1Z0-546

Oracle

StorageTek Tape Libraries Essentials

<http://www.ipass4sure.com/exams.asp?examcode=1Z0-546>

The 1Z0-546 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 1Z0-546 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 1Z0-546 exam is very challenging, but with our 1Z0-546 questions and answers practice exam, you can feel confident in obtaining your success on the 1Z0-546 exam on your FIRST TRY!

Oracle 1Z0-546 Exam Features

- Detailed questions and answers for 1Z0-546 exam
- Try a demo before buying any Oracle exam
- 1Z0-546 questions and answers, updated regularly
- Verified 1Z0-546 answers by Experts and bear almost 100% accuracy
- 1Z0-546 tested and verified before publishing
- 1Z0-546 examcollection vce questions with exhibits
- 1Z0-546 same questions as real exam with multiple choice options

Acquiring Oracle certifications are becoming a huge task in the field of I.T. More over these exams like 1Z0-546 exam are now continuously updating and accepting this challenge is itself a task. This 1Z0-546 test is an important part of Oracle certifications. We have the resources to prepare you for this. The 1Z0-546 exam is essential and core part of Oracle certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 1Z0-546 Test and save time and money while developing your skills to pass your Oracle 1Z0-546 Exam? Let us help you climb that ladder of success and pass your 1Z0-546 now!

QUESTION: 1

Which of the items are reports available from SLC regarding partitioning on an SL500?

- A. Cartridge Cell and Media Summary
- B. Host Connections Summary
- C. Orphaned Cartridge Report
- D. Partition Summary
- E. Partition Details
- F. All of the above

Answer: F

Explanation:

Partitions—Reports include:

Partitions—Reports—Cartridge Cell and Media Summary

Partitions—Reports—Host Connections Summary

Partitions—Reports—Orphaned Cartridge Report

Partitions—Reports—Partition Details

Partitions—Reports—Partition Summary

Reference:

StorageTek SL500 Modular Library System, Partition Report Screens

QUESTION: 2

What ACSLS command would change a cap priority?

- A. set cap priority 5 0, 0, 1
- B. define cap priority 5 0,0,1
- C. change cap priority 5 0, 0, 1
- D. lock cap priority 5 0, 0, 1

Answer: A

Explanation:

A: The set cap priority command sets a CAP's automatic selection priority. Format set cap priority cap_priority cap_id

Reference:

StorageTek ACSLS, Automated Cartridge System Library Software , set cap priority

QUESTION: 3

Using ACSLS, how would you delete a tape pool?

- A. Set scr off and delete the pool
- B. Remove all data tapes and delete the pool
- C. Delete pool 0 and all empty pools will delete automatically
- D. Remove all volumes from the pool and then delete it

Answer: A

Explanation:

Use the delete pool command to delete empty scratch pools. If a pool contains scratch cartridges, you must reassign these cartridges to another pool before deleting the first pool. If a scratch cartridge is mounted, it becomes a data cartridge but remains in its scratch pool. Use the set scratch off command to reassign the data cartridge to the common pool.

Reference:

StorageTek ACSLS, Automated Cartridge System Library Software , delete pool

QUESTION: 4

Which connectivity option is available only in an SL8500 library complex?

- A. single TCP/IP connectivity
- B. dual TCP/IP connectivity
- C. multi TCP/IP connectivity

Answer: B

Explanation:

The SL8500 library uses TCP/IP protocol over an Ethernet physical interface to manage and communicate with the library. This interface enables both enterprise-level (HSC) and open system platforms (ACSL) to connect to and communicate with the SL8500. There are two separate Ethernet connections on the HBC card for host to library communications—Ports 2A and 2B.

* Port 2A provides the Dual TCP/IP host connection—this is an optional feature for

SL8500 libraries..

* Port 2B provides the primary connection for host communications—this is the standard connection for SL8500 libraries.

QUESTION: 5

Where are the messages written when a pool gets below the low water mark?

- A. acsss_event.log
- B. pool_error.log
- C. hardware_event.log
- D. Doesn't write an error message

Answer: A**Explanation:**

low_water_mark is the low volume warning threshold. If the scratch cartridge count falls below this threshold, ACSLS logs a warning message in the event log. Valid values are 0 to 231-1. The default is 0. Note: The ACSLS event log is the first stop for useful information in the event of problems with your library operation. This log contains information about library events, status changes, and errors. All sub-components within ACSLS will report events to the acsss_event.log by sending messages to a process called the event logger. The standard event log, which is automatically created when ACSLS is installed, is contained in the file \$ACS_HOME/log/acsss_event.log and where \$ACS_HOME is usually /export/home/ACSSS/.

QUESTION: 6

On the SL8500, which is the best option when combining workloads that span more than one rail?

- A. using the middle two rails for active enters and ejects
- B. using rails that are adjacent to each other within the same SL8500
- C. using the top rail for extra archival space and any other rail for active data
- D. using the top rail for active enters and ejects and any other rail for archival space

Answer: C**Explanation:**

If you are not able to assign workloads to a single rail, consider:

- * Using rails that are adjacent to each other. This provides a shorter distance for the pass-thru operation.
- * Combining rails vertically rather than horizontally

QUESTION: 7

The System Detail SLC screen displays health indicators for which four devices in an SL3000?

- A. Rotational and AFM CAPs
- B. Drives
- C. Media
- D. Power supplies
- E. Robot(s)

Answer: A, B, D, E

Explanation:

The SL Console screen displays health indicators for each of the following devices:

- *Library
- * Rotational and AEM CAPs (A)
- * Drives (B)
- * Power supplies (D)
- * Robot(s) (E)
- * AEM safety doors

Please reference the figure below.

QUESTION: 8

Which four statements are true for an SL8500?

- A. Partitioned LSMs will not recognize other LSMs, within the library unless they are in the same partition.
- B. The elevator operation is under the control of the library controller when CAP operations are issued.
- C. CAPS can either be shared or dedicated resources for partitions.
- D. All drives, storage slots, and cartridges within a partition are solely owned by that host or host group.
- E. While duplicate VOLSERS are supported by the library, ACSLS does not support duplicate VOLSRs unless they are in different partitions and the duplicate VOLSERS are on different ACLs servers.

Answer: B, C, D, E

Explanation:

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
