Question: 1
While using the Embedded Application CDA containing Microsoft Word, a user decides to save the open .DOC file as an HTML file.
For help with this task, the user should click _____.

A. The Help button in Microsoft Word
B. The Help button in the title bar of the CDA window
C. The Settings button in the title bar of the CDA window
D. The Help button at the top-right corner of the access center

Answer: A

Question: 2
How does the Citrix Index Server join the access server farm?

A. During setup, the administrator specifies the server farm that the Index Server must join.
B. After installation, administrators must specify the Index Server base port in the Access Server Farm Properties.
C. After installation, administrators must add the Index Server manually to the farm using the Access Management Console.
D. After installation, the administrator must add the Index Server manually to the farm using the Service Configuration Wizard.

Answer: A

Question: 3
Which option should be selected to trigger indexing of a website to begin as soon as the Indexed Web Properties dialog box is closed?

A. Autoindex
B. Follow redirection
C. Queue for Indexing
D. Check for changes at regular intervals

Answer: C
Page 214 of Citrix Course 1301BB

Question: 4
Before installing Citrix Index Server, _____.

A. rolemust be created.
B. anaccess center must be created.
C. anaccess server farm must be created.
D. theCitrix Search Administrator group must be created.

Answer: C
Page 40 of Citrix Course 1301BB

Question: 5
The indexing server search engine will return folder index content links to a user only if that user has permission to access that content.
Which access control mechanism does the index server search engine use to accomplish this?

A. Checking the files configured in the access center user's primary role with each file that is indexed.
B. Checking the files configured in the SearchCDA'sAdvanced Configuration Wizard with each file that is indexed.
C. Checking the access center user's logged-on credentials against the ACL associated with each file that is indexed.
D. Checking the access center user's logged-on credentials against the index server search engine service account credentials.

Answer: C
Page 217 of Citrix Course 1301BB

Question: 6
What is the first thing that should be checked after setting up a file index?

A. The application event log in event viewer should be checked for errors.
B. The properties for the file index should be checked from the Access Management Console.
C. Thenfe_httpfeth.logfile should be checked to make sure that the web indexes are working.
D. Thenfe_autoindexer.logfile should be checked to make sure that the file indexes are working.

Answer: D

Question: 7
What happens if you select both the "Follow Redirection" and "Stay on the site specified in the starting point URL" configuration options from the Indexed Web Site Properties dialog?

A. A.Nothing will be indexed, since these options aremautuallyexclusive.
B. B.All links will be followed, but only those links that fall under the starting URL site will be indexed.
C. C.An error is displayed at the management console, since these two options arematuallyexclusive.
D. D.All sites that fall outside of the starting URL will be indexed because the Follow Redirection setting takes precedence.

Answer: B
AccessCenterHelp Menu:
Follow redirection: Enables the index server to follow and index a redirected address for the Web site URL.
This option is selected by default.
Stay on the site specified in the starting point URL: Indexes documents only within the domain name for the Web site and does not include linked content from other sites. If you clear the check box, the index server indexes linked documents on other Web sites.

Question: 8
Scenario: An administrator is using the Access Management Console to manage an access server farm called "Main Access." The Agent and Web Servers for the "Main Access" access server farm are installed on the same system as the console.
What will happen if the administrator attempts to manage another access server farm from the console in the above scenario?

A. The access server farm configuration wizard will launch.
B. The administrator will bepromptedtoenter credentials for the other access server farm.
C. An error message indicating that the console must be installed remotely to access the other server farm is displayed.

D. An error message indicating that the remote access server farm must be imported into the existing access server farm to obtain access from the console.

Answer: C
Page 90 of Citrix Course 1301BB
