3X0-102

Sair

Linux System Administration (Level 1)

<http://www.ipass4sure.com/exams.asp?examcode=3X0-102>

The 3X0-102 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 3X0-102 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 3X0-102 exam is very challenging, but with our 3X0-102 questions and answers practice exam, you can feel confident in obtaining your success on the 3X0-102 exam on your FIRST TRY!

Sair 3X0-102 Exam Features

- Detailed questions and answers for 3X0-102 exam
- Try a demo before buying any Sair exam
- 3X0-102 questions and answers, updated regularly
- Verified 3X0-102 answers by Experts and bear almost 100% accuracy
- 3X0-102 tested and verified before publishing
- 3X0-102 examcollection vce questions with exhibits
- 3X0-102 same questions as real exam with multiple choice options

Acquiring Sair certifications are becoming a huge task in the field of I.T. More over these exams like 3X0-102 exam are now continuously updating and accepting this challenge is itself a task. This 3X0-102 test is an important part of Sair certifications. We have the resources to prepare you for this. The 3X0-102 exam is essential and core part of Sair certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 3X0-102 Test and save time and money while developing your skills to pass your Sair 3X0-102 Exam? Let us help you climb that ladder of success and pass your 3X0-102 now!

QUESTION 1:

One of the most important security features that a system administrator must deal with is the shadow password suite. For what reason is this suite important?

- A. It improves the encryption for all passwords stored in the "/etc/passwd" file.
- B. It provides a second level of encryption for the "/etc/passwd" file.
- C. It moves the passwords to a separate file that has more restrictive permissions
- D. It moves the passwords to a separate file and will also encrypt the password file.

Answer: C

QUESTION 2:

Which of the following options is true of the entry below?

```
/dev/cdrom /cd iso9660 ro,user,noauto 0 0
```

- A. This is an "mtab" entry which mounts a CD-ROM as a read-only device at boot time.
- B. This is an "fstab" entry which mounts a CD-ROM as a read-only device at boot time.
- C. This is an "fstab" entry which lets any user mount the CD-ROM.
- D. None of the above.

Answer: C

QUESTION 3:

If Tom, the superuser, wants to add a swap file of 8 MB, what should he do?

- A. Just run the command "swapon -file /swap -size 8192".
- B. run commands "mkswap" and "swapon"
- C. run commands "mkswap" and "sync"
- D. dd if=/dev/zero of=/swap count=8192; mkswap 8192; swapon /swap

Answer: D

QUESTION 4:

The system log files, which are written by the _____ daemon, are erased and then restarted whenever the system reboots. (Fill in the blank for the proper daemon, and then state whether the statement is true or false)

- A. syslogd, true
- B. syslogd, false
- C. systemd, true
- D. loggert, true

Answer: B

QUESTION 5:

The "fsck" command will search all mounted file systems.

- A. True
- B. False

Answer: B

QUESTION 6:

Tom, a Linux system user, has been using a Virtual Network Computing viewer but his viewer has crashed. He calls Kina, the system administrator, to ask her whether the viewer can be restarted from where it left off, or if he has to start the remote application all over again. Kina's response should be:

- A. No, the remote application cannot be recovered and Tom must start over.
- B. Yes, the remote application can be recovered by restarting the viewer.
- C. Yes, the application can be recovered by restarting the viewer.
- D. Yes, it can be recovered by restarting both the server and the viewer.

Answer: B

QUESTION 7:

If Alladin mounted "/dev/hda2" under "/chem/inorg", then the original contents of "/chem/inorg" _____.

- A. are lost
- B. are copied in a directory into "/dev/hda2" under "orig.backup"
- C. can be retrieved after unmounting "/dev/hda2"
- D. are garbled

Answer: C

QUESTION 8:

Assume that Priya and Sita are Linux system users and that Krishna is the superuser. Also, assume that both Priya and Sita were accessing files in the "/cdrom" directory and that they did not log out and their current working directory is still in the /cdrom hierarchy. Krishna wishes to install some software from a new CD-ROM that he bought. Which of the following are valid options for Krishna? (Select all that apply)

3X0-102

- A. He can just push the eject button on the CD-ROM drive that is currently in the drive, then insert his new one and start the installation.
- B. He has to find Priya and Sita and tell them to change directory from /cdrom so that he can then unmount the CD-ROM, eject it, put his new CD-ROM in, and then install.
- C. Krishna can use "umount -f" to force the unmount of the CD-ROM, then he can eject it, insert his CD-ROM, and install.
- D. He can use the "fuser" command to find all processes that are using the CD-ROM device, along with their associated PID's, kill each process, unmount the CD-ROM, eject it, put his CD-ROM in, and then install the software.

Answer: BD

QUESTION 9:

Which of the following is NOT true about an inode?

- A. It is a data structure on the disk that stores file attributes.
- B. inodes are created when a file system is made.
- C. The number of inodes for the disk denotes the number of files and drives the disk can hold.
- D. The superuser can use the "chinode" command to increase the number of inodes in a file system.

Answer: D

QUESTION 10:

If Priya created a symbolic link to "/bin/bash" in her current working directory and called it "yash", then which one of the following is true?

- A. She is not using any disk space.
- B. She is just using up an inode but no space.
- C. She is using both disk space and inode.
- D. She is just using up a directory entry, but no inode.

Answer: C

QUESTION 11:

If Priya created a symbolic link using the following command:

```
ln -s /bin/bash yash
```

Then which of the following are TRUE? (Select all that apply)

- A. adding a file called "yash" does not consume another Inode
- B. The "ls -l" reports the same size for the file "yash" and the file "/bin/bash"
- C. a new inode is created for "yash"
- D. deleting the file "yash" has no effect on the file "/bin/bash"

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
