QUESTION 1:

You work as the network administrator at Certkiller .com. The Certkiller .com network consists of a single Active Directory domain named Certkiller .com. You are busy creating a portal solution that will integrate content managed by Microsoft Content Management Server 2002(MCMS). The CEO of Certkiller .com wants the portal solution to view the content seamlessly through the portal, giving the content the same appearance, whether it is managed by MCMS or managed by SharePoint Portal Server. The CEO wants the portal solution to perform full-text searches on the content managed by MCMS.

You then include the portal solution in Microsoft SharePoint Portal Server 2003. You need to include the appropriate features in the MCMS Connector for SharePoint Technologies in your solution.

What qualities should you include? (Choose all that apply.)

- A. Search features
- B. Web Author
- C. Direct Mailer
- D. MCMS Templates

Answer: A, D

QUESTION 2:

You work as the network technician at Certkiller .com. The Certkiller .com network consists of a single Active Directory domain named Certkiller .com.

Certkiller .com consists of a Research department. The department contains a search engine, which the users visit to get information. You are busy creating a portal solution that will integrate content managed by Microsoft Content Management Server 2002(MCMS).

The Certkiller .com administrators and site managers want the portal solution to track how frequently users view specific content. Your solution must also allow the administrators and site managers to track the number of users who visit each site and subsite. You need to provide the required portal-site analysis.

What should you do?

- A. Enable Web Author in MCMS, and select the Diagnostic settings.
- B. Enable Microsoft Windows SharePoint Services logging and usage analysis processing.
- C. Implement the Commerce Server Direct Mailer and Predictor resources on the Web servers.
- D. Create a Business Desk module that extends the management functionality.

Answer: B

QUESTION 3:

You work as the network technician at Certkiller .com. The Certkiller .com network consists of a single Active Directory domain named Certkiller .com.

Certkiller .com consists of a Research department. You are busy creating a Microsoft SharePoint Portal Server 2003 solution that will make use of the Microsoft Single Sign-On service to integrate the portal site with a third-party database system. In addition you want to enable the Single Sign-on service and create an enterprise application definition in your end solution.

You do not want the Certkiller .com users to use separate logon credentials. The portal site must be able to display data stored in the database system. You need to find a way to integrate the third-party database into the solution.

What should you do?

- A. Use patch management and create topics based on the types of Web sites being displayed.
- B. Add a Page Viewer Web Part to display the Web site content.
- C. Create a Web Part that includes a managed group account that can access the third-party system.
- D. Create a Web Part that uses an enterprise application definition to access the third-party system.

Answer: D

QUESTION 4:

You work as the network technician at Certkiller .com. The Certkiller .com network consists of a single Active Directory domain named Certkiller .com.

Certkiller .com consists of a Research department. You create a Microsoft Commerce Server 2002 solution running on SharePortal Server 2003. This will be used to integrate catalog data from a SAP enterprise resource planning (ERP) database with the Commerce Server application database.

You then copy the SAP catalog data to the application by performing the download in batches. You must ensure that your actions or solutions do not disrupt the Commerce Server application for the users.

What should you do to integrate SAP into the portal solution?

- A. Verify that the passwords used for connecting are the same in the configuration set.
- B. Verify that the winbom.ini file includes the correct user name and password to access the share the Commerce Server application.
- C. Create an offline version of the catalog database to receive the SAP data and synchronize the database with the online catalog database.
- D. Enable SharePoint Portal Server gatherer logging, and select the Diagnostic settings.

Answer: C

QUESTION 5:

You work as the network technician at Certkiller .com. The Certkiller .com network consists of a single Active Directory domain named Certkiller .com.

Certkiller .com consists of a Research department. You are planning the development environment for a Microsoft Commerce Server 2002 (MCMS) solution. A new Certkiller .com security policy denies local administrator rights on client computers on the company domain. Users that are not in the Research department should be denied access to the research environment.

The users in the Research department must be able to perform their own debugging of Microsoft ASP.NET applications. You need to ensure that the users in the Research department are able to access resources on the company domain without being required to supply multiple credentials. In your solution you need to recommend the appropriate research environment.

What should you do? (Choose all that apply.)

- A. Do not create a Business Desk module that extends the management functionality.
- B. Create a stand-alone research domain that trusts the company domain.
- C. Create a custom Web Part to display the metadata of the documents as part of the company domain.
- D. Implement the research environment in the stand-alone research domain.
- E. Verify that the StartNet=yes parameter is included in the new domain.

Answer: B, D

QUESTION 6:

You work as the network technician at Certkiller .com. The Certkiller .com network consists of a single Active Directory domain named Certkiller .com.

Certkiller .com consists of a Research department. You create a portal solution built on Microsoft Content Management Server 2002 (MCMS) and Microsoft Commerce Server 2002. The result of must integrate functionality and workflow to support product editing through the Web site.

What should you do to integrate Commerce Server and MCMS to support product editing?

- A. Integrate by using the Data Server share name.
- B. Remove the username and password parameters in the PnPDrivers section by using Content Management Server 2002 Connector for SharePoint Technologies.
- C. Integrate by using Microsoft Solution for Internet Business 2.1.
- D. Integrate the Ad hoc team collaboration by using Integration Web Parts for MCMS and Commerce Server.

Answer: C
