310-052

Sun
Sun Certified Enterprise Architect for J2EE 5

http://www.ipass4sure.com/exams.asp?examcode=310-052

The 310-052 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 310-052 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 310-052 exam is very challenging, but with our 310-052 questions and answers practice exam, you can feel confident in obtaining your success on the 310-052 exam on your FIRST TRY!

Sun 310-052 Exam Features

  - Detailed questions and answers for 310-052 exam
  - Try a demo before buying any Sun exam
  - 310-052 questions and answers, updated regularly
  - Verified 310-052 answers by Experts and bear almost 100% accuracy
  - 310-052 tested and verified before publishing
  - 310-052 examcollection vce questions with exhibits
  - 310-052 same questions as real exam with multiple choice options

Acquiring Sun certifications are becoming a huge task in the field of I.T. More over these exams like 310-052 exam are now continuously updating and accepting this challenge is itself a task. This 310-052 test is an important part of Sun certifications. We have the resources to prepare you for this. The 310-052 exam is essential and core part of Sun certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 310-052 Test and save time and money while developing your skills to pass your Sun 310-052 Exam? Let us help you climb that ladder of success and pass your 310-052 now!

QUESTION: 1
What are the three primary roles in a web service interaction? (Choose three.)

A. Broker
B. Facade
C. Provider
D. Decorator
E. Requestor
F. Interceptor

Answer: A,C,E

QUESTION: 2
A stock trading company is writing a new application for stock market forecasting. A significant portion of the work required by the business logic involves navigating through the persistent object model. As lead architect on this project, you have chosen JPA over EJB2 entity beans to implement these persistent objects. You have done this to maximize performance when navigating through the model. Why does JPA offer better performance for this task?

A. JPA guarantees referential integrity at the object level.
B. JPA allows the application to specify lazy or eager retrievals.
C. JPA simplifies the source code that implements the object model.
D. The guaranteed referential integrity in EJB2 entity beans is expensive.

Answer: B

QUESTION: 3
A developer creates a Java web service to be used by consumers in an SOA. This SOA uses a UDDI service registry. How can the developer make the new service available to consumers?

A. deploy to the registry using JAXR
B. publish to the registry using JAXR
C. query the registry using JAX-RPC
D. target the registry using JAX-RPC

Answer: B

QUESTION: 4
With the release of a new product line, there has been a significant increase in the volume of transactions on your web site. You need to scale your application and manage session failover. What is the best option for scalability?

A. add additional web servers and application servers
B. introduce a High Availability pair and utilize sticky sessions
C. add additional application servers and implement DNS round robin
D. add additional application servers and use clustered HttpSession

Answer: D

QUESTION: 5
You are asked to architect an SOA solution that leverages Java web services. The architecture needs to be flexible and allow for the SOAP 1.1, SOAP 1.2, and REST implementations. Which Java EE technology should you use?

A. JAXP
B. JAXB
C. JAX-WS
D. JAX-RPC

Answer: C

QUESTION: 6
You are architecting an online ordering application with these requirements:
Users access the system over the Internet using HTML.
An email message is sent to the user confirming the order.
Users must log in and are validated using LDAP.
The product catalog is stored in a relational database.
All orders are logged to the internal fulfillment system.
Orders must not be lost.
Which Java EE technology should be used to send orders to the fulfillment system?

A. JNDI

B. JMS
C. JAX-WS
D. RMI-IIOP

Answer: B

QUESTION: 7
An online sporting goods store's web application uses HTTPSession to store shopping carts. When the application is initially deployed, the business plan predicts only a few customers will access the site. Over time, the store projects a steady increase in volume.The deployment plan calls for a single web container in the initial deployment. As demand increases, the plan calls for multiple web containers on separate hardware with clustered HTTPSession objects.Which two principles will help the application meet the requirements and optimize performance? (Choose two.)

A. The application should store as much as possible in HTTPSession objects.
B. The application should NOT make frequent updates to HTTPSession objects.
C. The application should make coarse-grained updates to HTTPSession objects.
D. The application should create new HTTPSession objects instead of updating existing objects.

Answer: B,C

QUESTION: 8
You are writing a utility that searches for existing web services provided by large companies through UDDI. Your web site allows the user to input search criteria using event-driven, state-managed GUI screens, performs the search, and displays them in a formatted HTML page. Which technologies would you use for this application?

A. JSP and JAXB
B. JSF and JAXR
C. JSF and JAX-WS
D. JSP and JAX-WS

Answer: B

QUESTION: 9
A company has a web service that provides the most recent price for stocks, mutual funds, and commodities. The company has the only web service that allows a person to check prices on all three financial assets with one call. Its system does not store this information but sends individual calls to each of the primary vendors for an asset and then aggregates the response to the requester. The company has committed to support a non-functional requirement (NFR) for performance that states it must process all requests within three seconds and each of the three vendors is obligated to support the NFR as dictated by the company. Where, in the message flow, is it appropriate to measure whether all the NFRs are met?

A. when a request is received and a response is sent to the requester
B. when a request is received, first call to vendor, last response from vendors, response is sent to a requester
C. when a requester sends a request, the request is received, each call to vendor, each response from vendor, requester receives response
D. when a request is received, each call to vendor, each response from a vendor, a response is sent to a requester

Answer: D

QUESTION: 10
A Java web component, EJB component, or another web service can be a client to a web service. Which Java API can the client use to access the web service through a Service Endpoint Interface?

A. JAXB
B. JAXR
C. JDBC
D. JAX-WS

Answer: D

QUESTION: 11
Which three are parts of a SOAP message? (Choose three.)

A. SOAP body
B. SOAP endpoint

C. SOAP headers
D. SOAP handlers
E. SOAP attachments

Answer: A,C,E

QUESTION: 12
You are integrating with a single legacy Enterprise Information System. You are interested in the transaction management capabilities of the Java Connector Architecture. This new system needs the capability to invoke multiple operations against this single legacy system. These operations succeed together or fail together as a group. To which minimum level of transaction management are you going to set your resource adapter?

A. No transaction
B. Local transaction
C. Distributed transaction
D. Container Managed transaction

Answer: B

QUESTION: 13
What is an advantage of XML over HTTP, as compared to SOAP over HTTP, for web services?

A. guaranteed delivery
B. more security options
C. smaller message size
D. strongly typed parameters

Answer: C

QUESTION: 14
An application needs to invoke a service on a remote system over a low latency connection, and then wait for a response. Which two are best for this type of invocation? (Choose two.)

A. JMS topic
B. JMS queue

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
