<http://www.ipass4sure.com/exams.asp?examcode=70-551-CSharp>

The 70-551-CSharp practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 70-551-CSharp Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 70-551-CSharp exam is very challenging, but with our 70-551-CSharp questions and answers practice exam you can feel confident in obtaining your success on the 70-551-CSharp exam on your FIRST TRY!

### Microsoft 70-551-CSharp Exam Features

- Detailed questions and answers for 70-551-CSharp exam
- Try a demo before buying any Microsoft exam
- 70-551-CSharp questions and answers, updated regularly
- Verified 70-551-CSharp answers by Experts and bear almost 100% accuracy
- 70-551-CSharp tested and verified before publishing
- 70-551-CSharp examcollection vce questions with exhibits
- 70-551-CSharp same questions as real exam with multiple choice options

Acquiring Microsoft certifications are becoming a huge task in the field of I.T. More over these exams like 70-551-CSharp exam are now continuously updating and accepting this challenge is itself a task. This 70-551-CSharp test is an important part of Microsoft certifications. We have the resources to prepare you for this. The 70-551-CSharp exam is essential and core part of Microsoft certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 70-551-CSharp Test and save time and money while developing your skills to pass your Microsoft 70-551-CSharp Exam? Let us help you climb that ladder of success and pass your 70-551-CSharp

**QUESTION: 1**

You are creating a custom user control. The custom user control will be used on 10 Web Forms for an ASP. NET Web site that allows users to register and log on to a personalized experience. The custom user control uses two TextBox controls and two Button controls. You need to ensure that the controls are visible only when users are not logged on to the Web site. You also need to minimize the amount of effort in development and maintenance for the Web site. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Add the OnClick event handler for the Login button to the code used in the custom user control.
- B. Add the OnClick event handler for the Login button to the code used in the Web Form where the control is added.
- C. In the Page\_Load method of the Web Form, add a code segment to set the visibility of the TextBox and Button controls where the control is added.
- D. In the Page\_Load method of the custom user control, add a code segment to set the visibility of the TextBox and Button controls.

**Answer:** A,D

**QUESTION: 2**

You create the following Web user control named ErrorMessage.

```
<%@ Control Language="C#" AutoEventWireup="true"
CodeFile="ErrorMessage.ascx.cs" Inherits="ErrorMessage" %>
<script language="C#" runat="server">
protected string m_Text = "This is a default message!";
public string Text {
get {
return m_Text;
}
set {
m_Text = value;
}
}
</script>
```

The ErrorMessage control uses a public property that displays the error message. You need to change the default error message property on the Web Form in which the control is implemented. Which code segment should you use?

- A. <fabrikam:Message id="MyMessage" MyMessage-Text="This is a custom message!" runat="server"/>
- B. <fabrikam:Message id="MyMessage" MessageText="This is a custom message!" runat="server"/>

- C. `<abrikam:Message id="MyMessage" Text="This is a custom message!" runat="server"/>`
- D. `<abrikam:Message id="MyMessage" Message_Text="This is a custom message!" runat="server"/>`

**Answer:** C

**QUESTION: 3**

You develop a Web application. Your application contains two settings in the Web.config file. You deploy your application to production. You need to modify the application settings in the production environment without manually editing the XML markup in the Web.config file. What should you do?

- A. Modify the application settings by using the Web Site Administration Tool.
- B. Modify the application settings by using the Visual Studio property page editor for the project.
- C. Modify the application settings by using the resource editor.
- D. Modify the application settings by using the Visual Studio start options editor.

**Answer:** A

**QUESTION: 4**

You create a Web Form. The Web Form calls a method as part of its processing. The method takes a long time to process. In addition, the other Web Forms in the ASP.NET Web site are now taking longer to process. You need to decrease the page response times by executing the long running method in parallel to other requests. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Call the method by using the BeginGetAysncData and EndGetAsyncData delegates.
- B. Call the method within the PreInit and PreRenderComplete page events.
- C. Inside the page directive of the Web Form that calls the method, set the Async attribute to True.
- D. Inside the page directive of the Web Form that calls the method, set the CompilationMode attribute to Always.

**Answer:** A,C

**QUESTION: 5**

Your Web site uses custom Themes. Your Web site must support additional Themes based on the user's company name. The company name is set when a user logs on to the Web site. The company's Theme name is stored in a variable named ThemeName. You need to use this variable to dynamically set the Web site's Theme. What should you do?

