350-001

Cisco
CCIE-Certified Internetwork Expert

http://www.ipass4sure.com/exams.asp?examcode=350-001

The 350-001 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 350-001 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 350-001 exam is very challenging, but with our 350-001 questions and answers practice exam, you can feel confident in obtaining your success on the 350-001 exam on your FIRST TRY!

Cisco 350-001 Exam Features

- Detailed questions and answers for 350-001 exam
- Try a demo before buying any Cisco exam
- 350-001 questions and answers, updated regularly
- Verified 350-001 answers by Experts and bear almost 100% accuracy
- 350-001 tested and verified before publishing
- 350-001 examcollection vce questions with exhibits
- 350-001 same questions as real exam with multiple choice options

Acquiring Cisco certifications are becoming a huge task in the field of I.T. More over these exams like 350-001 exam are now continuously updating and accepting this challenge is itself a task. This 350-001 test is an important part of Cisco certifications. We have the resources to prepare you for this. The 350-001 exam is essential and core part of Cisco certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 350-001 Test and save time and money while developing your skills to pass your Cisco 350-001 Exam? Let us help you climb that ladder of success and pass your 350-001 now!

QUESTION: 1
You have a Catalyst 6500 with a Supervisor IA with a MSFC. After a power outage, the MSFC has lost its boot image and now will only boot into ROMMON mode. You want to load a new image onto the Catalyst MSFC boot flash. What method can you use?

A. Console connection using Xmodem
B. FTP
C. TFTP
D. SNMP
E. SSH

Answer: A

Explanation:
The Catalyst 6000 Supervisor I and II modules have an onboard Flash file system that can handle several image files. In addition to this Flash, they also have a PCMCIA Flash slot. These Supervisors run their software from RAM and do not need their Flash system once correctly booted up. If an image is then corrupted or deleted, the standard upgrade procedure is always possible as long as the Supervisor is running a valid image. If the Supervisor is not booting up because there is no valid image to boot from the ROMMON, you will have to use the recovery procedure.
1. Booting from a PCMCIA Flash Card
2. Console Download using Xmodem
In this situation option 2 is the only choice, since the MSFC has lost its boot image. Refer to the link below for a detailed discussion of recovery procedures for Catalyst Switches.

QUESTION: 2
Which of the following statements regarding the use of SPAN on a Catalyst 6500 are true?

A. With SPAN an entire VLAN can be configured to be the source.

B. If the source port is configured as a trunk port, the traffic on the destination port will also be tagged, irrespective of the configuration on the destination port.
C. In any active SPAN session, the destination port will not participate in Spanning Tree.
D. It is possible to configure SPAN to have a Gigabit port as the destination port.
E. In one SPAN session it is possible to monitor multiple ports that do not belong to the same VLAN.

Answer: A, C, D, E

Explanation:
A destination port (also called a monitor port) is a switch port where SPAN sends packets for analysis. If the trunking mode of a SPAN destination port is "on" or "nonegotiate" during SPAN session configuration, the SPAN packets forwarded by the destination port have the ncapsulation as specified by the trunk type; however, the destination port stops trunking, and the show trunk command reflects the trunking status for the port prior to SPAN session configuration.For a detailed discussion on SPAN and RSPAN refer the link below.

QUESTION: 3
From the "show version" command you see that that the system file image is c2500- js-l_121-7.bin. What IOS feature set is loaded on this router?

A. Enterprise
B. IP
C. IP/IPX/AT/DEC
D. Enterprise Plus
E. IP Plus IPSec 3DES

Answer: D

Explanation:
The system image file name in the exhibit is c2500-js-l_121-12.bin

The table below shows the possible options
IOS feature file name
IP Plus c2500-is-l.121-7.bin
IP c2500-i-l.121-7.bin
Enterprise Plus IPSEC 56 c2500- jk8s -l.121-7.bin
Enterprise Plus c2500-js-l.121-7.bin
Enterprise c2500-j-l.121-7.bin

QUESTION: 4
A new TACACS+ server is configured to provide authentication to a NAS for remote access users. A user tries to connect to the network and fails. The NAS reports a FAIL message. What could be the problem? (Choose all that apply).

