310-220

Sun

Sun Certified Developer for Java Web Services

<http://www.ipass4sure.com/exams.asp?examcode=310-220>

The 310-220 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 310-220 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 310-220 exam is very challenging, but with our 310-220 questions and answers practice exam, you can feel confident in obtaining your success on the 310-220 exam on your FIRST TRY!

Sun 310-220 Exam Features

- Detailed questions and answers for 310-220 exam
- Try a demo before buying any Sun exam
- 310-220 questions and answers, updated regularly
- Verified 310-220 answers by Experts and bear almost 100% accuracy
- 310-220 tested and verified before publishing
- 310-220 examcollection vce questions with exhibits
- 310-220 same questions as real exam with multiple choice options

Acquiring Sun certifications are becoming a huge task in the field of I.T. More over these exams like 310-220 exam are now continuously updating and accepting this challenge is itself a task. This 310-220 test is an important part of Sun certifications. We have the resources to prepare you for this. The 310-220 exam is essential and core part of Sun certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 310-220 Test and save time and money while developing your skills to pass your Sun 310-220 Exam? Let us help you climb that ladder of success and pass your 310-220 now!

QUESTION: 1

Which connection mode allows a JAX-RPC client to make a Web service method call and then continue processing in the same thread, without waiting for a response?

- A. call-back
- B. solicit-response
- C. request-response
- D. non-blocking RPC

Answer: D

QUESTION: 2

Which three are true about JAX-RPC Web services? (Choose three.)

- A. EJB based endpoints can use container-managed transactions.
- B. Servlet-based endpoints can use container-managed transactions.
- C. Client-initiated transactions are propagated to EJB based endpoints.
- D. EJB based endpoints can programmatically demarcate transactions.
- E. Client-initiated transactions are propagated to Servlet-based endpoints.
- F. Servlet-based endpoints can programmatically demarcate transactions.

Answer: A, D, F

QUESTION: 3

When working with EJB based endpoints, which is true?

- A. They must use JAAS.
- B. They can use message handlers.
- C. They must use message handlers.
- D. They cannot use message handlers.

Answer: B

QUESTION: 4

A developer is given a WSDL for an existing Web service. What is the correct sequence of steps that should be taken to use that Web service?

- A. parse the WSDL using JAXP, connect to the service using RMI, and then parse the XML using SAX
- B. generate stubs and interfaces using JAXM, bind to the stubs, and then call methods on the interface

- C. generate stubs and interfaces using JAX-RPC, bind to the stubs, and then call methods on the interface
- D. receive the service using RMI, parse the XML using JAXP, create Java objects using JAXR, and then return those Java objects

Answer: C

QUESTION: 5

A developer needs to write a Web service that supports user sessions that timeout after 120 seconds. Which configuration file should the developer use?

- A. web.xml
- B. server.xml
- C. ejb-jar.xml
- D. service-config.xml

Answer: A

QUESTION: 6

A developer creates an endpoint interface for an existing stateless session bean. Which is the correct mapping approach?

- A. RMI
- B. Handlers
- C. WSDL-to-Java
- D. Java-to-WSDL

Answer: D

QUESTION: 7

According to the WS-I Basic Profile 1.0a, which two messaging styles must be supported? (Choose two.)

- A. rpc-literal
- B. rpc-encoded
- C. point-to-point
- D. document-literal
- E. publish-subscribe

Answer: A, D

QUESTION: 8

Click the Task button.

Place the server-side steps involved in processing a document as part of an incoming request in the proper order on the sequence diagram.

Start of Process			End of Process			
Place here	Place here	Place here	Business logic	Place here	Place here	Validate/serialize

Steps

Disassemble	disassemble the document or pass it to the next phase
Assemble	assemble the output document from the results of applying the application business logic
Parse/validate	parse and validate the incoming document against the schema to which the document should conform
Transform	transform the document, if necessary, from the internally supported schema to the appropriate external vertical schema
Transform	transform the document, if necessary, from its conforming schema to the internally supported schema

Answer:

Place the server-side steps involved in processing a document as part of an incoming request in the proper order on the sequence diagram.

Start of Process			End of Process			
Disassemble	Assemble	Parse/validate	Business logic	Transform	Transform	Validate/serialize

Steps

Disassemble	disassemble the document or pass it to the next phase
Assemble	assemble the output document from the results of applying the application business logic
Parse/validate	parse and validate the incoming document against the schema to which the document should conform
Transform	transform the document, if necessary, from the internally supported schema to the appropriate external vertical schema
Transform	transform the document, if necessary, from its conforming schema to the internally supported schema

QUESTION: 9

Given:

```

<message name="InvalidItemID">
  <part name="ItemID" type="xsd:string"/>
</message>
<portType name="BidAmount">
  <operation name="getHighBid">
    <input message="sws:getHighBidRequest"/>
    <output message="sws:getHighBidResponse"/>
    <fault name="InvalidItemID" message="sws:InvalidItemID"/>
  </operation>
</portType>

```

Which endpoint method declaration is generated by this service?

- A. public float getHighBid(String itemID);
- B. public float getHighBid(String itemID) throws InvalidItemID;
- C. public float getHighBid(String itemID) throws RemoteException;
- D. public float getHighBid(String itemID) throws RemoteException, InvalidItemID;

Answer: D

QUESTION: 10

Click the Task button.

Place the resources and directories in their correct locations in the EJB component packaging structure.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