- A. Add the following code segment to the markup source of each page on the Web site. `<%@ Page Theme="ThemeName" ... %>`
- B. Add the following code segment to the Load event of each page on the Web site. `Page.Theme = ThemeName;`
- C. Add the following code segment to the PreInit event of each page on the Web site. `Page.Theme = ThemeName;`
- D. Add the following code segment to the Web site's configuration file. `<pages theme="ThemeName" />`

**Answer:** C

**QUESTION: 6**

A test team plans to conduct performance testing on a Web site that is deployed on a staging server. The test team needs to modify the deployed Web Forms to test different scenarios. You need to deploy the Web site to the staging server without the Web site's source code files. What should you do?

- A. Compile the Web site in Microsoft Visual Studio 2005 by selecting Build Solution.
- B. Use the Copy Web tool.
- C. Use the Publish Web tool and select Allow this precompiled site to be updateable.
- D. Use `aspnet_compiler.exe` with the default options.

**Answer:** C

**QUESTION: 7**

You create a large, n-tier Web application that has a custom event tracking system. You need to create a custom event type that enables your event tracking system to record all relevant event details for all types of events. The events must be stored in Microsoft SQL Server. From which base type should your custom event type inherit?

- A. `IWebEventCustomEvaluator`
- B. `WebEventProvider`
- C. `WebBaseEvent`
- D. `WebAuditEvent`

**Answer: C**

**QUESTION: 8**

You create a Web site that you must copy from a development server to a testing server, along with all source files. You do not have terminal access to the testing server. You need to create the virtual directory. Then you must copy the Web site to the virtual directory on the testing server without precompiling the site. What should you do?

- A. Use the Publish Web tool.
- B. Use the Copy Web tool.
- C. Use the command line to XCOPY the files.
- D. Create a Web Setup project.

**Answer: B**

**QUESTION: 9**

You are deploying a Web site to a server managed by a hosting company. The only access you have to the server is through FTP. You need to precompile and deploy the Web site without its source files. What should you do?

- A. Use the Copy Web tool.
- B. Use the Publish Web tool.
- C. Use XCOPY.
- D. Use the Web Setup project Installer.

**Answer: B**

**QUESTION: 10**

You create a Web application. The Web application enables users to change fields in their personal profiles. Some of the changes are not persisting in the database. You need to raise a custom event to track each change that is made to a user profile so that you can locate the error. Which event should you use?

- A. WebAuditEvent
- B. WebEventManager
- C. WebBaseEvent
- D. WebRequestEvent

**Answer: C**

**QUESTION: 11**

You create a Web Form. You add the following CreateUserWizard server control to the Web Form.

```
<asp:CreateUserWizard runat="server" ID="CU1"
FinishCompleteButtonText="Continue">
<WizardSteps>
<asp:CreateUserWizardStep ID="CWS1" Runat="server" Title="New Account"/>
<asp:WizardStep ID="CWS2" Title="More Info" StepType="Step">
Given Name:<asp:TextBox runat="server" ID="txtGivenName" />
Last Surname:<asp:TextBox runat="server" ID="txtSurname" />
</asp:WizardStep>
<asp:CompleteWizardStep ID="CWS3" Runat="server" Title="Complete"/>
</WizardSteps>
</asp:CreateUserWizard>
```

You need to write code that redirects users to the first page of the wizard after they click the Continue button on the last page. Which code segment should you use?

- A. void CU1\_FinishButtonClick(object sender, WizardNavigationEventArgs e) { CU1.ActiveStepIndex = 1;}
- B. void CU1\_ContinueButtonClick(object sender, EventArgs e) { CU1.ActiveStepIndex = 1;}
- C. void CU1\_NextButtonClick(object sender, WizardNavigationEventArgs e) { CU1.ActiveStepIndex = 0;}
- D. void CU1\_ContinueButtonClick(object sender, EventArgs e) { CU1.ActiveStepIndex = 0;}

**Answer: D**

**QUESTION: 12**

You create a Web site that is for members only. The behavior of the Web site changes according to the role of the user. The Web site uses the ASP.NET Membership control for creation of user accounts. You need to find out whether a user is a member of a particular role. What should you do?

- A. Pass the user names and passwords to Membership.ValidateUser.
- B. Pass the role names to User.IsInRole.
- C. Pass the role names to Roles.RoleExists.
- D. Pass the user names to Membership.GetUser.

**Answer: B**

## Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
