**Question: 1**

A company has 100 client computers that run Windows XP 64-bit Edition. You are deploying new computers that run a 32-bit version of Windows 8. You need to transfer the contents of each user's Documents folder to the new computer by using the least amount of administrative effort. What should you do?

- A. Back up the folders by running the NTBackup command. Then restore the backup to the new computer.
- B. Use the User State Migration Tool.
- C. Use Windows Easy Transfer.
- D. Manually copy the folder content to a USB flash drive. Then paste the files to the new computer.

---

**Answer: B**

---

**Question: 2**

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 7. You plan to upgrade the client computers to Windows 8 Pro. You need to choose the methods that do not require the manual entry of a product key during the upgrade. Which two methods should you choose? (Each correct answer presents a complete solution. Choose two.)

- A. Use the Microsoft Deployment Toolkit.
- B. Use the Windows 8 online upgrade tool.
- C. Use Group Policy to assign the Windows 8 installation file to the client computers.
- D. Extract the contents of the Windows 8 .iso image file to a new shared folder and run the setup program from that folder.

---

**Answer: A AND B**

---

**Question: 3**

A client laptop runs Windows 7 Professional and a custom application. The custom application is compatible with Windows 8. You plan to migrate user settings and data from the client laptop to a new tablet PC that runs Windows 8 Pro. You install the User State Migration Toolkit (USMT) on a USB flash drive. You need to ensure that the custom application settings are applied to the tablet PC after the migration is complete. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

- A. Run the scanstate command on the tablet PC.
- B. Run the scanstate command on the laptop.
- C. Install the custom application on the tablet PC.
- D. Uninstall the custom application from the laptop.
- E. Run the loadstate command on the tablet PC.
- F. Run the loadstate command on the laptop.

**Answer: (B BEFORE E) AND  
(C BEFORE E) AND ONLY (B,  
C, E)**

**Question: 4**

You update the video card driver on a portable computer that runs Windows 8. When a user connects the portable computer to an external monitor, the external monitor duplicates the display on the portable computer screen. You need to ensure that the user can display additional desktop space on the external monitor. What should you do?

- A. Start the computer from the Windows 8 installation media and perform a system image recovery.
- B. Run the `sfc /scannow` command.
- C. Roll back the video card driver to the previous version.
- D. Run the `DisplaySwitch /extend` command.

**Answer: D**
