70-668

Microsoft
PRO: Microsoft SharePoint 2010, Administrator

http://www.ipass4sure.com/exams.asp?examcode=70-668

The 70-668 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 70-668 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 70-668 exam is very challenging, but with our 70-668 questions and answers practice exam, you can feel confident in obtaining your success on the 70-668 exam on your FIRST TRY!

Microsoft 70-668 Exam Features

- Detailed questions and answers for 70-668 exam
- Try a demo before buying any Microsoft exam
- 70-668 questions and answers, updated regularly
- Verified 70-668 answers by Experts and bear almost 100% accuracy
- 70-668 tested and verified before publishing
- 70-668 examcollection vce questions with exhibits
- 70-668 same questions as real exam with multiple choice options

Acquiring Microsoft certifications are becoming a huge task in the field of I.T. More over these exams like 70-668 exam are now continuously updating and accepting this challenge is itself a task. This 70-668 test is an important part of Microsoft certifications. We have the resources to prepare you for this. The 70-668 exam is essential and core part of Microsoft certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 70-668 Test and save time and money while developing your skills to pass your Microsoft 70-668 Exam? Let us help you climb that ladder of success and pass your 70-668 now!

Exam Name:	PRO: Microsoft SharePoint 2010, Administrator		
Exam Type:	Microsoft		
Exam Code:	70-668	Total Questions:	125

Question: 1
You are a SharePoint administrator for Fabrikam, Inc. The company has a main office and three branch offices. The main office is located in Paris. The branch offices are located in New York, Tokyo, and Toronto. The company has 2,000 employees. You plan to deploy two SharePoint Server 2010 server farms. One farm will host a corporate intranet Web site and one farm will host a public Web site. The intranet will be used for collaboration and Web content management. Content Management Requirements Fabrikam has the following content management requirements for the planned SharePoint Server 2010 deployment: .Users respond to numerous requests for proposals (RFPs). Many documents are generated for each RFP. These documents must be grouped logically and must share metadata. .Users must be able to access all RFP documents from a Welcome Page. .Some of the content on the intranet site must be published automatically to the public site. .The intranet site and the public site must have the same taxonomy. .The taxonomy must be managed centrally. .Documents that are uploaded to the server farm must be classified according to the hierarchical taxonomy. .Users in the Tokyo office must be able to translate content on the intranet site from English to Japanese. The users must also be able to create content in Japanese. .A project site template named ProjectSite.wsp must be used by all of the collaboration sites. Technical Requirements Fabrikam has the following technical requirements for the planned SharePoint Server 2010 deployment: .Administrators must be able to backup and restore the public site and the intranet site separately. .Users must be able to access the intranet site and the public site if a single server fails. .Backups must run automatically. Security Requirements All servers that contain data used by the public site must be physically isolated from the internal servers.
You need to recommend a monitoring solution that meets the company's technical requirements. What should you recommend?

A. Web analytics reports
B. Performancepoint services
C. Information management policy usage reports
D. Diagnostic logging

Answer: D

Question: 2
You are a SharePoint administrator for Fabrikam, Inc. The company has a main office and three branch offices. The main office is located in Paris. The branch offices are located in New York, Tokyo, and Toronto. The company has 2,000 employees. You plan to deploy two SharePoint Server 2010 server farms. One farm will host a corporate intranet Web site and one farm will host a public Web site. The intranet will be used for collaboration and Web content management. Content Management Requirements Fabrikam has the following content management requirements for the planned SharePoint Server 2010 deployment: .Users respond to numerous requests for proposals (RFPs). Many documents are generated for each RFP. These documents must be grouped logically and must share metadata. .Users must be able to access all RFP documents from a Welcome Page. .Some of the content on the intranet site must be published automatically to the public site. .The intranet site and the public site must have the same taxonomy. .The taxonomy must be managed centrally. .Documents that are uploaded to the server farm must be classified according to the hierarchical taxonomy. .Users in the Tokyo office must be able to translate content on the intranet site from English to Japanese. The users must also be able to create content in Japanese. .A project site template named ProjectSite.wsp must be used by all of the collaboration sites. Technical Requirements Fabrikam has the following technical requirements for the planned SharePoint Server 2010 deployment: .Administrators must be able to backup and restore the public site and the intranet site separately. .Users must be able to access the intranet site and the public site if a single server fails. .Backups must run automatically. Security Requirements All servers that contain data used by the public site must be physically isolated from the internal servers. You need to recommend a solution to simplify the management of RFPs and related documents. What should you recommend?

