1Z0-510

Oracle

Oracle ATG Web Commerce 10 Implementation Developer Essentials

The 1Z0-510 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 1Z0-510 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 1Z0-510 exam is very challenging, but with our 1Z0-510 questions and answers practice exam, you can feel confident in obtaining your success on the 1Z0-510 exam on your FIRST TRY!

Oracle 1Z0-510 Exam Features

- Detailed questions and answers for 1Z0-510 exam
- Try a demo before buying any Oracle exam
- 1Z0-510 questions and answers, updated regularly
- Verified 1Z0-510 answers by Experts and bear almost 100% accuracy
- 1Z0-510 tested and verified before publishing
- 1Z0-510 examcollection vce questions with exhibits
- 1Z0-510 same questions as real exam with multiple choice options

Acquiring Oracle certifications are becoming a huge task in the field of I.T. More over these exams like 1Z0-510 exam are now continuously updating and accepting this challenge is itself a task. This 1Z0-510 test is an important part of Oracle certifications. We have the resources to prepare you for this. The 1Z0-510 exam is essential and core part of Oracle certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 1Z0-510 Test and save time and money while developing your skills to pass your Oracle 1Z0-510 Exam? Let us help you climb that ladder of success and pass your 1Z0-510 now!

QUESTION: 1

Which two ASE tasks can be performed from the ACC but not the BCC?

- A. creating a custom product catalog
- B. creating targeters
- C. creating scenarios
- D. creating slots
- E. creating products and SKUs

Answer: C, D

Explanation:

Scenarios, slots, and workflows are not managed through the ATG Business Control Center (BCC). To create and edit these items, use the ATG Control Center (ACC)

D: You can create slot components in two ways: By manually creating a .properties file Through the slot wizard in the ACC.

Note ACC:ATG Control Center.

Note BCC: The ATG Business Control Center is a browser-based interface that you use to create and edit many of the elements required to set up and maintain an ATG-based Web site

QUESTION: 2

Which three reasons justify why customers should choose Oracle ATG Web Commerce as their cross channel commerce platform?

- A. It is the most complete and integrated e-commerce solution in the market.
- B. It has the most flexible, modular, and elegant architecture compared to other competing solutions.
- C. It features production-ready reference applications that can be easily customized to meet your application requirements.
- D. It is the easiest platform to implement a compared e-commerce solution in the market.
- E. It has the best online merchandising business tools and applications of all competing solutions.

Answer: A, B, D

Explanation:

A: To further enhance the customer experience, Oracle offers an integrated set of

software-as-a-service (SaaS) commerce services that provide the flexibility and intelligence to target the right visitors at the right time with the right offer in the right channel to drive high-value sales. Through these services, your company can engage with customers at the point of interaction through personalized recommendations, targeted promotions, and guided assistance.

B: Because it's built on a flexible, component-based e-commerce software architecture, ATG Web Commerce is an easily implemented best-in-class commerce solution that increases revenue, improves customer service, helps companies achieve maximum, long-term business growth, and is available as either a licensed solution or hosted on-demand solution.

D: Oracle's ATG Web Commerce Applications

Oracle's ATG Web Commerce is the industry's top-ranked commerce solution that powers the world's best brands, and delivers a consistent, personalized cross-channel customer experience. ATG Web Commerce offers a complete commerce software platform that enables you to deliver a personalized customer buying experience across all customer touchpoints, including the web, contact center, mobile devices, social media, physical stores, and more.

QUESTION: 3

What is the role of the allocateItemRelQuantity chain?

- A. to mark Shipping group as shipped
- B. to purchase items from pre-order, back order, or regular stock using inventory
- C. to reorganize Items across shipping groups
- D. to allocate items related to the quantity on hand

Answer: B

Explanation:

Note: The allocateItemRelQuantity chain is executed when called by the allocateItemRelationship chain.

allocateItemRelQuantityChain

This processor executes the allocateItemRelQuantity chain. After execution, execution of this chain then stops.

Transactional mode: TX_MANDATORY

Nucleus

component:

/atg/commerce/fulfillment/processor/AllocateItemRelQuantityChain

PipelineProcessor object: atg.commerce.pricing.processor.ProcSendScenarioEvent

Transitions: None. This is the last link in the chain and causes the PipelineManager to return to the caller.

QUESTION: 4

How many current and saved orders does ATG allow a user profile to have?

- A. ATG allows one current order and one saved order per user profile.
- B. ATG allows one current order and a collection of saved orders per user profile.
- C. ATG allows multiple current orders and a collection of saved orders per user profile.
- D. Only one order can exist for a Give user profile in ATG. There is no support for saved orders.

Answer: B

Explanation:

Note: loadShoppingCarts

```
public void loadShoppingCarts(RepositoryItem pProfile, OrderHolder
pShoppingCart)
```

throws CommerceException

Parameters:

pProfile - the user profile

pShoppingCart - the OrderHolder component for this user

Throws:

CommerceException - is any errors occur while loading the shopping carts

This method finds all the shopping carts for the user and places them into the session-scope OrderHolder component. "Shopping Carts" are defined to be orders whose state is INCOMPLETE. The orders are sorted by last activity date, and the last order touched is made the current order. This method will optionally merge the current shopping cart for the session (from the OrderHolder.current property) with the first persistent order loaded from the database. This functionality is toggled through the mergeOrders property of this form handler. NOTE: This method used to acquire a transaction lock, but we've found deadlock issues and have decided to remove the locks. See bug 146012. This method now performs its actions without a lock.

QUESTION: 5

What is the reanimated order?

- A. INCOMPLETE orders that have not been checked out by customers and instead have remained idle for a duration of time
- B. Previously abandoned orders that have since been modified by the customer in some way, such as adding items or changing item quantities.
- C. Previously abandoned orders that have been successfully checked out by the customer.
- D. Abandoned orders that have been abandoned for so long that reanimation of the order is no longer considered realistic.

Answer: B

Explanation:

Reanimated orders– Previously abandoned orders that have since been modified by the customer in some way, such as adding items or changing item quantities.

QUESTION: 6

You are creating a primary table and an auxiliary table for an Item descriptor in the versioned schema. What are the properties that must be added to the tables?

- A. You only need to add asset_version to both the tables.
- B. You need to add asset_version to both the tables.inaddition, the primary table required seven other columns, such as version_editable, version_deleted, etc.
- C. You need to add asset_version to both the tables.inaddition, the auxiliary table requires seven other columns, such as version_editable, version_deleted, etc.
- D. You need to add asset_version and seven other columns, such as version_editable, version deleted to both the tables.
- E. You need to add asset, version to the primary table and seven columns, such asversion_editable,version deleted, etc. to the auxiliary tables.
- F. You need to add seven columns, such as version_editable, version deleted, etc. to the primary table and only asset_version to the auxiliary table.

Answer: B

Explanation:

Create and Install the Versioned Database Schema In order to store asset version metadata, the asset management server's database schema requires additional columns for the primary tables used by your application's repositories, and additional tables to store versioning information. Create the Versioned Schema To modify the asset management server's database schema to store versioning data, follow these steps:

1. Copy each database DDL file that you plan to modify.
2. Add the following columns to every table that represents a primary table for an item descriptor:

```
asset_version INT NOT NULL workspace_id VARCHAR(40) NOT NULL
branch_id VARCHAR(40) NOT NULL is_head NUMERIC(1) NOT NULL
version_deleted NUMERIC(1) NOT NULL version_editable NUMERIC(1) NOT
NULL pred_version INT NULL
checkin_date TIMESTAMP NULL
```

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
