# 70-660

## Microsoft

*UPGRADE: Transition your MCPD Enterprise Application Developer Skills to MCPD Enterprise Application Developer 3.5, Part 2*

<http://www.ipass4sure.com/exams.asp?examcode=70-660>

The 70-660 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 70-660 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 70-660 exam is very challenging, but with our 70-660 questions and answers practice exam, you can feel confident in obtaining your success on the 70-660 exam on your FIRST TRY!

### Microsoft 70-660 Exam Features

- Detailed questions and answers for 70-660 exam
- Try a demo before buying any Microsoft exam
- 70-660 questions and answers, updated regularly
- Verified 70-660 answers by Experts and bear almost 100% accuracy
- 70-660 tested and verified before publishing
- 70-660 examcollection vce questions with exhibits
- 70-660 same questions as real exam with multiple choice options

Acquiring Microsoft certifications are becoming a huge task in the field of I.T. More over these exams like 70-660 exam are now continuously updating and accepting this challenge is itself a task. This 70-660 test is an important part of Microsoft certifications. We have the resources to prepare you for this. The 70-660 exam is essential and core part of Microsoft certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 70-660 Test and save time and money while developing your skills to pass your Microsoft 70-660 Exam? Let us help you climb that ladder of success and pass your 70-660 now!

**QUESTION: 1**

You are the IT professional who work in an International company named Wiikigo. You are experienced in troubleshooting operating systems and applications that are not working correctly, identifying code defects and so on. You have enough knowledge on windows internals and you provide technical support for the company. You are in charge of an application. This application runs at a customer's site. Because of heap corruption, the application crashes intermittently. In order to enable yourself to check and resolve the heap corruption, you ask the customer to have full page heap enabled on the application process. You receive a user dump file from the customer. What you should do is to make it clear at the time that the user dump was created, whether the full page heap was enabled. Of the following WinDbg commands, which one should be used?

- A. !vm should be used.
- B. !gflag should be used.
- C. !heap should be used.
- D. !verifier should be used.

**Answer: B**

**QUESTION: 2**

You are the IT professional who work in an International company named Wiikigo. You are experienced in troubleshooting operating systems and applications that are not working correctly, identifying code defects and so on. You have enough knowledge on windows internals and you provide technical support for the company. There is a computer named c01. Windows Server 2008 is run by C01. Now you are using WinDbg to debug C01. You find that one thread is waiting for a critical section. This section is owned by another thread. You have to locate the critical section. Of the following WinDbg commands, which one should be used?

- A. You should choose to use.thread
- B. You should choose to use !deadlock
- C. You should choose to use!kdext.locks
- D. You should choose to use!ntsdexts.locks

**Answer: D**

**QUESTION: 3**

You are the IT professional who work in an International company named Wiikigo. You are experienced in troubleshooting operating systems and applications that are not working correctly, identifying code defects and so on. You have enough knowledge on windows internals and you provide technical support for the company. There is a colleague named Jason in the company. He has a computer named C01. C01 runs Windows Vista. He finds that a service process is using 100 percent of the processor. He has to force a process dump

of the service, meanwhile the service is consuming 100 percent of the processor. He has no idea about which tool he should use. Since you are the technical support, he asks for your answer. So which of the following tools should be used?

- A. He should choose to use Umdh.exe
- B. He should choose to use Tlist.exe
- C. He should choose to use Pview.exe
- D. He should choose to use Adplus.vbs