A. The Record Center site template
B. Content deployment paths
C. An information management policy
D. A custom Document Set content type

Answer: A

Question: 3
You have a SharePoint Server 2010 server farm that contains one Web server. The Web server has only one IP address. You plan to implement the following Web applications:
http://portal.contoso.com .http://intranet.contoso.com .http://www.contoso.com You need to recommend a solution to ensure that users can access all three Web applications. What should you include in the solution?

A. Host headers
B. Handler mappings
C. Extended zones
D. Alternate access mappings

Answer: D

Question: 4
You are a SharePoint administrator for A. Datum Corporation. The company has a main office and a branch office. The company has 2,000 users. Current Environment You plan to upgrade the Microsoft Office SharePoint Server 2007 server farm to SharePoint Server 2010. The branch offices use a third-party Lightweight Directory Access Protocol (LDAP) solution to authenticate users. SharePoint Server 2007 Configuration The SharePoint Server 2007 environment includes the servers configured as shown in the following table.
Server nameServer operating systemServer roles Server1Windows Server 2003 (32-bit)Web, query, index Server2Windows Server 2003 (32-bit)Web, query, index Server3Windows Server 2003 (64-bit)Database Server1 and Server2 are configured to use a hardware load balancer. Server3 runs Microsoft SQL Server 2000 (64-bit).

Technical Requirements
You plan to create a site collection for the company's pricing information. Documents in the site collection that remain unmodified for 90 days must be deleted automatically. The documents in all other site collections must be retained. Every 120 days, site collection administrators must confirm that their site collections are still in use. If the site collection administrators fail to confirm that their sites are in use, the sites must be deleted automatically. Security Requirements A. Datum has the following security requirements for the planned SharePoint Server 2010 deployment: .Users must be assigned the most restrictive permissions possible. .The deployment must support authentication for all branch office users. .Support for the branch office users must not require changes to the client computers. .All authentications to access SharePoint Server 2010 must use a cryptographic exchange. User Requirements A. Datum has the following user requirements for the planned SharePoint Server 2010 deployment: .Users must be able to create sites without any help from an administrator. .Users must be able to search for documents in the server farm if a single SharePoint Web server fails. You need to recommend changes to Server3 to support the SharePoint Server 2010 deployment. Your solution must minimize costs. What should you recommend?

A. Install microsoft sql server 2000 data transformation services (dts) on server3.
B. Upgrade the sql server on server3 to microsoft sql server 2005.
C. Upgrade server3 to windows server 2003 r2 (64-bit).
D. Upgrade server3 to windows server 2008 (64-bit).

Answer: C

Question: 5
You are a SharePoint administrator for A. Datum Corporation. The company has a main office and a branch office. The company has 2,000 users. Current Environment You plan to upgrade the Microsoft Office SharePoint Server 2007 server farm to SharePoint Server 2010. The branch offices use a third-party Lightweight Directory Access Protocol (LDAP) solution to authenticate users. SharePoint Server 2007 Configuration The SharePoint Server 2007 environment includes the servers configured as shown in thefollowing table. Server nameServer operating systemServer roles Server1Windows Server 2003(32-bit)Web, query, index Server2Windows Server 2003 (32-bit)Web, query, index Server3Windows Server 2003 (64-bit)Database Server1 and Server2 are configured to use a hardware load balancer. Server3 runs Microsoft SQL Server 2000 (64-bit).

Technical Requirements
You plan to create a site collection for the company's pricing information. Documents in the site collection that remain unmodified for 90 days must be deleted automatically. The documents in all other site collections must be retained. Every 120 days, site collection administrators must confirm that their site collections are still in use. If the site collection administrators fail to confirm that their sites are in use, the sites must be deleted automatically. Security Requirements A. Datum has the following security requirements for the planned SharePoint Server 2010 deployment: .Users must be assigned the most restrictive permissions possible. .The deployment must support authentication for all branch office users. .Support for the branch office users must not require changes to the client computers. .All authentications to access SharePoint Server 2010 must use a cryptographic exchange. User Requirements A. Datum has the following user requirements for the planned SharePoint Server 2010 deployment: .Users must be able to create sites without any help from an administrator. .Users must be able to search for documents in the server farm if a single SharePoint Web server fails. You need to ensure that users can receive search results for all content in the organization if a single server fails. What should you do?

A. Create multiple server name mappings.
B. Implement query component mirroring.
C. Implement host distribution rules.
D. Add a new crawl component.

