351-001

Cisco
CCIE Routing & Switching v4.0 Written Exam Topics
(Beta)

The 351-001 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 351-001 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 351-001 exam is very challenging, but with our 351-001 questions and answers practice exam, you can feel confident in obtaining your success on the 351-001 exam on your FIRST TRY!

Cisco 351-001 Exam Features

- Detailed questions and answers for 351-001 exam
- Try a demo before buying any Cisco exam
- 351-001 questions and answers, updated regularly
- Verified 351-001 answers by Experts and bear almost 100% accuracy
- 351-001 tested and verified before publishing
- 351-001 examcollection vce questions with exhibits
- 351-001 same questions as real exam with multiple choice options

Acquiring Cisco certifications are becoming a huge task in the field of I.T. More over these exams like 351-001 exam are now continuously updating and accepting this challenge is itself a task. This 351-001 test is an important part of Cisco certifications. We have the resources to prepare you for this. The 351-001 exam is essential and core part of Cisco certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 351-001 Test and save time and money while developing your skills to pass your Cisco 351-001 Exam? Let us help you climb that ladder of success and pass your 351-001 now!

Question: 1

Lafayette Productions is looking for a new ISP that has improved availability, load balancing, and catastrophe protection. Which type of ISP connectivity solution would be best?

A. Single run
B. Multi-homed
C. Stub domain EBGP
D. Direct BGP peering

Answer: B

Question: 2

Net Flow provides valuable information about network users and applications, peak usage times, and traffic routing. Which function is of Net Flow?

A. Monitor configuration changes
B. Monitor CPU utilization
C. Monitor link utilization
D. Generate traps for failure conditions

Answer: C

Question: 3

The P4S company is deploying OSPF on a point-to-multipoint Frame Relay network. The remote sites needn??t to communicate with each other and there are a relatively small number of sites (scaling is not a concern). How to configure OSPF for this topology in order to minimize the additional routing information injected into the network and keep the configuration size and complexity to a minimum?

A. Configure the link as OSPF no broadcast and manually configure each of the remote sites as a neighbor.
B. Configure the link as OSPF broadcast and configure the hub router to always be the designated router.
C. Configure the link as OSPF broadcast and configure a mesh group towards the remote routers.
D. Configure the link at the hub router as OSPF point-to-multipoint and at the remote routers asOSPF point-to-point.

Answer: B

Question: 4

What is high availability?

A. Redundant infrastructure
B. Clustering of computer systems
C. Reduced MTBF
D. Continuous operation of computing systems

Answer: D

Question: 5

What is the way that an OSPF ABR uses to prevent summary route information from beingreadvertised from an area into the network core (Area 0)?

A. It advertises only inter-area summaries to the backbone.

B. It uses poison reverse and split horizon.
C. It only sends locally originated summaries to the backbone.
D. It compares the area number on the summary LSA to the local area.

Answer: C

Question: 6
Connecting an IS-IS router to four links and redistributing 75 routes from RIP. How many LSPs will be originated by this router?

A. One LSP: containing the router information, internal routes, and external routes
B. Six LSPs: one for each link, one containing router information, and one containing external routing information
C. Two LSPs: one containing router information and internal routes and one containing external routes
D. Three LSPs: one containing all links, one containing router information, and one containing external routing information

Answer: A

Question: 7
According to the network in this exhibit, traffic directed towards 10.1.5.1 arrives at P4S-R4. Which path will the traffic take from here?

A. It will take P4S-R2.
B. It will not take any path. P4S-R4 will drop the traffic.
C. It will take P4S-R3.
D. It will load share between P4S-R2 and P4S-R3.

Answer: A

Question: 8
You are the Cisco Network Designer in P4S. Which two characteristics are most typical of a SAN? (Choose two.)

A. NICs are used for network connectivity.
B. Servers request specific blocks of data.
C. Storage devices are directly connected to servers.
D. A fabric is used as the hardware for connecting servers to storage devices.

Answer: B, D

Question: 9
The IGP next-hop reach ability for a BGP route is lost but a default route is available. Assuming that BGP connectivity is maintained, what will happen to the BGP route?

A. It will be put in a hold-down state by BGP until the next hop has been updated.
B. It will be removed from the BGP table.
C. It will be considered a valid route.
D. It will be considered invalid for traffic forwarding.

Answer: C

Question: 10

In the network presented in the following exhibit, all routers are configured to perform EIGRP on all interfaces. All interface bandwidths are set to 1000, and the delays are configured as displayed. In the topology table at Router P4S-RC, you see only one path towards 10.1.1.0/24. Why Router P4S-RC only has one path in its topology table?

