Citrix

Citrix Access Suite 4.0: Analysis

<http://www.ipass4sure.com/exams.asp?examcode=1Y0-613>

The 1Y0-613 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 1Y0-613 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 1Y0-613 exam is very challenging, but with our 1Y0-613 questions and answers practice exam, you can feel confident in obtaining your success on the 1Y0-613 exam on your FIRST TRY!

Citrix 1Y0-613 Exam Features

- Detailed questions and answers for 1Y0-613 exam
- Try a demo before buying any Citrix exam
- 1Y0-613 questions and answers, updated regularly
- Verified 1Y0-613 answers by Experts and bear almost 100% accuracy
- 1Y0-613 tested and verified before publishing
- 1Y0-613 examcollection vce questions with exhibits
- 1Y0-613 same questions as real exam with multiple choice options

Acquiring Citrix certifications are becoming a huge task in the field of I.T. More over these exams like 1Y0-613 exam are now continuously updating and accepting this challenge is itself a task. This 1Y0-613 test is an important part of Citrix certifications. We have the resources to prepare you for this. The 1Y0-613 exam is essential and core part of Citrix certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 1Y0-613 Test and save time and money while developing your skills to pass your Citrix 1Y0-613 Exam? Let us help you climb that ladder of success and pass your 1Y0-613 now!

QUESTION 1

Scenario: An equipment manufacturing company has engaged your team to assess its Presentation Server environment. All applications are loaded on all servers, and Certkiller .com wants to implement Zone Preference and Failover to ensure redundancy. If you feel this is feasible, they will implement three Zone Preference and Failover rules, each listing the site with the highest bandwidth as the primary failover and the other site as the backup failover.

Examine the exhibits to view Certkiller .com's current environment.

The accessed text-based application uses an average of 5 Kbps. Can all of the users from any or all single location successfully failover to another location if both Presentation Servers in the users home zone failed?

City	# of Servers	Con-current Users	Unused Bandwidth
Miami	2	30	→Mexico City: 192 Kbps →Sao Paulo: 128 Kbps
Mexico City	2	30	→Miami: 192 Kbps →Sao Paulo: 64 Kbps
Sao Paulo	2	30	→Miami: 128 Kbps →Mexico City: 64 Kbps

1Y0-613

- A. No, only Miami and Mexico City can support the proposed failover configuration.
- B. Yes, all locations can successfully support the proposed failover configuration.
- C. No, none of the locations can successfully support the proposed failover configuration.
- D. No, only Miami can support the proposed failover configuration.

Answer: A

QUESTION 2

Scenario: Certkiller .com asked you to assess their access strategy, with focus on their remote access solution. All issues reported relating to remote access have been traced back to network connections or user permissions.

Examine the exhibit to view the current configuration of this environment.

Based on the exhibit, what is your assessment of their implementation?

- A. The current configuration is adequate.
- B. Additional Web Interface redundancy should be deployed
- C. Additional Secure Gateway redundancy should be deployed
- D. Web Interface should be moved to the internal network.

Answer: A

QUESTION 3

Scenario: In an environment in which you are assessing the Citrix Access Suite implementation, all the Citrix servers are assigned static IP addresses, and on more than one occasion, administrators have accidentally re-assigned an IP address, causing duplicate IP assignments. What should you recommend to avoid this problem in the future?

- A. A centralized repository should be created to track IP addresses. Alternatively, DHCP reserved addresses could be used.
- B. Dynamic DHCP addresses should be used to ensure that servers always have a valid IP address.
- C. Administrators should first release the IP address to be used before re-assigning it.
- D. Administrators should ping the new IP address before assigning it to a server.

Answer: A

QUESTION 4

Scenario: A mobile phone company Certkiller .com has Citrix Presentation Server 4.0 implemented in its environment. The CIO has mandated that no single points of failure exist within the environment.

Certkiller .com has hired you to assess their Citrix environment. Which two statements explain why the installation of another license server, which will not be clustered, is not necessary? (Choose two.)

- A. The addition of another license server will increase IT workload.
- B. The addition of another license server will provide for load balancing. Presentation Servers will have the option to connect to the least busy license server or the license server closest to them.
- C. The addition of another license server will reduce current network bandwidth.
- D. The addition of another license server does not address the requirement because two license servers cannot share the same license file.
- E. The addition of another license server will not help Certkiller .com because Presentation Server users will still be able to connect for up to 30 days after connection is lost to the license server.

Answer: D,E

QUESTION 5

Scenario: An airline company has been using Citrix products for approximately six years. Recently, Certkiller .com upgraded their environment from Citrix Access Suite 3.0 to Citrix Access Suite 4.0.

The IT staff is not certified on Access Gateway Advanced Edition. They recently implemented Access Gateway Advanced Edition in Access Gateway stand-alone mode. The CIO has been mounting pressure on the IT Team to implement a lot of new security measure offered by their competitors in the aviation industry.

The CIO wants two-factor authentication implemented, which requires users to login using their Active Directory accounts; he has also asked for some other form of advanced authentication tools. The single point of entry to the Citrix environment must be through Access Gateway Advanced Edition. Browser only access, file type association and download should be allowed to users based on their access scenario. The IT staff also wants to implement more services that will enhance productivity for both IT member and other employees.

Based on the current setup of this environment, what would you recommend a better implementation to the CIO of this airline?

- A. Implement Access Gateway Advanced Edition in VPN mode by integrating the Access Gateway appliance with Advanced Access Control servers.
- B. Implement Active Directory policies for users connecting through the Access Gateway appliance

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
