1T6-521

Network-General

Application Performance Analysis and Troubleshooting

<http://www.ipass4sure.com/exams.asp?examcode=1T6-521>

The 1T6-521 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 1T6-521 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 1T6-521 exam is very challenging, but with our 1T6-521 questions and answers practice exam, you can feel confident in obtaining your success on the 1T6-521 exam on your FIRST TRY!

Network-General 1T6-521 Exam Features

- Detailed questions and answers for 1T6-521 exam
- Try a demo before buying any Network-General exam
- 1T6-521 questions and answers, updated regularly
- Verified 1T6-521 answers by Experts and bear almost 100% accuracy
- 1T6-521 tested and verified before publishing
- 1T6-521 examcollection vce questions with exhibits
- 1T6-521 same questions as real exam with multiple choice options

Acquiring Network-General certifications are becoming a huge task in the field of I.T. More over these exams like 1T6-521 exam are now continuously updating and accepting this challenge is itself a task. This 1T6-521 test is an important part of Network-General certifications. We have the resources to prepare you for this. The 1T6-521 exam is essential and core part of Network-General certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 1T6-521 Test and save time and money while developing your skills to pass your Network-General 1T6-521 Exam? Let us help you climb that ladder of success and pass your 1T6-521 r

QUESTION: 1

One component in an application turn is _____.

- A. Server response time
- B. Network process time
- C. Application response time
- D. Client acknowledgement time

Answer: A

QUESTION: 2

When creating a filter in the Sniffer to select only the traffic to or from the client for a particular conversation, the best approach is to focus on a _____.

- A. TCP well known port number
- B. TCP unknown port number
- C. TCP ephemeral port number
- D. TCP port number in the range 512-1024

Answer: C

QUESTION: 3

When using Application Intelligence, Server Time may be defined as _____.

- A. The total time required to send a request and receive a response
- B. The total time packets are on the network for a particular flow
- C. The total time it takes for a packet to travel from client to server based on TCP handshakes
- D. The net time for the server to respond to a client request

Answer: D

QUESTION: 4

A large Window size used by a client could cause _____.

- A. The server to consume more resources
- B. Increased number of ACKs to be sent
- C. Increased delay when frames are lost
- D. None of the above

Answer: D

QUESTION: 5

_____ is the amount of time, based on the engineering of the network, to complete a task.

- A. Throughput

- B. Delay
- C. Access time
- D. Latency

Answer: B

QUESTION: 6

_____ is a protocol used to perform Control and Signaling functions in a VoIP conversation.

- A. Session Initiation Protocol
- B. Real-Time Streaming Protocol
- C. Cisco Skinny Client Control Protocol
- D. All of the above

Answer: D

QUESTION: 7

When reviewing trace data in a multi-tier application, application server requests can be associated with database responses using _____.

- A. TCP port numbers
- B. Request ID
- C. Raw data in the database response
- D. Formatted data in the application response

Answer: A

QUESTION: 8

An application that is sensitive to Jitter is primarily sensitive to _____.

- A. Network congestion
- B. Bandwidth latency
- C. Distance latency
- D. Application turns

Answer: A

QUESTION: 9

What does a Window value of 8760 in a TCP header mean?

- A. The sender is confirming the 8760 bytes have been sent
- B. The sender has 8760 bytes in its buffer
- C. The sender has received a total of 8760 bytes
- D. The sender has buffer space for 8760 more bytes

Answer: D

QUESTION: 10

The TCP 4-way handshake is used to _____.

- A. Indicate the start of a flow of data
- B. Identify the client request parameters
- C. End a connection
- D. Establish a connection

Answer: C

QUESTION: 11

When using Application Intelligence, End-to-End Response Time may be defined as _____.

- A. The total time required to send a request and receive a response
- B. The total time packets are on the network for a particular flow
- C. The total time it takes for a packet to travel from client to server based on TCP handshakes
- D. The net time for the server to respond to a client request

Answer: A

QUESTION: 12

To accurately calculate _____ we must know the slowest link speed in the path between client and server

- A. Distance latency
- B. Congestion delay
- C. Bandwidth latency
- D. Round-trip time

Answer: C

QUESTION: 13

The image below is a view of the Sniffer Summary window. How many application turns are shown?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