A. The TACACS+ service is not running on the server.
B. The password for this user is incorrect.
C. The username does not exist in the TACACS+ user database.
D. The NAS server lost its route to the TACACS+ server.
E. The TACACS+ server is down.

Answer: B, C

Explanation:
A FAIL condition is a result of incorrect username/password information. It means that an authentication request was successfully received, but that it had failed. A FAIL response is significantly different from an ERROR. A FAIL means that the user has not met the criteria contained in the applicable authentication database to be successfully authenticated. Authentication ends with a FAIL response. An ERROR means that the security server has not responded to an authentication query. Because of this, no authentication has been attempted. Only when an ERROR is detected will AAA select the next authentication method defined in the authentication method list.

Reference:
http://www.cisco.com/univercd/cc/td/doc/product/software/ios121/121cgcr/secur_c/scprt1/s cdaaa. htm

Incorrect Answer:

A, D, E. These would have resulted in an ERROR condition instead of a FAIL condition. With an error, the NAS would query the next authentication method.

QUESTION: 5
You have forgotten the password to your Catalyst 5000 switch. Immediately after power cycling the switch, you are faced with the password prompt. What default password should you type in?

A. cisco
B. abc123
C. sanfran
D. CTRL+ESC
E. No password, just hit the Enter key

Answer: E

Explanation:
Password recovery in Cat 5000 switch is performed in the following way. Power cycle the switch. Hit the Enter key during the first 30 sec. The switch will allow you to get into the enable mode.You will have 60 seconds to change the password and save the configuration change made during this period.

QUESTION: 6
While setting up remote access for your network, you type in the "aaa new-model" configuration line in your Cisco router. Which authentication methods have you disabled as a result of this change? (Choose all that apply.)

A. RADIUS
B. RADIUS+
C. Extended TACACS (XTACACS)
D. TACACS
E. TACACS+
F. Kerberos

Answer: C, D

Explanation:
When you enable AAA, you can no longer access the commands to configure the older deprecated protocols, TACACS or Extended TACACS. If you decided to use TACACS or Extended TACACS in your security solution, do not enable AAA.

QUESTION: 7
You have forgotten the password to a Catalyst switch and need to perform a password recovery. What is the first step that should be taken to do this?

A. Reboot the switch using the reload command.
B. Reboot the switch using the restart command.
C. Set the configuration register to ignore the startup configuration.
D. Set the boot register to 0x42.
E. Power cycle the switch.
F. Type in "config-register".

Answer: E

Explanation:
The switch must be manually turned off (or unplugged), and then turned back on (plugged back in). Power cycling the switch is the only way to get into password recovery.

QUESTION: 8
Which of the following statement is true regarding clocking for a Cisco T1 interface?

A. The clock source command selects a source for the interface to clock received data.By default, it is clock source loop-timed (specifies that the T1/E1 interface takes the clock from the Tx (line) and uses it for Rx).
B. Routers are DTEs and NEVER supply clocking to T1/E1 line.
C. The clock source command specifies the location of the NTP server for timing.

D. The clock source selects a source for the interface to clock outgoing data.
The default is clock source line -Specifies that the T1/E1 link uses the recovered clock from the line.
E. The clock source identifies the stratum level associated with the router T1/E1. The default is Stratum 1.

Answer: D

Explanation:
Clocking can either be internal, looped, or line. The default is line, meaning that the router is receiving clocking from the carrier network line.

Incorrect Answer:
C, E. These answers relate to NTP services, which are used for providing time stamping information to the router and does not relate to clocking. Stratum levels provide a hierarchy to the NTP source, with the highest level as 1.

QUESTION: 9
On your Terminal Server you are seeing spurious signals on line 6 of an asynchronous port due to contention issues. What command will fix this issue?

A. flowcontrol hardware
B. transport input none
C. no exec
D. exec-timeout 0 0

Answer: C

Explanation:
The "no exec" command is an optional command for reverse telnet configurations. Adding this line lessons the likelihood of contention over the asynchronous port. An executive process exists on all lines and buffer data to each other. At times, it can make it difficult to use a reverse telnet session. The command "no exec" will fix this.

Incorrect Answer:

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
