E20-610

EMC

CLARiiON and UNIX Advanced

<http://www.ipass4sure.com/exams.asp?examcode=E20-610>

The E20-610 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The E20-610 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The E20-610 exam is very challenging, but with our E20-610 questions and answers practice exam, you can feel confident in obtaining your success on the E20-610 exam on your FIRST TRY!

EMC E20-610 Exam Features

- Detailed questions and answers for E20-610 exam
- Try a demo before buying any EMC exam
- E20-610 questions and answers, updated regularly
- Verified E20-610 answers by Experts and bear almost 100% accuracy
- E20-610 tested and verified before publishing
- E20-610 examcollection vce questions with exhibits
- E20-610 same questions as real exam with multiple choice options

Acquiring EMC certifications are becoming a huge task in the field of I.T. More over these exams like E20-610 exam are now continuously updating and accepting this challenge is itself a task. This E20-610 test is an important part of EMC certifications. We have the resources to prepare you for this. The E20-610 exam is essential and core part of EMC certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real E20-610 Test and save time and money while developing your skills to pass your EMC E20-610 Exam? Let us help you climb that ladder of success and pass your E20-610 now!

E20-610

QUESTION 1

What are the steps to add a disk to a Sun Solaris host online (no reboot of the host)?

- A. Drvconfig, disks
- B. Drvconfig, format, label
- C. Drvconfig, disks, devlinks
- D. Vi sd.conf, touch /reconfigure, init 6

Answer: C

Explanation:

{From a SUN OS man page:} devlinks creates symbolic links from the /dev directory tree to the actual block and

character-special device nodes under the /devices directory tree. The links are created according to specifications found in the table-file (by default etc/devlink.tab). devlinks is called each time the system is reconfiguration- booted, and can only be run after drvconfig(1M) is run, since drvconfig(1M) builds the kernel data structures and the /devices tree.

QUESTION 2

Which three [3] characteristics do Veritas Volume manager, ALX LVM, HPUX LVM, and Solstice Disk Suite have in common?

- A. Striping at the host level
- B. Provides data protection
- C. Places a unique label on each disk
- D. Groups disks together in volume groups
- E. Creates large volumes out of smaller disks

Answer: A, B, E

Explanation:

Volume Managers

Volume managers allow system administrators to perform operations on their physical devices at the operation-system level. Volume managers are typically used to provide flexibility that is not inherent in the file system or the storage system.

The operations commonly supported by volume managers fall into several categories:

1. Partitioning of LUNs into smaller logical devices
2. Aggregation of several LUNs into a larger logical device in order to provide a larger logical device
3. Striping of data across several LUNs in order to distribute I/O across many disks

A volume striped across LUNs where the LUNs themselves are striped across disks is also known as a plaid.

QUESTION 3

Which component verifies that proper cabling has been done to the Katana?

- A. SPS

E20-610

- B. Services Processor
- C. LCC Loop ID LEDs
- D. Fibre Channel Director

Answer: C

Explanation:

Katana refers to the Disk Array Enclosure (DAE2), which is a CLARiiON part. DAE2s connect to DPEs, SPEs or each other via LCCs (Link Control Cards). Thus the LCC Loop ID LEDs will indicate whether other not the enclosures are properly cabled together.

SPS= Standby Power Supply

Fibre Channel Director is a Symmetrix component

QUESTION 4

Exhibit: *** MISSING ***

What does the "Alignment Offset" function align?

- A. Lun on the raidgroup
- B. Partition on the stripe boundary of a lun
- C. Partition on the stripe size on the raidgroup
- D. Partition on the metalun stripe element size

Answer: B

Explanation:

This (or alternately diskpar on Windows OSs) aligns the partition on the stripe boundary of a lun to prevent disk crossing. The typical stripe element size (128 blocks=64KB) is smaller than most I/O, so a crossing is more likely from a misaligned file system than a large I/O. This can have a significant impact upon disk performance. Percent of data crossing = (I/O size)/(Stripe Element Size). A host-based utility (such as diskpar for Windows or fdisk for Linux) is preferred whenever there is array-based replication software in use such as SnapView, Replication Manager, etc.

QUESTION 5

What is a valid frontend SP ALPA address on CLARiiON FCC4700 series?

- A. 0 - 124
- B. 0 - 128
- C. 0 - 224
- D. 0 - 255

Answer: A

Explanation:

ALPA = Arbitrated Loop Private Address. Some addresses are reserved for the backend connections, thus the full 0-128 are not available for the front end.

E20-610

QUESTION 6

Which 2 mirror drives are the boot disks for SPB on a CLARiiON CX600?

- A. 0_0_0
- B. 0_0_1
- C. 0_0_2
- D. 0_0_3

Answer: B.D

Explanation:

SP Boot Partitions - 2826.2 MB drives 0,1,2, & 3 - Each SP will have a mirrored SP boot partition. SPA will use drive 0 & 2 (0 is the primary with 2 as the mirror) and SPB will use drives 1 & 3 (1-primary, 3-mirror).

QUESTION 7

Which user account is needed to install drivers on UNIX servers?

- A. sys
- B. root
- C. oracle
- D. Administrator

Answer: B

Explanation:

Oracle and Administrator are not default user accounts on UNIX. Root is the master, all-powerful account in UNIX.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
