310-814

Sun

Sun Certified MySQL Associate

<http://www.ipass4sure.com/exams.asp?examcode=310-814>

The 310-814 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 310-814 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 310-814 exam is very challenging, but with our 310-814 questions and answers practice exam, you can feel confident in obtaining your success on the 310-814 exam on your FIRST TRY!

Sun 310-814 Exam Features

- Detailed questions and answers for 310-814 exam
- Try a demo before buying any Sun exam
- 310-814 questions and answers, updated regularly
- Verified 310-814 answers by Experts and bear almost 100% accuracy
- 310-814 tested and verified before publishing
- 310-814 examcollection vce questions with exhibits
- 310-814 same questions as real exam with multiple choice options

Acquiring Sun certifications are becoming a huge task in the field of I.T. More over these exams like 310-814 exam are now continuously updating and accepting this challenge is itself a task. This 310-814 test is an important part of Sun certifications. We have the resources to prepare you for this. The 310-814 exam is essential and core part of Sun certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 310-814 Test and save time and money while developing your skills to pass your Sun 310-814 Exam? Let us help you climb that ladder of success and pass your 310-814 now!

QUESTION: 1

Adam works as a Database Administrator for a company. He creates a table named Students. He wants to create a new table named Class with the help of the Students table. Which of the following syntaxes will Adam use to accomplish the task?

- A. CREATE TABLE Class INSERT INTO SELECT * FROM Students;
- B. CREATE TABLE Class FROM SELECT * FROM Students;
- C. CREATE TABLE Class (SELECT * FROM Students);
- D. CREATE TABLE Class AS SELECT * FROM Students;

Answer: D

QUESTION: 2

You work as a Database Administrator for a company. The company uses MySQL as its database. You have created two tables named Employees and Departments in the database. Now, you want to display data from both tables. Which of the following actions will you perform to accomplish the task?

- A. Join
- B. Table Merge operator
- C. HAVING
- D. GROUP BY

Answer: A

QUESTION: 3

Which of the following terms is described in the statement below? "It is procedural code that is automatically executed in response to certain events on a particular table or view in a database."

- A. Data type
- B. Table
- C. Datetime data type
- D. Database trigger

Answer: D

QUESTION: 4

You work as a Database Administrator for a company. The company uses MySQL as its database development platform. You have created a table named Employees in the database. You want to display the names of the employees whose salary is more than \$5000, but you do not want to display any duplicate content. Therefore, you have written the following query:

```
SELECT emp_id, DISTINCT emp_name WHERE salary > 5000
FROM Employees;
```

Which of the following statements is true about the above query?

- A. The statement will display only unique names whose salary is more than \$5000.
- B. The UNIQUE clause should be used in place of the DISTINCT clause.
- C. The statement will give an error.
- D. The statement will display those records whose salary is more than \$5000.

Answer: C

QUESTION: 5

Fill in the blank with the appropriate word. The _____ data type defines a date that is combined with a time of day along with fractional seconds that is based on a 24-hour clock.

Answer: datetime

QUESTION: 6

You work as a Database Administrator for a company. The company uses MySQL as the database platform. You have created a table named Students in the database. The structure of the table is as follows:

```
Stu_ID NUMBER (3) PRIMARY KEY Stu_Name VARCHAR2 (25) NOT NULL Fee NUMBER
(8, 2)
```

```
Class NUMBER (5);
```

You have executed the following statement for the table "Students":

```
SELECT e.Stu_Name, m.Fee FROM Students e, Students m WHERE e.Stu_ID = m.stu_ID;
```

Which of the following join types have you used in the above statement?

- A. Cross join
- B. Equijoin
- C. Self join
- D. Outer join

Answer: C

QUESTION: 7

Fill in the blank with the appropriate word. A _____ specifies that the value of a column (or columns), upon which the index is based, must be unique.

Answer: unique index

QUESTION: 8

You work as a Database Administrator for a company. The company uses MySQL as its database. You have created a new table named Employees, which keeps all the information of the employees. You want to add a new row to the Employees table. Which of the following statements will you use to accomplish the task?

- A. INSERT (column1,column2, ...columnN) INTO <table_name> VALUES(value1, value2, ...valueN);
- B. INSERT INTO <table_name>(column1, column2, ...columnN) VALUES(value1 ,value2, ...valueN);
- C. INSERT <table_name>(column1, column2, ...columnN), VALUES(value1, value2, ...valueN);
- D. INSERT INTO <table_name>(column1, column2,... columnN), VALUES(value1, value2, ...valueN);

Answer: B

QUESTION: 9

Fill in the blank with the appropriate term. A_____ provides a concise and flexible means for matching strings of text, such as particular characters, words, or patterns of characters.

Answer: regular expression

QUESTION: 10

Which of the following are true about UPDATE statements? Each correct answer represents a complete solution. Choose all that apply.

Pass4sure Certification Exam Features;
