**QUESTION: 2**

You want to display a new field of sensitive data to display salary information. Which security policy controls access to the field displayed by the component?

- A. Function Security Policy
- B. ADF Security expression language
- C. Data Security Polity
- D. Oracle Platform Security Policy

**Answer: C**

**Explanation:**

Functions and data are inaccessible to users unless they are provisioned with the roles necessary to gain access. Function security provides users with access to pages in application users interfaces and actions that can be performed there. Data security allows users to see data in those pages. Some data is not secured, in which case access to a user interface page gives unrestricted access to the data that is accessible from that page.
