivers and is used only on remote systems.
B. It is a command line-driven program with no GUI interface.
C. It can be used to configure a system host name and IP address.
D. It can be used to install new applications.
Answer: C

4. Armine is looking for information on her network card. She enters the dmesg command in Linux, but the output fills several text screens. Which additional command can Armine use to obtain only the information she wants?
A. get
B. | grep
C. -a
D. chmod
Answer: B

5. Jonas is a Linux administrator. He learns from a user that it takes an unusually long time to receive a response from another host system. Which command can Jonas enter to discover how many hops exist from the user's system to the target host system?
A. traceroute
B. tracert
C. ifconfig
D. chmod
Answer: A

6. Korin is a user on a Linux-based network. She notices that a non-root user named jonas has been accessing a file called Reports, in which she keeps proprietary company information. Korin owns the file. Which command should she enter to secure the Reports file from other users?
A. chmod 700 Reports
B. chmod 007 Reports
C. chmod 000 Reports
D. chmod 444 Reports
Answer: A

7. Luis is the administrator for a Linux system. He is told that Rita needs ownership of the job file. Which command should Luis enter to grant ownership of the file to Rita?
A. chown rita jobfile
B. chmod rita jobfile
C. cp rita jobfile
D. chgrp jobfile rita
Answer: A

8. Rita is a Linux administrator at a new job. Her new boss tells her to ensure that all of the passwords on the Linux system are secure. Which action should Rita perform first to ensure password security?
A. Implement a strong password policy by editing the /etc/shadow file.
B. Verify that passwords are being stored in a password shadow file.
