920-333

Nortel

Communication Server 1000 Rls. 5.0 Upgrades for Technicians.

<http://www.ipass4sure.com/exams.asp?examcode=920-333>

The 920-333 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 920-333 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 920-333 exam is very challenging, but with our 920-333 questions and answers practice exam, you can feel confident in obtaining your success on the 920-333 exam on your FIRST TRY!

Nortel 920-333 Exam Features

- Detailed questions and answers for 920-333 exam
- Try a demo before buying any Nortel exam
- 920-333 questions and answers, updated regularly
- Verified 920-333 answers by Experts and bear almost 100% accuracy
- 920-333 tested and verified before publishing
- 920-333 examcollection vce questions with exhibits
- 920-333 same questions as real exam with multiple choice options

Acquiring Nortel certifications are becoming a huge task in the field of I.T. More over these exams like 920-333 exam are now continuously updating and accepting this challenge is itself a task. This 920-333 test is an important part of Nortel certifications. We have the resources to prepare you for this. The 920-333 exam is essential and core part of Nortel certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 920-333 Test and save time and money while developing your skills to pass your Nortel 920-333 Exam? Let us help you climb that ladder of success and pass your 920-333 now!

Question: 1

A customer is upgrading to Communication Server 1000E RIs. 5.0. During their database configuration, they need to ensure that the Emergency Services for Client Mobility feature is supported, but they are uncertain whether their upgrade supports this application. What prompt(s) should be enabled, and what configuration is needed to ensure this support?

- A. ESA must be disabled. Emergency Response Location (ERL), Emergency Caller Location (ECL) and internal Location Information Service (Package 336) must be programmed.
- B. ESA Package 329 must be enabled and programmed, allowing the Emergency Response Location (ERL) and Emergency Caller Location (ECL) and internal Location Information Service (Package 336) to be used.
- C. New System Type 4021 must be activated before the Emergency Response Location (ERL) and Emergency Caller Location (ECL) appear in Web Station.
- D. The addition of HA Package 410 must be activated before the Emergency Response Location (ERL) and Emergency Caller Location (ECL) appear in Web Station.

Answer: B

Question: 2

A customer is upgrading to Communication Server 1000E RIs. 5.0 and installing new 1110E, 1120E and 1140E IP Phones. The customer also wants an Expansion Module for the IP Phone 1100 Series to be used with the 1110E IP telephones. Which must occur to ensure a successful installation process?

- A. Order the correct IP Phone 1100 Series telephones that support the Expansion Module for the IP Phone 1100 Series.
- B. Follow the testing parameters after installing the IP Phone 1110E connected to an Expansion Module for the IP Phone 1100 Series.
- C. Follow the installation procedure for installing the 1110E IP telephones and connecting the Expansion Module for the IP Phone 1100 Series to the 1110E IP telephones.
- D. Determine the proper power requirements since the IP Phone 1110E connection to the Expansion Module for the IP Phone 1100 Series has a unique power requirement.

Answer: A

Question: 3

A customer has multiple Communication Server (CS) 1000Es. When calls are placed on hold, they want to provide the same music network-wide to their calls. Which configuration is needed for this support?

- A. Network Music is provided only to those calls that are transferred to the music source using Release Link Trunk over H.323.
- B. Music Trunks are installed only on the primary node, connecting to an analog TIE trunk using H.323/SIP virtual trunks. Only calls placed on hold at the primary node will receive this specific music source.
- C. Network Time Protocol (NTP) which is used to synchronize local clocks across the network to a single, accurate, third party NTP server, such as a radio clock.
- D. Music Trunks are installed on the remote nodes and connected back-to-back with an analog TIE trunk, which is auto-terminated to the primary DN of a Network Music Agent. When a music trunk is seized, the call is connected to the Audio Server through an H.323/SIP virtual trunk. A network music path is then established.

Answer: D

Question: 4

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