Answer: C

Question: 6
You are a SharePoint administrator for Litware, Inc. The company has a main office and a branch office. The company has 14,000 employees. You plan to deploy a SharePoint Server 2010 server farm. Employees of the company's business partners will require access to the SharePoint farm. Network Configurations Litware has the following network configurations: .The main office contains multiple servers. .Litware has Microsoft System Center Data Protection Manager deployed. .The main office connects to the branch offices by using a slow WAN link. .The branch office contains a file server. The file server contains numerous files that are frequently updated. The network contains an internal network and a perimeter network. The internal network and the perimeter network are separated by a firewall. Search Requirements Files stored on the file server in the branch office must be searchable by using SharePoint. Updated content must be included in search results within four hours of being updated.

Monitoring Requirements
Litware must have a centralized monitoring solution. The solution must be able to monitor the server farm for configuration, security, and performance problems. Compliance Requirements Litware has the following compliance requirements for the planned SharePoint Server 2010

deployment: .Users must not be able to print confidential documents that are stored in SharePoint sites. .Site members must be able to recover all of the content that they have deleted from the SharePoint sites for as many as two years after the deletion.

Security Requirements
Litware has the following security requirements for the planned SharePoint Server 2010 deployment: .Only required TCP/IP ports must be opened on the firewall. .Access to the SharePoint sites via the Internet must use client Certificates authentication. .Users on the internal network must use Kerberos authentication to access the SharePoint sites. .User authorization management must require the minimum amount of configuration and ongoing maintenance
You need to design an authentication solution to provide users with access to the SharePoint sites from the Internet. What should you include in the solution?

A. The Secure Store Service application
B. The Access Services service application
C. Active Directory Rights Management Services (AD RMS)
D. Active Directory Certificate Services (AD CS)

Answer: A

Question: 7
You are a SharePoint administrator for Trey Research. You plan to upgrade the existing Microsoft Office SharePoint Server 2007 environment to SharePoint Server 2010. Server Configurations The SharePoint Server 2007 environment includes the servers configured as shown in the following table. Server nameServer operating systemServer role Server1Windows Server 2003 (32-bit)Web, query, index Server2Windows Server 2003 (32-bit)Web, query, index Server3Windows Server 2003 (64-bit)Microsoft SQL Server 2005 The Current Environment does not use Excel Services, InfoPath Forms Services, or the Business Data Catalog. The SharePoint sites are accessed via a hardware load balancer. Business Continuity Requirements Business critical SharePoint lists must be backed up and restored independently of other SharePoint content. Restored lists must retain their list views and alerts. SharePoint patches and service packs must be tested before they are deployed to the production environment.

Departmental Requirements
Trey Research has the following departmental requirements for the planned SharePoint Server 2010 deployment: .Human resources department documents must only be accessible to users in the human resources department. .Accounting department documents must only be accessible to users in the accounting department. .Users in each department must be able to create and use their own search scopes. .Users in each department must be able to manage their own search keywords. User Requirements Trey Research uses a custom content type for its research department documents. Research department documents must be created across multiple site collections. You must be able to use the same content type across multiple site collections. You must use the minimum amount of administrative effort to move content to the SharePoint Server 2010 environment. Users must be able to search all of the SharePoint content from a single Web Part. Searches must include results from Bing.com. You need to design a maintenance strategy that meets the company's business continuity requirements.What should you include in the strategy?

A. Separate site collections
B. Sandboxed solutions
C. An additional web server
D. A separate server farm

Answer: A

Question: 8
You plan to deploy a SharePoint Server 2010 server farm. The farm will contain a Web
application for an intranet site and a Web application for an extranet site. The intranet will contain
the following three content areas: .Human resources .Finance .Operations The extranet will
contain the following two content areas: .Partners .Customers All content databases will be
backed up by using Microsoft SQL Server. You need to recommend the minimum number of site
collections required for the farm. You must ensure that each content area can be restored
independently. How many site collections should you recommend?

