Answer: B

Question: 6

Exam Name:	CompTIA A+ Essentials		
Exam Type:	CompTIA		
Exam Code:	220-701	Total Questions:	916

You are an IT professional in an international company. During your working hours, a client calls you and states that there is something wrong with his computer. As an experienced technician, you immediately know what the problem is after the client describes several symptoms. Under that circumstance, what is your next step to take so as to solve the problem?

- A. Verify full system functionality.
- B. Document findings, actions and outcomes.
- C. Establish a plan of action and implement the solution.
- D. Ask the user opened ended questions to see if they agree with the cause.

Answer: C

Question: 7

Which of the following is not a requirement for ACPI to function?

- A. The BIOS must support ACPI.
- B. You must be running Windows 95 or later.
- C. The motherboard must support ACPI.
- D. The processor must support ACPI.

Answer: B

Question: 8

The Windows Advanced Options Menu provides some alternative ways of running Windows when it won't start up normally. To display this menu, you need to power off your computer and then restart it. What is the appropriate step to take so as to enter this menu?

- A. Edit the config.sys file that is located on the root directory.
- B. Press F8 after POST but before Windows begins to load.
- C. Midway through Windows loading, power cycle the system.
- D. Enter System Configuration Utility and select Startup Menu.

Answer: B

Question: 9