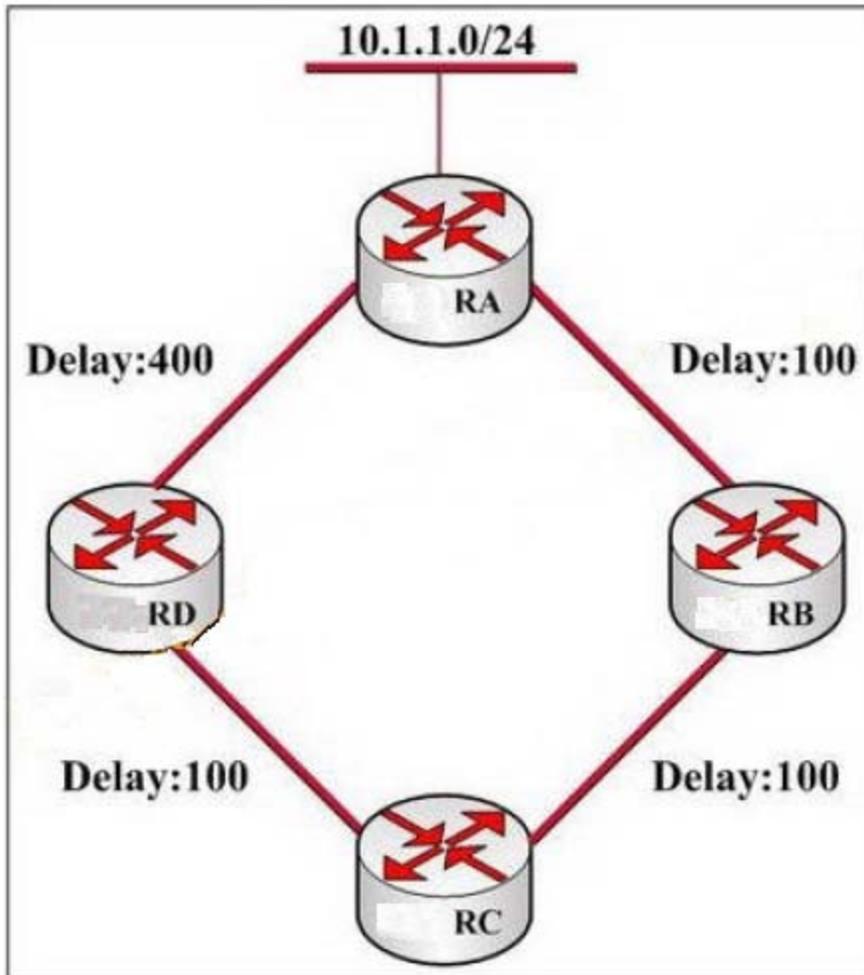

A. Router P4S-RB is not advertising 10.1.1.0/24 to Router P4S-RC due to split horizon.
B. Router P4S-RD is not advertising 10.1.1.0/24 to Router P4S-RC because Router P4S-RC is its feasible successor.
C. Router P4S-RD is not advertising 10.1.1.0/24 to Router P4S-RC due to split horizon.
D. Router P4S-RB is not advertising 10.1.1.0/24 to Router P4S-RC because Router P4S-RC is its feasible successor.

Answer: C

Question: 11
How many broadcast segments are contained in this network according to the exhibit?
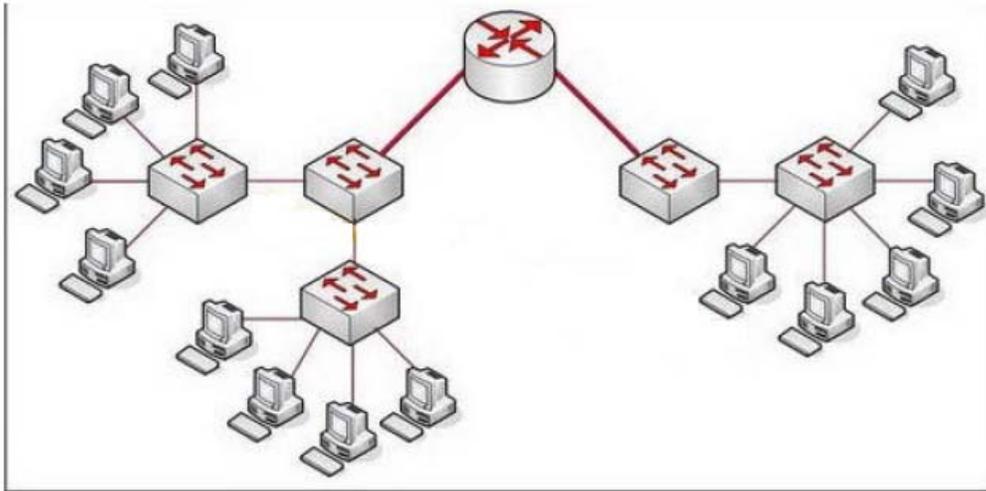

A. 1
B. 2
C. 4
D. 5

Answer: B

Question: 12
Which VPN management feature would be considered to ensure that the network had the least disruption of service when making topology changes?

A. Dynamic reconfiguration
B. Path MTU discovery
C. Auto setup
D. Remote management

Answer: A

Question: 13
What information can you get from TCP flags while assessing an attack?

A. Source of the attack
B. Type of attack
C. Target of the attack
D. Priority of the attack traffic

Answer: B

Question: 14
Which two steps can be taken by the sinkhole technique? (Choose two.)

A. Reverse the direction of an attack
B. Redirect an attack away from its target
C. Monitor attack noise, scans, and other activity

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
