352-001

Cisco

Cisco ADVDESIGN

The 352-001 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 352-001 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 352-001 exam is very challenging, but with our 352-001 questions and answers practice exam, you can feel confident in obtaining your success on the 352-001 exam on your FIRST TRY!

Cisco 352-001 Exam Features

- - Detailed questions and answers for 352-001 exam
- - Try a demo before buying any Cisco exam
- - 352-001 questions and answers, updated regularly
- - Verified 352-001 answers by Experts and bear almost 100% accuracy
- - 352-001 tested and verified before publishing
- - 352-001 examcollection vce questions with exhibits
- - 352-001 same questions as real exam with multiple choice options

Acquiring Cisco certifications are becoming a huge task in the field of I.T. More over these exams like 352-001 exam are now continuously updating and accepting this challenge is itself a task. This 352-001 test is an important part of Cisco certifications. We have the resources to prepare you for this. The 352-001 exam is essential and core part of Cisco certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 352-001 Test and save time and money while developing your skills to pass your Cisco 352-001 Exam? Let us help you climb that ladder of success and pass your 352-001 now!

Question: 1
Lafeyette Productions is looking for a new ISP that has improved availability, load balancing, and catastrophe protection. Which type of ISP connectivity solution would be best?

A. Single run
B. Multi-homed
C. Stub domain EBGP
D. Direct BGP peering

Answer: B

Question: 2
Which two items are true about QoS in MPLS VPN (RFC 2547bis) networks? (Choose two.)

A. On egress from the Edge-LSR, the EXP field is used for PHB QoS towards the CE.
B. MPLS can force packets into specific paths and bandwidths based on Edge-LSR mapping of DSCP to EXP.
C. DiffServ information must be made known to the LSR in the MPLS header using the EXP field.
D. MPLS QoS is a scalable and simple solution because it only requires application at the Edge-LSR.

Answer: B, C

Question: 3
EIGRP performs route summarization at the interface level with the ip summary-address command. Which three statements correctly describe EIGRP route summarization? (Choose three.)

A. Summary routes are inserted in the routing table with a next hop of null 0 and a high administrative distance, to prevent black holing of traffic.
B. By default, EIGRP automatically summarizes internal routes, but only each time a major network boundary is crossed.
C. EIGRP route summarization can reduce the query diameter to help prevent SIA problems.
D. The metric for each summarized route is inherited from the lowest metric of the component routes.

Answer: B, C, D

Question: 4
The headend router propagates which two resources for constrained based path computation with MPLS Traffic Engineering? (Choose two.)

A. Link delay
B. Link jitter
C. Link bandwidth and link affinity
D. Average link utilization

Answer: C

Question: 5
Flex Links are a pair of a Layer 2 interfaces (switchports or port channels), where one interface is configured to act as a backup to the other. Which two statements are correct regarding Flex Links?

A. An interface can only belong to single Flex Links.

B. An interface can belong to multiple Flex Links.
C. Flex Links operate only over single pairs of links.
D. Flex Links automatically disable STP so no BPDUs are propagated.

Answer: C, D

Question: 6
Which option is correct in terms of designing a policy in which more than one class share a queue?

A. It should be deployed throughout the network to simplify the design.
B. It must be avoided under all circumstances.
C. It requires consideration of the performance targets of classes sharing the queue.
D. It will result in a negative class.

Answer: C

Question: 7
The packets discovered are considered part of an attack. What benefit can be obtained by using a packet scrubbing device to redirect them?

A. Packet scrubbing forwards valid traffic.
B. Packet scrubbing provides better logging of suspected attacks.
C. Packet scrubbing is "line rate."
D. Packet scrubbing filters all traffic.

Answer: A

Question: 8
Which item is the primary requirement when deploying OSPF graceful restart on a router?

A. Some form of fast Layer 2 down detection must be enabled on the router.
B. The adjacent router must support graceful restart helper mode.
C. The adjacent routers must be enabled to forward traffic during the failure.
D. Aggressive routing protocol hellos and keepalives must be running on the router.

Answer: B

Question: 9
A virtual storage area network (VSAN) is a collection of ports from a set of connected Fibre Channel switches, that form a virtual fabric. Which technology allows centralized storage services to be shared across different VSANs?

A. IVR
B. FSPF
C. FICON
D. SANTap

Answer: A

Question: 10
NetFlow provides valuable information about network users and applications, peak usage times, and traffic routing. Which function is of NetFlow?

A. Monitor configuration changes

B. Monitor CPU utilization
C. Monitor link utilization
D. Generate traps for failure conditions

Answer: C

Question: 11
What information can you get from TCP flags while assessing an attack?

