310-203

Sun

*Sun Certified System Administrator for the Solaris
10 Operating System Upgrade*

<http://www.ipass4sure.com/exams.asp?examcode=310-203>

The 310-203 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 310-203 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 310-203 exam is very challenging, but with our 310-203 questions and answers practice exam, you can feel confident in obtaining your success on the 310-203 exam on your FIRST TRY!

Sun 310-203 Exam Features

- Detailed questions and answers for 310-203 exam
- Try a demo before buying any Sun exam
- 310-203 questions and answers, updated regularly
- Verified 310-203 answers by Experts and bear almost 100% accuracy
- 310-203 tested and verified before publishing
- 310-203 examcollection vce questions with exhibits
- 310-203 same questions as real exam with multiple choice options

Acquiring Sun certifications are becoming a huge task in the field of I.T. More over these exams like 310-203 exam are now continuously updating and accepting this challenge is itself a task. This 310-203 test is an important part of Sun certifications. We have the resources to prepare you for this. The 310-203 exam is essential and core part of Sun certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 310-203 Test and save time and money while developing your skills to pass your Sun 310-203 Exam? Let us help you climb that ladder of success and pass your 310-203 now!

QUESTION: 1

A security administrator has a requirement to deploy the Solaris Security Toolkit onto all Solaris servers in the department. In this environment, there are a variety of platforms and operating system versions deployed. Onto which two platforms and operating system combinations can the Solaris Security Toolkit be deployed in a supported configuration? (Choose two.)

- A. x86, Solaris 2.4
- B. x64, Solaris 9
- C. x86, Solaris 10
- D. SPARC, Solaris 2.6
- E. SPARC, Solaris 8

Answer: C,E

QUESTION: 2

The company security policy now requires very detailed auditing of all actions. This includes capturing all executed commands together with their arguments and the environment variables. After activating auditing on all Solaris 10 systems, the security auditor complains about having to check the audit trail on each individual host. He asks for a central place to capture all audit trails. Using standard Solaris 10 security features, which is a solution to this problem?

- A. Configure auditd to send email with the events.
- B. Configure auditd to send the output using syslog to a central loghost.
- C. Configure auditd to store the audit trail using NFS on a central server.
- D. Configure auditd to store the audit trail using LDAP in a central directory.

Answer: C

QUESTION: 3

Which two tasks does the Key Distribution Center (KDC) perform? (Choose two.)

- A. issues service tickets
- B. authenticates services
- C. issues ticket-granting-tickets
- D. validates passwords sent in clear text
- E. provides private sessions to services

Answer: A,C

QUESTION: 4

Given: `upiter:$md5,rounds=2006$2amXesSj5$$kCF48vfPsHDjlKNXeEw7V.:12210::::::`
What is the characteristic of this `/etc/shadow` entry?

- A. User `jupiter` uses the `md5` hash, with salt `2006$2amXesSj5$`, and with the encrypted password `$kCF48vfPsHDjlKNXeEw7V`.
- B. User `jupiter` uses the `2a` hash, with 2006 iterations of the hash, with salt `2amXesSj5`, and with the encrypted password `kCF48vfPsHDjlKNXeEw7V`.
- C. User `jupiter` uses the `md5` hash, with 2006 iterations of the hash, with salt `2amXesSj5`, and with the encrypted password `kCF48vfPsHDjlKNXeEw7V`.
- D. User `jupiter` uses the `md5` hash, with 2006 iterations of the hash, with no salt, and with the encrypted password `$rQmXesSj5$$kCF48vfPsHDjlKNXeEw7V`.

Answer: C

QUESTION: 5

A security administrator is required to validate the integrity of a set of operating system files on a number of Solaris systems. The administrator decides to use the Solaris Fingerprint Database to validate configuration and data files as well as binaries and libraries. What command, available by default in Solaris 10, will help the security administrator collect the necessary information that will be used with the Solaris Fingerprint Database?

- A. `md5sum`
- B. `digest`
- C. `encrypt`
- D. `elfsign`

- E. `cryptoadm`

Answer: B

QUESTION: 6

You are configuring a new system to be used as an intranet web server. After you have installed the minimal amount of packages and patched the system, you added the appropriate web server packages (SUNWapch2r and SUNWapch2u). By default, the web server daemon will be started using UID webservd and the basic privilege set. To comply with the company's policy of least privilege, you need to minimize the privileges that the web server will have. What will you modify to specify the privileges that the web service will run with?

- A. the PRIV_DEFAULT setting in /etc/security/policy.conf
- B. the defaultpriv setting of webservd in /etc/user_attr
- C. the privileges property of the web service in the SMF repository
- D. the privs property of the web service in /etc/security/exec_attr

Answer: C

QUESTION: 7

After a recent audit, you have been requested to minimize an existing Solaris system which runs a third party database application. Which two should you do before starting to minimize the system? (Choose two.)

- A. Back up the system.
- B. Remove any unneeded patches.
- C. Install the SUNWrnet metacluster.
- D. Remove any unneeded packages.
- E. Confirm with the vendor of the database software that they support minimization.

