Question: 1

Which Cat 520 feature optimizes QoS?

Answer: Cisco SmartPorts

Explanation:

Note: Optimized QoS using Cisco Smartports: Cisco Smartports roles match the appropriate class-of-service (CoS) and differentiated services code point (DSCP) Values to the specific Cisco device connected to the Cisco Catalyst Express switch. This allows for trouble-free deployment of Cisco advanced technologies such as IP telephony and WLAN.

Question: 2

In which modes can the 521 Access Point be configured?

Answer: Either Stand-Alone or Controller Based Mode.

Explanation:

Note: As part of this solution, the Cisco 521 access point uniquely addresses the diverse requirements of SMBs by offering the versatility of operating either in standalone mode, or in controller-based mode with the Cisco 500 Series Wireless Express Controller.

*Standalone mode: Access points are directly connected to the wired infrastructure through an Ethernet switch and provide reliable high-speed wireless connectivity to users in the area they cover. Configuration and management are performed locally at the individual access point level.

*Controller-based mode: Access points are directly connected to the wired infrastructure through an Ethernet switch and associated with a Cisco 500 Series Wireless Express Mobility Controller. The controller streamlines and manages the configuration of all connected access points through a single interface, and provides a platform for mobility services such as secure guest access and voice over Wi-Fi.

Question: 3

What are 2 configurable options for call control on the UC520?

- A. Shared
- B. PBX
- C. Key System
- D. Encryption
- E. Call Waiting

Answer: B, C

Question: 4

Which 2 CRM servers all Cisco Unified Call Connector to be configured for connectivity?

- A. Siebel
- B. Microsoft Dynamics
- C. Act!
- D. salesforce.com
- E. OnContact

Answer: B, D

Question: 5

How many voice expansion slots are available on the UC520?

Answer: ONE
