98-363

Microsoft

Web Development Fundamentals

<http://www.ipass4sure.com/exams.asp?examcode=98-363>

The 98-363 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 98-363 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 98-363 exam is very challenging, but with our 98-363 questions and answers practice exam, you can feel confident in obtaining your success on the 98-363 exam on your FIRST TRY!

Microsoft 98-363 Exam Features

- Detailed questions and answers for 98-363 exam
- Try a demo before buying any Microsoft exam
- 98-363 questions and answers, updated regularly
- Verified 98-363 answers by Experts and bear almost 100% accuracy
- 98-363 tested and verified before publishing
- 98-363 examcollection vce questions with exhibits
- 98-363 same questions as real exam with multiple choice options

Acquiring Microsoft certifications are becoming a huge task in the field of I.T. More over these exams like 98-363 exam are now continuously updating and accepting this challenge is itself a task. This 98-363 test is an important part of Microsoft certifications. We have the resources to prepare you for this. The 98-363 exam is essential and core part of Microsoft certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 98-363 Test and save time and money while developing your skills to pass your Microsoft 98-363 Exam? Let us help you climb that ladder of success and pass your 98-363 now!

QUESTION: 1

You work as a Web developer for ABC.com. You need to implement a page event that fires after the event-handling process. Which page event should you use?

- A. The LoadComplete event would be raised.
- B. The Trace.axd event would be raised.
- C. The OnEnd event would be raised.
- D. The InitComplete event would be raised.

Answer: A

Explanation:

The LoadComplete event is raised when all postback data and view-state data is loaded into the page after the OnLoad method is used to invoke all controls of the page.

QUESTION: 2

You need to implement an authentication method for the ABC.com website that uses tickets to track a logged in visitor's activity on the website. Which of the authentication methods should be utilized?

- A. You should consider utilization of Forms authentication.
- B. You should consider utilization of Kerberos authentication.
- C. You should consider utilization of the EAP protocol.
- D. You should consider utilization of Integrated Windows authentication.

Answer: A

Explanation:

By utilization of Forms authentication you ensure that network users utilize an authentication ticket created when a user logs on to a site. You should additionally note that the authentication ticket can be utilized to tracks the user throughout the site.

QUESTION: 3

How would you enable debugging diagnostics and tracing on a Web application. Which administrative action or actions enables tracing? (Choose TWO.)

- A. You should consider modification of the Web.config file or create a new file in the root utilizing XML code if no Web.config file exists.
You should additionally set the envlred attribute to true in the trace element.
- B. You should consider the addition of a trace element as a child of the system.web element after which a trace element PageOutput attribute is set to true.
- C. You should consider making changes to the HOSTS file of network users.
- D. You should consider creating a file in the root folder utilizing XML code to implement tracing.

Answer: A, B

Explanation:

You should note that Tracing is a feature in ASP.NET that can be utilized to allow developers to view diagnostic information about a single request for an ASP.NET page. You should additionally note that be configuring tracing developers are allowed to write debug statements directly in the code.

QUESTION: 4

You work for a Web solution development company named ABC.com. ABC.com wants you to develop a ScriptManager solution for retrieving the ScriptReferenceCollection object rendered to the website visitor. Which ScriptManager properties should be utilized?

- A. The ScriptManager.Scripts property would be utilized.
- B. The ScriptManager.Events property would be utilized.
- C. The ScriptManager.Handler property would be utilized.
- D. The ScriptManager.Solution property would be utilized.

Answer: A

Explanation:

The ScriptManager.Scripts property is utilized to returns an object part of a collection of ScriptReference objects which in fact each represents a script file. You should additionally note that all the script files that ASP.NET needed for AJAX functionality, and to custom script files are referenced.

QUESTION: 5

You work for a Web solution development company named ABC.com. ABC.com recently developed a Web application which has access to the Microsoft SQL Server database via DataSet control using .NET Framework 3.5 and ADO.NET. You need to implement a solution for retrieving the rows updated or refreshed when

employees add information to the DataSet. Which administrative action should be taken?