A. Source of the attack
B. Type of attack
C. Target of the attack
D. Priority of the attack traffic

Answer: B

Question: 12
You are a network technician for the P4S company, study the exhibit carefully. P4S-R1 is redistributing 10.1.5.0/24 into Area 1 in this network. Which LSA containing 10.1.5.0/24 will P4S-R6 have in its database?
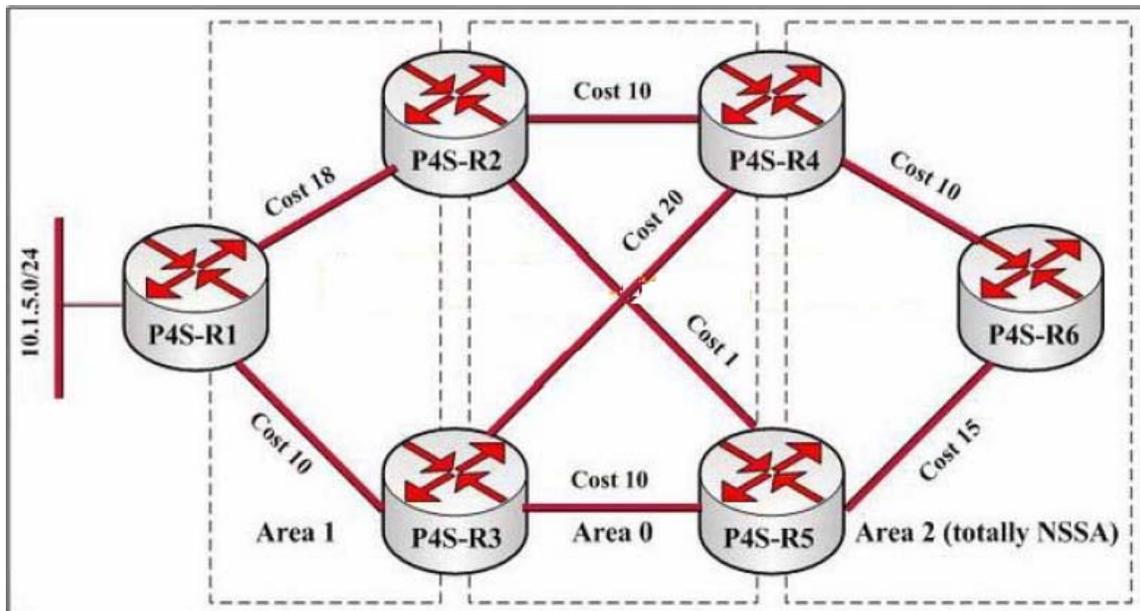

A. P4S-R6 will have a border router (type 4) LSA in its local database for 10.1.5.0/24.
B. P4S-R6 will have an NSSA external (type 7) LSA in its local database for 10.1.5.0/24.
C. P4S-R6 will have an external (type 5) LSA for 10.1.5.0/24 in its local database.
D. P4S-R6 will not have any LSAs containing 10.1.5.0/24.

Answer: D

Question: 13
Scalability is provided in the server farm module by which of the following design strategies?

A. Up to 10 Gbps of bandwidth at the access level
B. Redundant servers at the access level
C. Modular block design at the access level

D. High port densities at the access level

Answer: C

Question: 14
Which function is performed by the Community String field defined in a trap PDU?

A. Enable reliable delivery of messages
B. Allow authentication by management station
C. Isolate the PDU within a defined region of the network
D. Enable the routing of messages

Answer: B

Question: 15
RSVP is short for Resource Reservation Protocol. Which statement is true about the RSVP protocol?

A. It is reserved bi-directionally by each originating node.
B. It is only for avoiding packet drop on collision-prone media (such as Ethernet).
C. It is initiated uni-directionally along the data path downstream from each requesting node.
D. It is only shared by pairs of peers participating in delay-sensitive, real-time applications like VoIP.

Answer: C

Question: 16
Which is a requirement for performing attack detection by use of anomaly detection technologies?

A. Syslog data
B. Packet captures
C. Baseline data
D. Exploit signatures

Answer: C

Question: 17
You are the Cisco Network Designer in Company.com. What is the term for a logical SAN which provides isolation among devices physically connected to the same fabric?

A. InterSwitch Link
B. Virtua LAN
C. Virtual Output Queuing
D. virtual storage area network

Answer: D

Question: 18
The P4S company's external routers BGP peer with multiple service providers and external organizations. In all situations, the external routers are peered with their BGP neighbors through directly-connected interfaces. How does GTSM provide additional security for your BGP speakers?

A. GTSM prevents the processing of BGP packets from devices that are not on the directly-connected interfaces.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
