- C. check the policy and validate the date and time it was last updated
- D. check to see whether the policy was loaded under System > Servers > Events

**Answer: D**

**QUESTION: 2**

An administrator is running a Discover Scanner target scan and the scanner is unable to communicate back to the Discover Server. Where will the files be stored?

- A. Discover Server incoming folder
- B. scanner's outgoing folder
- C. scanner's incoming folder
- D. Enforce incident persister

**Answer: B**

**QUESTION: 3**

Which two remediation actions are available for Network Protect? (Select two.)

- A. Copy
- B. Move
- C. Block
- D. Rename
- E. Quarantine

**Answer: A, E**

**QUESTION: 4**

A company needs to scan all of its file shares on a weekly basis to make sure sensitive data is being stored correctly. The total volume of data on the file servers is greater than 1 TB. Which approach will allow the company to quickly scan all of this data on a weekly basis?

- A. run an initial complete scan of all the file shares, then modify the scan target to add date filters and exclude any files created or modified before the initial scan was run
- B. run an initial complete scan of all the file shares, then modify the scan target to an incremental scan type
- C. create a separate scan target for each file share and exclude files accessed before the start of each scan
- D. run an initial complete scan of all file shares, create a summary report of all incidents created by the scan, then run weekly scans and compare incidents from weekly scans to incidents from the complete scan

**Answer: B**

**QUESTION: 5**

Which Network Discover option is used to determine whether confidential data exists without having to scan the entire target?

- A. Byte Throttling
- B. File Throttling
- C. Match Thresholds
- D. Inventory Mode Scanning

**Answer: D**

**QUESTION: 6**

A Data Loss Prevention administrator notices that several errors occurred during a Network Discover scan. Which report can the administrator use to determine exactly which errors occurred and when?

- A. Discover Incident report sorted by target name and scan
- B. Full Activity report for that particular scan
- C. Server Event report from Server Overview
- D. Full Statistics report for that particular scan

**Answer:** B

**QUESTION:** 7

What must a policy manager do when working with Exact Data Matching (EDM) indexes?

- A. re-index large data sources on a daily or weekly basis
- B. index the original data source on the detection server
- C. deploy the index only to specific detection servers
- D. create a new data profile if data source schema changes

**Answer:** D

**QUESTION:** 8

Which two policy management actions can result in a reduced number of incidents for a given traffic flow? (Select two.)

- A. adding additional component matching to the rule
- B. adding data owner exceptions
- C. deploying to additional detection servers