- A. You should consider utilization of methods in the DataBinder class.
- B. You should consider utilization of the Fill method of the DataAdapter class.
- C. You should consider utilization of Data binding syntax.
- D. You should consider utilization of TemplateControl class.

Answer: B

Explanation:

The utilization of the Fill method ensures that the DataAdapter class would return the number of rows that are successfully added or refreshed in the DataSet.

QUESTION: 6

You need to identify the data operation sequence process utilized when Web applications utilize ASP.NET with LinqDataSource objects. Which sequence of data operations would be utilized by LinqDataSources?

- A. The LinqDataSource would utilize: Order By
Group By Select
- B. The LinqDataSource would utilize: Where
Order By Group By Order Groups By Select Auto-sort Auto-page
- C. The LinqDataSource would utilize: Order By
Group By Auto-page Auto-sort
- D. The LinqDataSource would utilize: Order By
Order Groups By Select

Answer: B

Explanation:

The LinqDataSource class when utilized allows the utilization of LINQ in ASP.NET Web pages. The LinqDataSource when utilized allows for utilization of markup text to fetch and modify the data from a data object by automatically generating the data commands in the data operation selected.

QUESTION: 7

Which of the following statements regarding the utilization of Document Type Definition (DTD) are TRUE?

- A. Document Type Definition (DTD) is utilized for determining the class object.
- B. Document Type Definition (DTD) is utilized to extract objects from different data collections.
- C. Document Type Definition (DTD) is utilized as non-CML syntax for utilizing XML elements.
- D. Document Type Definition (DTD) is the document structure utilized to define a list of legal elements and attributes.

Answer: D

Explanation:

You should note that Document Type Definition (DTD) is utilized to define the legal building blocks of an XML document whilst also defining the structure of the document with a list of legal elements and attributes.

QUESTION: 8

You work for a Web solution development company named ABC.com. You need to identify the service properties utilized when application endpoints are configured using a WCF service. Which of the WCF service properties would be utilized by the application?

- A. The Marshalling, Binding and Contract Properties would be utilized.
- B. The Address, Binding and Contract Properties would be utilized
- C. The Address, Binding and Entry Point Properties would be utilized
- D. The COM Interface, Binding and Address Properties would be utilized

Answer: B

Explanation:

An endpoint of a service enables a user to communicate with a WCF service. It provides clients access to the functionality offered by a WCF service. One or more endpoints can be defined for a service by using a combination of relative and absolute endpoint addresses. You should note that an endpoint is made up of an Address indicating the location of the specified endpoint, Binding to indicate which client communication method is utilized, Contract identifying the availability of operations and the Behavior which specifies the local implementation details of an endpoint.

QUESTION: 9

You work for a Web solution development company named ABC.com. You need to identify the usable elements in a config file required for testing Web applications. Which of the elements listed may be used to assist the testing?

- A. You should consider utilization of a trace element.
- B. You should consider utilization of an audit element.
- C. You should consider utilization of an IFrame element.
- D. You should consider utilization of a Selector element.

Answer: A

Explanation:

The utilization of the trace element allows ADO application developers to configure ASP.NET code tracing service which is utilized to control how queried results are assembled, stored, and displayed.

QUESTION: 10

You work for a Web solution development company named ABC.com. You need to identify the usable modes of an application pool. Which of the modes should you identify? (Choose two)

- A. Application Pools provides SQL Server mode.
- B. Application Pools provides Classic mode.
- C. Application Pools provides SQL Server mode.
- D. Application Pools provides State Server mode. E. Application Pools provides Integrated mode.

Answer: B, E

Explanation:

You should note that Integrated Mode is utilized by developer to integrate request- processing architecture of IIS and ASP.NET and the utilization of Classic Mode allows the server to continue routing requests for managed code through Aspnet_isapi.dll, processing requests as the application is utilizing IIS.

QUESTION: 11

Which of the following statements regarding the utilization of client-side scripting are TRUE?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
