1Y0-A20

Citrix

Citrix XenApp 6.5 Administration

<http://www.ipass4sure.com/exams.asp?examcode=1Y0-A20>

The 1Y0-A20 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 1Y0-A20 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 1Y0-A20 exam is very challenging, but with our 1Y0-A20 questions and answers practice exam, you can feel confident in obtaining your success on the 1Y0-A20 exam on your FIRST TRY!

Citrix 1Y0-A20 Exam Features

- Detailed questions and answers for 1Y0-A20 exam
- Try a demo before buying any Citrix exam
- 1Y0-A20 questions and answers, updated regularly
- Verified 1Y0-A20 answers by Experts and bear almost 100% accuracy
- 1Y0-A20 tested and verified before publishing
- 1Y0-A20 examcollection vce questions with exhibits
- 1Y0-A20 same questions as real exam with multiple choice options

Acquiring Citrix certifications are becoming a huge task in the field of I.T. More over these exams like 1Y0-A20 exam are now continuously updating and accepting this challenge is itself a task. This 1Y0-A20 test is an important part of Citrix certifications. We have the resources to prepare you for this. The 1Y0-A20 exam is essential and core part of Citrix certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 1Y0-A20 Test and save time and money while developing your skills to pass your Citrix 1Y0-A20 Exam? Let us help you climb that ladder of success and pass your 1Y0-A20 now!

QUESTION: 1

Scenario: A XenApp administrator must recommend a database option for the new XenApp 6.5 data store. The new farm will have more than 100 XenApp servers and 500 published resources, support more than 5,000 concurrent users and have two zones separated by a WAN connection. Which two database options should be administrator recommend? (Choose two.)

- A. IBM DB2 9.7
- B. Oracle Enterprise 1.1
- C. Microsoft SQL Server 2008
- D. Microsoft SQL Server Express 2008

Answer: B, C

Explanation:

SQL Express is a free version that only supports small environments. Obviously 100 xenapp servers, 500 published applications, 5,000 concurrent users is a large environment.

QUESTION: 2

Scenario: The administrator of a small XenApp server farm has configured end-to-end encryption between the XenApp servers and user devices by setting up Access Gateway VPX. Session Reliability is enabled in the farm with default settings. Over which port will published applications be delivered?

- A. 80
- B. 443
- C. 1494
- D. 2598

Answer: B

Explanation:

I think the answer should be 443 because of the CAG vpx is set up and then all traffic is ported to 443. Also the 2598 traffic is directed to 443.

http://support.citrix.com/servlet/KbServlet/download/2389-102-654859/CitrixPorts_by_Port_1103.pdf

Next article is for CAG8 but the trafficflow is still the same. <http://support.citrix.com/article/CTX113250>

QUESTION: 3

Scenario: The administrator of a XenApp Enterprise Edition server farm is configuration Single Sign-on for the users of the farm. The Citrix license server was installed with the default vendor daemon and console Web port numbers, but NOT the default license server port number. Of the port numbers that are in use in the XenApp server farm, which one should the administrator specify for the license server during Single Sign-on configuration?

- A. 443
- B. 7279
- C. 8082
- D. 27009

Answer: D

Explanation:

v4 - updated

This is a trick question.

By default the daemon and console use ports 7279, and 8082, so answers B and C are incorrect, because you can't have 2 things using the same port. By default the license server uses 27000, and as you can see below, by default SSO uses 27000, but the question says 27000 was NOT used. Since 443 requires certificates and the question doesn't mention that, the only possible port left is 27009

License server port number is 27000
 Vendor daemon port number is 7279
 Console Web port is 8082

QUESTION: 4

In building out a new XenApp environment, an administrator places the Secure Gateway and Web Interface in the DMZ. What must the administrator do to secure the traffic to the XML Broker?

- A. Change the XML traffic port to a non-standard assignment.
- B. Use the SSL Relay tool to encrypt traffic to the XML Broker in the farm.
- C. Place the XML Broker in the DMZ and encrypt the traffic between them.
- D. Use encrypted ICA to communicate between the XML Broker and the Web Interface.

Answer: B

QUESTION: 5

An administrator needs to install a XenApp 6.5 server to act as an additional dedicated data collector. After installing XenApp on the new server, the next step is to configure it by enabling the _____.

- A. Session-host mode only
- B. Controller and Session-host modes
- C. data collector and XML Broker host mode
- D. data collector and XTE Service host mode

Answer: B

Explanation:

Only during setup you can set the setup type: select session-host only (doesn't act as a data collector) or controller and session-host. Option C&D are invalid.

**QUESTION: 6**

Scenario: An administrator manages a XenApp farm that uses Citrix Provisioning Services to automate the addition of XenApp servers to the farm. The administrator must implement a solution to automate the addition of new servers to the published resources, load evaluators, Citrix polices and load balancing policies. Which two should the administrator configure to meet the requirements of the scenario? (Choose two.)

- A. Zones
- B. Policies
- C. Worker group
- D. Load evaluators

Answer: B, C

Explanation:

A worker group is a list of xenapp servers. Rather than manually adding new servers to a published application, for example, you could simply use a worker group and when you

add a new xenapp server to a worker group, it's automatically added to any published applications that use that group.

QUESTION: 7

Which Citrix service should an administrator monitor when troubleshooting issues with Session Reliability?

- A. IMA
- B. XML
- C. XTE
- D. MFCOM

Answer: C

Explanation:

Session Reliability is performed by the XTE service
<http://support.citrix.com/article/CTX104147>

QUESTION: 8

Scenario: An administrator has finished installing the first server in a new farm and is now creating the data store. The farm will consist of five servers and needs to support about 50 users. The company wants this installation to be as cost-effective as possible. What is the best option for a database system that would support this farm effectively?

- A. Microsoft Access
- B. Microsoft SQL Server
- C. Oracle Database System
- D. Microsoft SQL Server Express

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
