E20-850

EMC
CLARiiON Implementation Engineer Expert

The E20-850 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The E20-850 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The E20-850 exam is very challenging, but with our E20-850 questions and answers practice exam, you can feel confident in obtaining your success on the E20-850 exam on your FIRST TRY!

EMC E20-850 Exam Features

- Detailed questions and answers for E20-850 exam
- Try a demo before buying any EMC exam
- E20-850 questions and answers, updated regularly
- Verified E20-850 answers by Experts and bear almost 100% accuracy
- E20-850 tested and verified before publishing
- E20-850 examcollection vce questions with exhibits
- E20-850 same questions as real exam with multiple choice options

Acquiring EMC certifications are becoming a huge task in the field of I.T. More over these exams like E20-850 exam are now continuously updating and accepting this challenge is itself a task. This E20-850 test is an important part of EMC certifications. We have the resources to prepare you for this. The E20-850 exam is essential and core part of EMC certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real E20-850 Test and save time and money while developing your skills to pass your EMC E20-850 Exam? Let us help you climb that ladder of success and pass your E20-850 now!

Question: 1
Company.com needs a remote replication Exchange Solution. Currently the company is supporting 800 users and are expected to grow to 1600 users by next year. Four Storage Groups will be used to manage the user mailboxes. RPO is 20 minutes and the sites are five miles apart connected by two T1 connections. Which solution would best fit its requirement?

A. Create a MirrorView/A solution using Consistency Groups. Set the update interval to 10 minutes
B. Create a MirrorView/S solution dividing their LUNs between SPA and SPB using Consistency Groups
C. Create a MirrorView/S solution placing all LUNs for an Exchange Storage Group on either SPA or SPB
D. Create an Incremental SAN Copy solution dividing their LUNs between SPA and SPB, starting copies at 20 minute intervals

Answer: A

Question: 2
MMC routinely uses MirrorView replication between two data centers. The company currently uses the Write Intent Log feature on both arrays. Recently, when the primary data center suffered a major outage, production workload was transferred to the remote data center. When MMC failed back the production workload to the production data center, the company experienced full re-synchronizations of all its MirrorView LUNs. Why did this situation occur?

A. The Write Intent Log information is nonrelevant after the MirrorView secondary images have been promoted to primary images
B. The Write Intent Log information is stored on the SP cache and it was lost during the major outage of the production data center
C. The Write Intent Log information was never transferred from the production data center to the remote data center after the major outage
D. The Write Intent Log information was lost on the production data center during the outage and a full re-synchronization of all the LUNs was required

Answer: A

Question: 3
What is required to use the CLARiiON ktrace utility?

A. EMCRemote
B. Navisphere CLI
C. Navisphere Analyzer
D. Navisphere Manager

Answer: A

Question: 4
NLP Farm, Inc wishes to use SAN Copy to transfer data between CLARiiONs at two sites. When NLP tries to choose the destination LUN from Navisphere Manager, no LUNs appear in the list. When NLP uses the CLI, the company can create and start a SAN Copy Session, but it always fails just prior to completion. What do you check first?

A. Verify that the target LUN is not a metaLUN
B. Verify that Source and Target LUN IDs match
C. Verify that the LUNs are of the same RAID type
D. Check the LUN size, in blocks, of the Source and Target LUNs

Answer: D

Question: 5
A customer is running a high utilization Microsoft File Server connected to a SAN with Dual HBAs. This server needs to be backed up to a SAN attached tape library. The customer is running the required software to do the SAN backups. However, the customer is concerned about performance while backing up the data. Which two [2] immediate solutions can be proposed?

A. Backup the data over the LAN
B. Perform a Disk based backup
C. Use Clones as the backup source
D. Use direct attached tape based backup
E. Add a third HBA and zone it with the SAN tape library

Answer: C, E

Question: 6
SP Cache High and Low Watermarks usually differ by what percentage?

A. 10 %
B. 20 %
C. 30 %
D. 40 %

Answer: B

Question: 7
SIME fails to replicate the DBs on the production host. Which steps allow the job to complete?

A. Clear any -1018,1019, and -1022 errors in production host system log and restart the job
B. Clear any -1018,1019, and -1022 errors in the production host application log and restart the job
C. Clear any -1018,1019, and -1022 errors in the backup/recovery host system log and restart the job
D. Clear any -1018,1019, and -1022 errors in the backup/recovery host application log and restart the job

Answer: B

Question: 8
FDD Coffee Company has an environment consisting exclusively of RAID 5 LUNs. FDD is interested in a local backup solution. The replica used for backup should be available to recover the Source LUN in the event of corruption. The company also wishes to use local replicas for testing. Testing had a read/write ratio of 95/5. Three replicas of each Source LUN will be made and presented to three test hosts. The testing should have as little impact as possible on the production environment. The company also wishes to minimize the space requirements for the new solution. What is the best solution?

A. Use a Clone of each Source LUN for backup. Use 3 Snapshots of each Clone for testing
B. Use 3 Clones of each Source LUN for testing, and a Snapshot of each Source LUN for backups
C. Use 3 Clones of each Source LUN for testing, and an additional Clone of each Source LUN for backups
D. Use 3 Snapshots of each Source LUN for testing, and an additional Snapshot of each Source

LUN for backups

Answer: A

Question: 9
XYZ Corporation has been using a CLARiiON to support the data requirements on its Windows 2000 File and Print Cluster. XYZ has just decided that it would create a more flexible environment if the servers booted from SAN. What will XYZ need to do to create a supported boot-from-SAN Windows 2000 Cluster environment?

A. Expand the existing LUNs and use the additional space to mirror the System and Boot
    Partitions
B. Create boot LUNs, add them to the existing Storage Group and mirror the System and Boot
    Partitions to the new LUNs
C. Add two new HBAs, add them to the existing Storage Group, create boot LUNs, add them to
    the existing Storage Group and mirror the System and Boot Partitions to the new LUNs
D. Add two new HBAs, manually register them, add them to a new Storage Group, create boot
    LUNs, add them to the new Storage Group and mirror the System and Boot Partitions to the
    new LUNs

Answer: D

Question: 10
Consider the following configuration:

LUN 10 has a default owner of SPB.
LUN 10 is in Raid Group 3.
LUN 10 is in Host-A's storage group.
SPB displays Faulted in Navisphere.
There is a faulted drive in Raid Group 3.
Why is LUN 10 displayed under nowned LUNs?in Navisphere?

A. Host-A has no failover software
B. A Hot Spare is active for Raid Group 3
C. A Hot Spare is not active for Raid Group 3
D. LUN 10 is configured for Auto Assignment

Answer: A

Question: 11
Which statement describes a SIME 2003 limitation?

A. Supports Navisphere revision 6.6
B. Supports Flare Release 12 and 13
C. Supports Microsoft Windows 2003 Server Enterprise Edition
D. The SIME backup/recovery server must not be a domain controller

Answer: D

Question: 12
HH Inc. bought a CLARiiON CX series array and an HP-UX server. It will be used for selling music albums online. The system is set up with PVlinks and now performance is below acceptable levels. After consulting the system logs on both CLARiiON and the HP-UX system, you notice that the LUNs are trespassing frequently. Which corrective action should you take?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
