70-432

Microsoft

TS :MS SQL Server@ 2008, Implementation and Maintenance

<http://www.ipass4sure.com/exams.asp?examcode=70-432>

The 70-432 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 70-432 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 70-432 exam is very challenging, but with our 70-432 questions and answers practice exam, you can feel confident in obtaining your success on the 70-432 exam on your FIRST TRY!

Microsoft 70-432 Exam Features

- Detailed questions and answers for 70-432 exam
- Try a demo before buying any Microsoft exam
- 70-432 questions and answers, updated regularly
- Verified 70-432 answers by Experts and bear almost 100% accuracy
- 70-432 tested and verified before publishing
- 70-432 examcollection vce questions with exhibits
- 70-432 same questions as real exam with multiple choice options

Acquiring Microsoft certifications are becoming a huge task in the field of I.T. More over these exams like 70-432 exam are now continuously updating and accepting this challenge is itself a task. This 70-432 test is an important part of Microsoft certifications. We have the resources to prepare you for this. The 70-432 exam is essential and core part of Microsoft certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 70-432 Test and save time and money while developing your skills to pass your Microsoft 70-432 Exam? Let us help you climb that ladder of success and pass your 70-432 now!

QUESTION: 1

Your workstation has installed Microsoft SQL Server Management Studio (SSMS), and not installed Microsoft Business Intelligence Development Studio (BIDS). You should design a package, which has the following features: The package should be transactional. The package should be optimized for 10 tables. The package should be stored safely in the msdb database of a server which is remote. Which is correct?

- A. You should create the package by using DTS Designer.
- B. You should create the package by using the Package Migration Wizard.
- C. You should create the package by using the Microsoft SQL Server Import and Export Wizard.
- D. On the Microsoft SQL Server 2005 Integration Services (SSIS) menu, You should click the Create Package submenu.

Answer: C

QUESTION: 2

You are managing the company database called TesterDB; the database includes a database that uses SQL Server log shipping. Log shipping will happen half a hour. You should make the full backup. In order to cut the net bandwidth utilization when maintenance every night. Which is the correct answer?

- A. You should set the database to utilize the bulk-logged recovery model.
- B. You should reproduce only those indexes that ask it every night.
- C. You should add the time during transaction log backups.
- D. You should disable log shipping after the nightly maintenance.

Answer: B

QUESTION: 3

You are managing the company database, Users complaints that the SQL Server 2008 application is running slowly. You should check the information of the CPU utilization, disk utilization, and memory utilization. The network should be considered. the detailed information should be checked for the proper example of SQL Server 2008. Which is the correct answer?

- A. You should check the proper dynamic management views (DMVs).
- B. In the databases, you should check the distribution of the statistics which are hosted
- C. You should check a statistics update command's the output.

D. You should check the recovery model of the master database.

Answer: A

QUESTION: 4

You are managing a SQL Server 2008 instance which includes a database called Products whose recovery model is set to full for Company.com. The Products database's backup method is listed below: The information reserve on different disks. The hard disks which include the user database data files are reported to have failed at 17:00 hours on Wednesday. You should make sure that Products database could be saved by minimal data loss. Which is the correct answer?

Day	Type of Backup	Time
Sunday	Full backup	01:00 hours
Weekdays	Differential backup	22:00 hours
Weekdays	Transaction log backup	08:00 hours 12:00 hours 16:00 hours

- A. You should recovery the full backup taken on Sunday. And then recovery the differential backup taken on Wednesday.
- B. You should recovery the full backup taken on Wednesday. And then recovery the differential backup taken on Sunday.
- C. You should recovery the full backup taken everyday. And then recovery the differential backup taken on Wednesday.
- D. You should backup the transaction log and recovery the full backup taken on Sunday and then recovery differential backup taken on Tuesday. And recovery the

Answer: D

QUESTION: 5

You are managing a SQL Server 2008 instance which includes a database called Products for Company.com. The Products database includes filegroups listed below: The PRIMARY filegroup which includes the On-Line Transaction Processing (OLTP) information reserved in the E: volume. A filegroup called Hunter which includes older information reserved in the F: volume. The transaction log of the information is reserved in the I: volume. Data is transferred from the PRIMARY filegroup to the Hunter filegroup as a member of the archiving strategy for the Products database, the backup method for the Products database is composed of the conditions listed below: You should backup the PRIMARY filegroup six times a day You should backup the Hunter filegroup at 20:00 You should backup the transaction log every 20 minutes

The volume which includes the Hunter filegroup lost at 14:00 hours. You should make sure that you could recovery the database through ensuring minimal data loss in minimum possible time. Which is the correct answer?

- A. You should backup the transaction log and recovery the oldest backup of the Hunter filegroup and recovery the whole the transaction log backups after the most
- B. You should recovery the newest backup of the Hunter filegroup.
- C. You should backup the transaction log and recovery the newest backup of the Hunter filegroup and recovery the whole the transaction log backups after the most
- D. You should recovery the oldest backup of the Hunter filegroup.

Answer: C

QUESTION: 6

You are managing a SQL Server 2008 instance which includes a database called Products for Company.com. You set recovery model full. You run a full database backup for the whole the user databases at 01:00 hours everyday. The transaction log backup happens each 20 minutes. You could run a differential backup each 5 hours. You decide to run a full backup of the Products database at 12:00 hours. Not only you should make sure that you could run the backup without affecting the overall backup and restore procedures for the Products database but also you could restore the Backup files in proper sequence. Which is the correct answer?

