- A. HighRoad
- B. OnCourse
- C. NanoCopy
- D. Replistor

**Answer: B**

**Explanation:**

Software that enables secure, reliable, automated distribution of CIFS or NFS files between heterogeneous systems across IP networks Data can be moved and replicated between two or

more systems, aggregated from many systems to a central node, or distributed to many nodes from a central system.

**Question: 5 DRAG DROP**

Drag and drop

**As a network technician at Company.com you have been asked to drag the word to the correct position in the sentence. (Words may be used more than once.)**

Workflow is a collection of  with well-known  that can be triggered by  and other  which are executed by  performing

**Answer:**

**As a network technician at Company.com you have been asked to drag the word to the correct position in the sentence. (Words may be used more than once.)**

Workflow is a collection of  with well-known  that can be triggered by  and other  which are executed by  performing

**Question: 6**

What are the best metrics to use for storage performance reporting in the Hosts/Application tier?

- A. CPU busy and I/O queues.
- B. CPU busy and Paging rates.
- C. I/O queues and I/O blocksize.
- D. I/O queues and I/O response time.

**Answer: B**

**Not D:** D. is storage metrics

**Question: 7**

In which state is it best to leave a configuration when implementation of a complex change fails?

- A. The state of the last clone backup.
- B. The state is defined in the back-out plan.
- C. The state in which the change failure was discovered.
- D. The state that is as near as possible to completion of the change.

**Answer: B**

**Question: 8**

A client uses SAN Copy from their production system (PRD) to both Quality Assurance and Test

(QAT) and Development (DEV) instances. QAT and DEV instances reside on CLARiiON ATA while PRD resides on DMX. The PRD instance is 27 TB and is backed up from BCVs. Backups from SnapView support both QAT and DEV instances. The QAT instance is refreshed monthly but the DEV instance is refreshed quarterly because it is a time consuming process. What is the primary risk to the QAT instance during upgrade tests?

- A. Insufficient SNAP region.
- B. Insufficient BCV capacity.
- C. PRD configuration change.
- D. Inconsistent upgrade time calculation.

**Answer: C**
