Exam Name:	Visual Studio Team Foundation Server 2010, Administration		
Exam Type:	Microsoft	Exam Code:	70-512
Certification	Microsoft Certified Technology Specialist (MCTS)	Total Questions:	60

Question: 1

You plan to install a dual tier Visual Studio Team Foundation Server 2010 environment using two servers named Server1 and Server2. You install and configure Microsoft SQL Server 2008 and SQL Server 2008 Analysis Services on Server1. You install and configure IIS 7.5, SQL Server Reporting Services, and Windows Share Point Services 3.0 on Server2. You need to install and configure Team Foundation Server using the two servers. What should you do?

- A. Install Team Foundation Server on Server2 and run the configuration wizard on Server2 using the Basic option.
- B. Install Team Foundation Server on Server2 and run the configuration wizard on Server2 using the Advanced option.
- C. Install Team Foundation Server on Server1 and Server2. Run the configuration wizard on Server1 using the Basic option. Run the configuration wizard on Server2 using the Application Tier Only option.
- D. Install Team Foundation Server on Server1 and Server2. Run the configuration wizard on Server1 using the Advanced option. Run the configuration wizard on Server2 using the Application Tier Only option.

Answer: B

Question: 2

You install Visual Studio Team Foundation Server 2010. You have an existing Microsoft Office Share Point Server (MOSS) 2007 server that uses Microsoft SQL Server 2008. You need to configure Team Foundation Server to use the existing SQL Server and Share Point servers. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Install and configure the Team Foundation Server Extensions for Share Point Products on the MOSS 2007 server.
- B. Install and configure the Team Foundation Server 2010 Share Point Package (.wsp) files on the MOSS 2007 server.
- C. Run the configuration wizard on an application tier server, using the advanced option.
- D. Run the configuration wizard on an application tier server, using the Application Tier Only option.

Answer: A, C

Question: 3

Your company has a main office and a branch office. You are installing Visual Studio Team Foundation Server 2010 at the main office. You need to minimize the bandwidth required to access version controlled files from the branch office. What should you do?

- A. Install Team Foundation Server Proxy at the main office. Configure the Team Explorer client applications at the branch office to connect to the proxy server.
- B. Install Team Foundation Server Proxy at the branch office. Configure the Team Explorer client applications at the branch office to connect to the proxy server.
- C. Create a team project collection for the branch office. Configure the Team Explorer client applications at the branch office to connect to the application tier at the main office.
- D. Install an application tier server at the branch office and configure it to connect to Team Foundation Server. Configure the Team Explorer client applications at the branch office to connect to the application tier server at the branch office.

Answer: B

Exam Name:	Visual Studio Team Foundation Server 2010, Administration		
Exam Type:	Microsoft	Exam Code:	70-512
Certification	Microsoft Certified Technology Specialist (MCTS)	Total Questions:	60

Question: 4

You are setting up a Visual Studio Team Foundation Server 2010 environment. The environment includes a Microsoft SQL Server 2008 cluster. You need to ensure high availability and redundancy for the front-end Web servers in the Team Foundation Server environment. What should you do?

- A. Install a virtual application tier server and create a snapshot.
- B. Install two application tier servers. Use one as a cold standby.
- C. Install two application tier servers. Use one as a warm standby.
- D. Install multiple application tier servers with network load balancing.

Answer: D

Question: 5

You have a dual tier Visual Studio Team Foundation Server 2010 environment. You run Windows Share Point Services 3.0 on the application tier server. You configure Team Foundation Server to support an existing Share Point Web application. When you attempt to create a new team project portal in the existing Share Point Web application, you receive the following error: TF218017: A Share Point site could not be created for use as the team project portal. The following error occurred: TF250034: An access grant could not be found between Team Foundation Server and the Share Point Web application that you specified. You need to ensure that Team Foundation Server integrates with the Share Point Web application. What should you do in the Team Foundation Server Administration Console?

- A. In the Extensions for Share Point Products node, grant access to Team Foundation Server.
- B. In the Extensions for Share Point Products node, modify access to the Share Point Web application.
- C. In the Share Point Web Applications node, add the Share Point Web application to Team Foundation Server.
- D. In the Share Point Web Applications node, remove the Share Point Web application from Team Foundation Server.

Answer: A

Question: 6

You have a single tier Visual Studio Team Foundation Server 2010 environment. You create the DNS CNAME record that maps tfs.Company.com as an alias for the application tier server name. You receive alert emails for a Work Item Changed event. The alerts include Visual Studio 2010 Team Web Access links that use the server name instead of the alias. You need to ensure that Team Web Access links in alert emails use the alias instead of the server name. What should you do?

- A. In the Team Foundation Server Administration Console, enter the alias name in the Server URL text box.
- B. In the Team Foundation Server Administration Console, enter the alias name in the Notification URL text box.
- C. Edit the web.config file of the Team Web Access site to add the alias as an element to the tfServers list.
- D. Edit the web.config file of the Team Web Access site to add a Notification application setting and set it to the alias name.

Answer: B

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
