Exam Name:	Microsoft Lync Server 2010, Configuring	Exam Code:	70-664
Exam Type:	Microsoft	Total Questions:	49
Certification:	Microsoft Certified Technology Specialist (MCTS)		

Question: 1

You work as a Network Administrator at ABC.com. You have been asked to deploy Lync Server 2010 as a VOIP telephony and video conferencing solution for the company. Company management is concerned about the possible network load imposed by the VoIP and video conferencing features of Lync Server 2010. To manage the network bandwidth used by the system, you configure Call Admission Control. How can you enable the Call Admission Control feature?

- A. By running the Set-CsNetworkInterSitePolicy cmdlet.
- B. By running the Set-CsNetworkConfiguration cmdlet.
- C. By running the Set-CsCpsConfiguration cmdlet.
- D. By running the Set-CsVoiceConfiguration cmdlet.

Answer: B

Question: 2

You work as a Network Administrator at ABC.com. The company's communication system is provided by a Lync Server 2010 infrastructure. You have configured a bandwidth policy to limit the network bandwidth used by real-time audio and video sessions. You want to override the policy for the Managing Director of the company. What type of policy should you create first to enable you to override the bandwidth policy for the Managing Director?

- A. You should first create a Conferencing Policy.
- B. You should first create a Client Version Policy.
- C. You should first create a Voice Policy.
- D. You should first create an External Access Policy.

Answer: C

Question: 3

You work as a Network Administrator at ABC.com. You are configuring a new Lync Server 2010 infrastructure. You want the company phone number to be displayed in the format +11112222333 when users on the Public Switched Telephone Network (PSTN) receive calls from users using the Lync Server system. Which cmdlet should you run?

- A. You should run the Set-CsVoiceConfiguration cmdlet.
- B. You should run the Set-CsNetworkInterSitePolicy cmdlet.
- C. You should run the Set-CsVoicePolicy cmdlet.
- D. You should run the Set-CsLocationPolicy cmdlet.

Answer: C

Question: 4

Your work as a Network Administrator at ABC.com includes the management of the Lync Server 2010 infrastructure. The Lync Server 2010 infrastructure includes a Mediation Server pool that includes three servers named TK-Med1, TK-Med2 and TK-Med3. You need to take TK-Med3 offline for maintenance. Which two of the following steps should you perform to allow you to take TK-Med3 offline without disconnecting any current calls in progress?

- A. Navigate to the Lync Server 2010 Topology Builder.
- B. Navigate to the Lync Server 2010 Control Panel.
- C. Modify the properties of the Mediation Pool.
- D. Modify the properties of TK-Med3.
- E. Create a new Mediation Pool.