Answer: A,E

QUESTION: 8

Click the Exhibit button.

```
# ps -fp 734
      UID  PID PPID  C  STIME  TTY  TIME  CMD
webservd 734  1    0 00:26:43 ?    0:00
/usr/apache2/bin/httpd -k start

# pcred 734
734:  e/r/suid=80  e/r/sgid=80

# ppriv -S 734
734: /usr/apache2/bin/httpd -k start
flags = <none>
E: net_privaddr,proc_fork
I: net_privaddr,proc_fork
P: net_privaddr,proc_fork
L: zone
```

You maintain a minimized and hardened web server. The exhibit shows the current credentials that the web server runs with. You receive a complaint about the fact that a newly installed webbased application does not function. This application is based on a /bin/ksh cgi-bin script. What setting prevents this cgi-bin program from working?

- A. The system might NOT have /bin/ksh installed.
- B. The server is NOT allowed to call the exec system call.
- C. The server should run with uid=0 to run cgi-bin scripts.
- D. Some of the libraries needed by /bin/ksh are NOT present in the webserver's chroot environment.

Answer: B

QUESTION: 9

One of the operators of the mainframe group was moved to the UNIX group and tasked to activate and configure password history. For every user, the last 10 passwords should be remembered in the history. In what file is the size of the password history configured?

- A. /etc/shadow
- B. /etc/pam.conf
- C. /etc/default/passwd
- D. /etc/security/policy.conf

Answer: C

QUESTION: 10

Within the context of file integrity, rules can be implemented to change the scope of the Basic Audit and Report Tool (BART) manifest. Given the rule file: /home/bert/docs *.og[dt] CHECK all IGNORE mtime Which two statements are valid? (Choose two.)

- A. All files on the system will be checked.
- B. The last modification time of all checked files will not be checked.
- C. Key words such as CHECK and IGNORE can NOT be used in a rule file.
- D. Only files with extension .ogt and .ogd in the directory /home/bert/docs will be checked.
- E. All files on the system will be checked, except for files with extensions .ogt and .ogd in the directory /home/ bert/docs.

Answer: B,D

QUESTION: 11

Solaris Auditing supports the selective logging of which two kinds of events? (Choose two.)

- A. file access by selected users
- B. access to selected files by all users
- C. selected users making outbound network connections
- D. password changes which do not meet the system password policy

Answer: A,C

QUESTION: 12

A security administrator creates a directory called prevoy with the following access control policy: \$ getfacl prevoy # file: prevoy # owner: secadm # group: secadm user::rwx group::r-x #effective:r-x mask:r-x other:r-x default:user::r-- default:user:sysadm:rw- default:group::r-- default:group:sysadm:rw- default:mask:rwx default:other:--
- Into this directory, the security administrator creates a file called secrets. The ls command reports the following for the prevoy directory and secrets file: \$ ls -ld . secrets drwxr-xr-x+ 2 secadm secadm 512 Jun 6 16:38 . -r--r-----+ 1 secadm secadm 0 Jun 6 16:38 secrets Which two actions can be successfully taken by the sysadm role? (Choose two.)

- A. The sysadm role can read the secrets file.
- B. The sysadm role can write to the secrets file.
- C. The sysadm role can remove the secrets file.
- D. The sysadm role can create new files under the prevoy directory.
- E. The sysadm role can change the Access Control Lists of the prevoy directory.

Answer: A,B

QUESTION: 13

The /etc/default/passwd file contains a number of configuration parameters that can be used to constrain the character composition of user passwords. What is one of the dangers of having password composition too tightly constrained?

- A. Password complexity rules apply only to the English alphabet.
- B. The entropy of the resulting password strings will be very high.
- C. Duplication of encrypted user password strings is much more likely.
- D. Limited password value possibilities can simplify brute force attacks.
- E. Passwords are harder to compute when using many character classes.

Answer: D

QUESTION: 14

Which two commands are part of Sun Update Connection? (Choose two.)

- A. /usr/bin/pkgadm
- B. /usr/bin/keytool
- C. /usr/sbin/smpatch
- D. /usr/sbin/patchadd
- E. /usr/bin/updatesmanager

Answer: C,E

QUESTION: 15

To harden a newly installed Solaris OS, an administrator is required to make sure that syslogd is configured to NOT accept messages from the network. Which supported method can be used to configure syslogd like this?

- A. Run `svcadm disable -t svc:/network/system-log`.
- B. Edit `/etc/default/syslogd` to set `LOG_FROM_REMOTE=NO`.
- C. Edit `/etc/rc2.d/S74syslog` to start syslogd with the `-t` option.
- D. Edit `/lib/svc/method/system-log` to set `LOG_FROM_REMOTE=NO`.

Answer: B

QUESTION: 16

Which are two advantages of the Service Management Facility compared to the `init.d` startup scripts? (Choose two.)

- A. It restarts processes if they die.
- B. It handles service dependencies.
- C. It has methods to start and stop the service.
- D. It specifies what the system should do at each run level.

Answer: A,B

QUESTION: 17

You have been asked to implement defense in depth for network access to a system, where a web server will be running on an Internet-facing network interface. Which is NOT contributing to the defense in depth?

- A. running the web server in a zone
- B. using `svcadm` to disable unused services
- C. using IP Filter to limit which network ports can be accessed from the Internet
- D. using VLANs on a single network interface instead of using multiple network interfaces
- E. using TCP wrappers to limit from which system SSH be used to connect to the system

Answer: D

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
