70-243

Microsoft

Administering and Deploying System Center 2012 Configuration Manager

<http://www.ipass4sure.com/exams.asp?examcode=70-243>

The 70-243 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 70-243 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 70-243 exam is very challenging, but with our 70-243 questions and answers practice exam, you can feel confident in obtaining your success on the 70-243 exam on your FIRST TRY!

Microsoft 70-243 Exam Features

- Detailed questions and answers for 70-243 exam
- Try a demo before buying any Microsoft exam
- 70-243 questions and answers, updated regularly
- Verified 70-243 answers by Experts and bear almost 100% accuracy
- 70-243 tested and verified before publishing
- 70-243 examcollection vce questions with exhibits
- 70-243 same questions as real exam with multiple choice options

Acquiring Microsoft certifications are becoming a huge task in the field of I.T. More over these exams like 70-243 exam are now continuously updating and accepting this challenge is itself a task. This 70-243 test is an important part of Microsoft certifications. We have the resources to prepare you for this. The 70-243 exam is essential and core part of Microsoft certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 70-243 Test and save time and money while developing your skills to pass your Microsoft 70-243 Exam? Let us help you climb that ladder of success and pass your 70-243 now!

QUESTION: 1

You recently migrated from System Center Configuration Manager 2007 to System Center 2012 Configuration Manager. Your network contains a client computer that runs the 64-bit version of Windows 7 and the 32-bit version of Windows 7. Some client computers have the Microsoft Application Virtualization (App-V) client installed. You have an Application named App1. You have a 64-bit version of App1, a 32-bit version of App1, and a virtual version of App1. You need to deploy the Application to all of the client computers. The solution must minimize the amount of administrative effort. What should you do?

- A. Create a new Application that has three different deployment types and create a target collection for each of the deployment types.
- B. Create a new Application that has three different deployment types and configure global conditions for each of the deployment types.
- C. Create a new package for each version of App1.
- D. Create a new Application for each version of App1.

Answer: B

You need to make a new package containing all the different versions as shown in the figure below –

QUESTION: 2

You have an Application named App1. You need to ensure that users in the finance department can install App1 by using the Application Catalog. What should you do?

- A. Create a required user deployment and target the deployment to all of the finance department users.
- B. Create a required user deployment and target the deployment to all of the client computers in the finance department.
- C. Create an available user deployment and target the deployment to all of the finance department users.
- D. Create an available user deployment and target the deployment to all of the client computers in the finance department.

Answer: C

Explanation:

By selecting "Available" it will be selectable for the users in the Application Catalog. The "Required" option would force the installation to all users in the finance department.

QUESTION: 3

Your company uses System Center 2012 Configuration Manager with Microsoft Forefront Endpoint Protection integration. You deploy Forefront Endpoint Protection to all client computers. The company uses a management Application named App1. You discover that Forefront Endpoint Protection blocks App1. You need to ensure that App1 can run. How should you configure the Default Client Malware Policy? (Each correct answer presents a complete solution. Choose two.)

- A. Create a software restriction policy.
- B. Add a process exclusion.
- C. Add a file location exclusion.
- D. Modify the schedule scan settings.
- E. Click the Use behavior monitoring check box.

Answer: B, C

Explanation:

The process exclusion excludes the App1 and File location exclusion provides the location of the file to be excluded. See the fig below -

**QUESTION: 4**

Your network contains a System Center 2012 Configuration Manager environment. You deploy a Microsoft Office 2007 package to all client computers by using Configuration Manager. Your company purchases Office 2010. You need to ensure that all users can install Office 2010 from the Application Catalog. What should you do?

- A. Deploy a new package for Office 2010.
- B. Deploy Office 2010 by using a Group Policy Object (GPO).
- C. Update the Office 2007 source file and redeploy the package.
- D. Deploy a new Application for Office 2010.

Answer: D

QUESTION: 5

You deploy Windows 7 by using Operating System Deployment (OSD). The development task sequence contains steps to install software updates and Applications. The amount of time required to deploy the Windows 7 image has increased significantly during the last six months. You need to recommend a solution to reduce the amount of time it takes to deploy the image. What should you recommend?

- A. Synchronize software updates before deploying the image.
- B. Use offline servicing for the image.
- C. Create a new automatic deployment rule.
- D. Add an additional Install Software Updates step to the deployment task sequence.

Answer: B

Explanation:

In Configuration Manager 2012 there is a new feature for applying updates to operating system images while they are in the Configuration Manager library (offline). This means any operating system image you see in the Operating Systems > Operating Systems Images node from the Software Library wonderbar can be updated with Component Based Servicing (CBS) updates. By updating an image in the Software Library instead of performing a new build and capture of the operating system image you will gain a few distinct advantages. You will be able to reduce the risk of vulnerabilities during operating system deployments and reduce the overall operating system deployment to the end user. You will also reduce the administrative effort to maintain your operating system images. The feature is applicable for Component Based Servicing (CBS) updates and for the following operating systems: Microsoft Windows Vista SP2 and later Microsoft Windows Server 2008 SP2 and later Microsoft Windows 7 RTM Microsoft Windows 2008 R2

* At the launch of ConfigMgr 2012 Beta 2 Microsoft Windows 7 SP1 and Windows Server 2008 R2 SP1 are not supported. They will be supported with Configuration Manager 2012 RTM.

QUESTION: 6

You have Windows 7 images that are rebuilt quarterly and sported to System Center 2012 Configuration Manager. The Microsoft Deployment Toolkit (MDT) 2012 is integrated with Configuration Manager. You need to reduce the network security risks when the images are deployed by using Operating System Deployment (OSD). What should you do? (Choose all that Apply.)

- A. After the Apply Operating System Image task sequence step, add a step to install software updates offline.
- B. Before the Apply Operating System image task sequence step, add a step to install Deployment Imaging Servicing and Management (DISM).

Pass4sure Certification Exam Features;

- Pass4sure offers over **4500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **150** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