**Answer:** D

**QUESTION:** 4

You are the IT professional who work in an International company named Wiikigo. You are experienced in troubleshooting operating systems and applications that are not working correctly, identifying code defects and so on. You have enough knowledge on windows internals and you provide technical support for the company. According to the company requirement, you are debugging a Windows device driver. An unexpectedly long delay occurs on the device driver. You locate the problem in the following synchronization mechanism.

```
kd> dt var_sema
Local var @ 0xf9dfbc48 Type _KSEMAPHORE
+0x000 Header : _DISPATCHER_HEADER
+0x010 Limit : 2
kd> dt nt!_DISPATCHER_HEADER f9dfbc48
+0x000 Type : 0x5 "
+0x001 Absolute : 0xe6 "
+0x002 Size : 0x5 "
+0x003 Inserted : 0xbb "
+0x004 SignalState : 0
+0x008 WaitListHead : _LIST_ENTRY [ 0x819ca438 - 0x819ca438 ]
kd> dt nt!_KWAIT_BLOCK 0x819ca438
+0x000 WaitListEntry : _LIST_ENTRY [ 0xf9dfbc50 - 0xf9dfbc50 ]
+0x008 Thread : 0x819ca3c8 _KTHREAD
+0x00c Object : 0xf9dfbc48
+0x010 NextWaitBlock : 0x819ca480 _KWAIT_BLOCK
+0x014 WaitKey : 0
+0x016 WaitType : 1
kd> dt nt!_KWAIT_BLOCK 0xf9dfbc50
+0x000 WaitListEntry : _LIST_ENTRY [ 0x819ca438 - 0x819ca438 ]
+0x008 Thread : 0x00000002 _KTHREAD
+0x00c Object : 0xfd050f80
+0x010 NextWaitBlock : 0xffffffff _KWAIT_BLOCK
+0x014 WaitKey : 0
+0x016 WaitType : 0
```

You have to find out the number of threads that the semaphore currently has waiting. How many threads does the semaphore currently have waiting?

- A. 0
- B. 1
- C. 2
- D. 4
- E. 5

**Answer:** B

**QUESTION: 5**

You are the IT professional who work in an International company named Wiikigo. You are experienced in troubleshooting operating systems and applications that are not working correctly, identifying code defects and so on. You have enough knowledge on windows internals and you provide technical support for the company. According to the company requirement, an I/O dispatch routine is being written by you for a Windows device driver. buffered I/O is supported by the device driver. 1 KB of data to the user process is transferred by the dispatch routine. The kernel address of the 1-KB buffer needs to be retrieved from the I/O request packet (IRP). Which field of the IRP contains the kernel address?

- A. Irp->UserBuffer
- B. Irp->Overlay.UserApcContext
- C. Irp->Tail.Overlay.DriverContext[0]
- D. Irp->AssociatedIrp.SystemBuffer

**Answer:** D

**QUESTION: 6**

You are the IT professional who work in an International company named Wiikigo. You are experienced in troubleshooting operating systems and applications that are not working correctly, identifying code defects and so on. You have enough knowledge on windows internals and you provide technical support for the company. You are in charge of a multithreaded application. Now is being tested by you. You have to use Perfmon to test the application for heap leaks. Of the following counters, which one should be monitored?

- A. Process\Private Bytes
- B. Memory\Available Bytes
- C. Memory\Committed Bytes
- D. Process\Pool Paged Bytes

**Answer:** A

**QUESTION:** 7

You are the IT professional who work in an International company named Wiikigo. You are experienced in troubleshooting operating systems and applications that are not working correctly, identifying code defects and so on. You have enough knowledge on windows internals and you provide technical support for the company. For a hardware device, you are developing a Windows device driver. You will install the device driver and hardware device on computers that run Windows Server 2008. Now you have to find out the amount of time that the processor uses to receive and process interrupts. Which of the following tools should be used?

- A. You should choose to use Pview.exe
- B. You should choose to use Taskmgr.exe
- C. You should choose to use Eventvwr.msc
- D. You should choose to use Perfmon.msc

**Answer:** D

**QUESTION:** 8

You are the IT professional who work in an International company named Wiikigo. You are experienced in troubleshooting operating systems and applications that are not working correctly, identifying code defects and so on. You have enough knowledge on windows internals and you provide technical support for the company. You are writing a user application that runs on Windows Server 2003. According to the company requirement, a user application is being written by you. This application runs on Windows Server 2003. User authentication is need by the design specification for the application. You must make sure that each time the application is started, a local user name and password is entered by users. So which routine should be used?

- A. CredUIParseUserName()should be used.
- B. LsaRegisterLogonProcess()should be used.
- C. CredReadDomainCredentials() should be used.
- D. CredUIPromptForCredentials()should be used.

**Answer:** D

**Explanation:**

The correct answer is a, because the creduipromptforcredentials function is designated for creating and displaying a configurable dialog box that accepts credentials information from a user. the answer c is incorrect, because the credreaddomaincredentials function is designated for reading the domain credentials from the user's credential set. the answer d is incorrect, because the creduiparseusername function is designated for extracting the domain

## Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