- A. You should use the codes below:
- B. bak ' WITH NOUNLOAD;
- C. You should use the codes below:
- D. bak' WITH COPY_ONLY;
- E. You should use the codes below:
- F. trn' WITH DIFFERENTIAL;

Answer: E

QUESTION: 7

You are managing a SQL Server 2008 instance which includes a database called Products for Company.com. There is 100 GB information in Products database. 2 GB of information is changed everyday on an average. You have set the recovery model of the Products database Simple. Business requirements clarify that data loss of more than three hours worth of transactions during business hours could not run normally. You should make sure that choosing a backup strategy will utilize the least number of disk spaces through adhering to the business

requirements. Which is the correct answer?

- A. You should run a full database backup once everyday
- B. You should run a full database backup once everyday and then run a differential backup every three hours during business hours.
- C. You should run a differential backup each three hours during business hours.
- D. You should run a transaction log backup each three hours during business hours.

Answer: B

QUESTION: 8

You are managing the company database, and managing 20 SQL Server 2005 computers which are operated by other administrators that are asked to meet company service level agreements (SLAs) on querying response time .Some of the method on controlling query response times on the servers should be told for these administrators. Which is the correct answer?

- A. You should create a query that searches the sys.dm_db_partition_stats dynamic management view (DMV). Then distribute this search to the administrators.
- B. You should develop an XML schema which includes the event and column names of the query response times, which should be captured in SQL Server Profiler.
- C. You should develop SQL Server Profiler templates, which contain query start times and end times. Then distribute these templates to the database
- D. You should teach the administrators to use System Monitor Control Tool

Answer: C

QUESTION: 9

You are managing a SQL Server 2008 instance which contains a stored procedure which is utilized as the data source for a report which is implemented during business hours for Company.com. A user called Clerk tells you that the data returned by the report is not safety. You find out that the results are caused by phantom reads. You should make sure that the report returns results without connecting with other users. Which is the correct answer?

- A. You should make the database Read Committed Snapshot isolation
- B. You should make the database Auto Update Statistics
- C. You should change the stored procedure to utilize the Snapshot isolation level.
- D. You should change the stored procedure to utilize the Read Committed Snapshot isolation

level.

Answer: C

QUESTION: 10

You are managing a SQL Server 2008 instance which includes some applications for Company.com. You set the SQL Server Agent service to implement through utilizing the SerTest\Test account. You create a job named MailingTester that allows a file to be stored to a log server. The job could not run normally because it could not own proper access to the log server. You decide to set the service of SQL Server Agent. You should make sure that you could run the settings such that the SQL Server Agent service owns all access to the log server. Which is the correct answer?

- A. You should utilize the type of Domain account
- B. You should utilize the type of remote System account
- C. You should utilize the type of remote Service account
- D. You should utilize the type of Local Service account

Answer: A

QUESTION: 11

You are managing a SQL Server 2008 instance which includes a database called Products for Company.com. The Sony database has the problems of deadlock .You should make sure that you could catch the deadlock data to the SQL Server error log. Which is the correct answer?

- A. You should make Server Auditing enable for the Products database.
- B. You should set a Transactions Log to capture the deadlock graphs.
- C. You should set a SQL Profiler trace to capture the deadlock graphs.
- D. As a startup parameter, you should configure the proper trace flags and restart the SQL Server instance.

Answer: D

QUESTION: 12

You are the database administrator for a SQL Server 2008 computer named TESTDB. A user reports that his query has been running for a very long time and is still running.You access the

sys.dm_tran_locks dynamic management view (DMV). The relevant results are shown in the following table. Which is the correct answer?

resource_type	resource_description	request_mode	request_status	request_session_id	request_owner_id
RID	1:1104:162	X	GRANT	56	104405
DATABASE		S	GRANT	56	0
DATABASE		S	GRANT	55	0
PAGE	1:1104	IS	GRANT	55	104445
PAGE	1:1104	IX	GRANT	56	104405
RID	1:1104:166	X	GRANT	56	104405
RID	1:1104:170	X	GRANT	56	104405
RID	1:1104:89	X	GRANT	56	104405
RID	1:1104:0	X	GRANT	56	104405
RID	1:1105:89	X	GRANT	56	104405
RID	1:1104:93	X	GRANT	56	104405
RID	1:1105:03	X	GRANT	56	101105
RID	1:1104:0	S	WAIT	55	104445
RID	1:1105:92	X	GRANT	56	104405

- A. Execute sp_who 55.
- B. Execute sp_who 56.
- C. Use the Activity Monitor in Microsoft SQL Management Studio and locate process 55.
- D. Select from the sys.syslockinfo compatibility view and locate spid 55.

Answer: B

QUESTION: 13

You are managing a SQL Server 2008 which includes a database called Tester for the Company.com. You decide to permit the whole programmers to utilize SQL Server Profiler to get traces to troubleshoot the application which utilizes the database Tester. In order to solve the problem, which is the correct answer?

- A. You should permit the proper server-level rights to the default SQL Server logins of the application programmers.
- B. You should permit the proper server-level rights to the whole SQL Server logins of the application programmers.
- C. You should increase the whole the database roles of the application programmers to a fixed database role.
- D. You should add the technology of Transactions Log.

Pass4sure Certification Exam Features;