A. 7
B. 5
C. 2
D. 1

Answer: C

Question: 9
You are a SharePoint administrator for Northwind Traders. The company has 20,000 employees
distributed across 11 different departments. You plan to implement a SharePoint Server 2010
server farm for internal collaboration. Active Directory Configurations Northwind Traders has the
following Active Directory configurations: .User attributes are stored in Active Directory. .Active
Directory group membership is based on the company's departments. Business Requirements
Northwind Traders has the following business requirements for the planned SharePoint Server
2010 deployment: .Custom workflows must be reused across multiple document libraries.
.Human resources content must always have the highest relevancy in search results. Users who
have no development experience must be able to create custom workflows. .The initial
deployment must contain 500GB of data and must support as much as 5 terabytes of content.
Technical Requirements Northwind Traders has the following technical requirements for the
planned SharePoint Server 2010 deployment: .Databases must not exceed 100GB. .SharePoint
Server 2010 processes must be evenly distributed across the servers in the server farm. .All
changes to the user profile attributes in My Sites must be updated automatically in Active
Directory. .To support backup and restore procedures, all databases must be created during the
implementation phase of SharePoint Server 2010. Security Requirements Northwind Traders has
the following security requirements for the planned SharePoint Server 2010 deployment: .All
users in the same department must share the same level of access to site content. .Users in the
human resources department must be prevented from browsing accounting department
documents. User Requirements Northwind Traders has the following user requirements for the
planned SharePoint Server 2010 deployment: .All customizations must be authored by a single
team of developers. .All customizations must be deployed by the site collection administrators.
You need to identify the minimum number of content databases required for the planned
SharePoint Server 2010 deployment. How many content databases should you identify?

A. 50
B. 11
C. 5
D. 1

Answer: D

Question: 10
You are a SharePoint administrator for Wingtip Toys. The company has a main office and 10
distribution centers. The main office is located in Miami. The company has 36 departments. Each
department has a department manager. Current Environment You have a Microsoft Office
SharePoint Server 2007 server farm. All users authenticate to external data sources by using
Single Sign-On (SSO). You plan to upgrade the server farm to SharePoint Server 2010.

SharePoint Server 2007 Configurations The SharePoint Server 2007 environment contains the servers configured as shown in the following table. Server nameServer operating systemServer role Server1Windows Server 2003 (64-bit)Web, query Server2Windows Server 2003 (64-bit)Web, query Server3Windows Server 2008 (64-bit)Index Server4Windows Server 2008 (64-bit)Web for crawling Server5Windows Server 2003 (64-bit)Database Server5 runs Microsoft SQL Server 2005 (64-bit). Business Requirements Wingtip Toys has the following business requirements for the planned SharePoint Server 2010 deployment: .Each department must have a separate workspace. .All taxonomies must be available to all authenticated users. .Users must be able to access the external data sources after the server farm is upgraded to SharePoint Server 2010. Taxonomy Requirements Wingtip Toys has the following taxonomy requirements for the planned SharePoint Server 2010 deployment: .Taxonomies must not be replicated. .All legal documents must be maintained in a dedicated taxonomy for the legal department. .All financial documents must be maintained in a dedicated taxonomy for the financial department. .All other company documents must be maintained in a dedicated taxonomy named Corporate. Technical Requirements Wingtip Toys has the following technical requirements for the planned SharePoint Server 2010 deployment: .You must be able to monitor all performance counters and Windows events. .A monitoring and alerting solution must be available for all servers in the farm. .Page and output caching must be available for all users in the distribution centers. Security Requirements Wingtip Toys has the following security requirements for the planned SharePoint Server 2010 deployment: .Only a user named User1 must be able to manage the corporate taxonomy. .The financial and legal departments must be able to manage only their respective department taxonomies. User Requirements Wingtip Toys has the following user requirements for the planned SharePoint Server 2010 deployment: .Searches must be available and up-to-date from 05:00 to 22:00, Monday to Friday. .New content must be included in search results within 30 minutes of being added to the SharePoint Server 2010 servers. The indexing of new content must continue if a crawl server fails You need to recommend a search solution that meets the company's user requirements. You must minimize the amount of effort required to administer a search. What should you include in the solution?

A. .Two query servers .two crawl servers .two index partitions .one mirrored property database .one mirrored crawl database
B. .Two query servers .two crawl servers .one mirrored index partition .two property databases .two crawl databases
C. .Two query servers .two crawl servers .one mirrored index partition .one mirrored property database .one mirrored crawl database
D. .Two query servers .one crawl server .one mirrored index partition .two property databases .one crawl database

Answer: C

Question: 11
You plan to deploy SharePoint Server 2010 and to enable self-service site creation. You need to recommend a Web application configuration to meet the following requirements: .Users must be allowed to create site collections. .Site collections created by Web developers must be deleted manually. .Site collections created by managers must be deleted automatically if they are not used for 120 days. .Site collections created by other users must be deleted automatically if they are not used for 60 days. .The number of site collections must be minimized. What should you include in the recommendations?

A. Three web applications that each contains one site collection
B. One web application that contains three site collections
C. One web application that contains one site collection and one web application that contains two site collections
D. One web application and one site collection
