E22-106

EMC

EMC Legato Certified Availability Administrator (LCAA)

<http://www.ipass4sure.com/exams.asp?examcode=E22-106>

The E22-106 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The E22-106 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The E22-106 exam is very challenging, but with our E22-106 questions and answers practice exam, you can feel confident in obtaining your success on the E22-106 exam on your FIRST TRY!

EMC E22-106 Exam Features

- Detailed questions and answers for E22-106 exam
- Try a demo before buying any EMC exam
- E22-106 questions and answers, updated regularly
- Verified E22-106 answers by Experts and bear almost 100% accuracy
- E22-106 tested and verified before publishing
- E22-106 examcollection vce questions with exhibits
- E22-106 same questions as real exam with multiple choice options

Acquiring EMC certifications are becoming a huge task in the field of I.T. More over these exams like E22-106 exam are now continuously updating and accepting this challenge is itself a task. This E22-106 test is an important part of EMC certifications. We have the resources to prepare you for this. The E22-106 exam is essential and core part of EMC certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real E22-106 Test and save time and money while developing your skills to pass your EMC E22-106 Exam? Let us help you climb that ladder of success and pass your E22-106 now!

Question: 1

Which is a valid IP address for private non-routed network use?

- A - 37.16.256.4
- B - 117.24.103.40
- C - 127.0.0.1
- D - 192.168.7.69

Answer: D

Question: 2

A company has a mission-critical application that needs to be protected by AAM. It is also necessary for a scheduled task, or cron job to be run on the node running the application. A rule is created to discover which node is hosting the application and then to launch the cron job on that node. Which type of trigger is associated with this rule?

- A - Scheduled trigger
- B - Time-based trigger
- C - On-demand trigger
- D - Sensor-based trigger

Answer: A

Question: 3

Why would AAM report a failed state for a process when the user still sees the application running?

- A - The existence test is not written properly.
- B - The existence test is reporting a value of true.
- C - The response test is not checking for multiple processes.
- D - The response test is returning a process state of No Response.

Answer: A

Question: 4

What happens to a Resource Group, using the default settings, when a managed process goes into a failed state?

- A - Three attempts are made to restart the managed process.
- B - The Resource Group is immediately relocated to another node.
- C - The existence test is performed to see if the process has actually failed.
- D - The isolation script is run to determine if the Resource Group is isolated.

Answer: A

Question: 5

You have a Resource Group defined for a two-node Domain on nodes A and B. You want to demonstrate a failover. The Resource Group is online on node A. All of the network cables are disconnected on node A to initiate a failover. The Resource Group remains online on node A. Node B takes over the Resource Group. Which condition caused this to happen?

- A - No Isolation Detection addresses were configured on node A.
- B - The verification line was configured improperly so the node did not transition to the failed state.

- C - The Resource Group algorithm prevents relocation when heartbeats are not received from any other nodes.
- D - The Resource Group's objects transitioned to the unknown state so it could not be started on the other node.
- E - One of the objects in the Resource Group was a shared disk data source and the SCSI reset could not be sent over the network.

Answer: A

Question: 6

Your process or service is stuck in the stopping state. Which two statements describe potential sources of the problem? (Choose two.)

- A - The response test is not written correctly.
- B - The existence test is not working correctly.
- C - The testing interval for monitoring is too low.
- D - The testing interval for monitoring is too high.
- E - There is something wrong with the stop command.

Answer: B, E

Question: 7

By default, AAM port values are 8042 to 8045. Which command should you use to verify if these ports are available?

- A - nbtstat-a
- B - netstat-a
- C - purtstat-a
- D - nslookup -a

Answer: B

Question: 8

An AAM domain uses two domain lines. What happens if you change the IP address scheme of domain line A?

- A - AAM continues to use domain line B as a single domain line.
- B - AAM can no longer use either line as a domain line and registers an error.
- C - AAM immediately recognizes the change and automatically reassigns the first line as domain line A.
- D - AAM immediately detects the change and deletes and recreates all new domain lines using the two new IP addresses for communication.

Answer: A

Question: 9

Which two statements about domain networks are true? (Choose two.)

- A - If a domain network fails, heartbeating continues over the verification network.
- B - Heartbeat communication within the domain takes place over the domain network.
- C - Network interfaces used for domain heartbeat communication should be managed by AAM.
- D - The domain network can be used for communication with and between managed processes.

Answer: B, D

Question: 10

Node alias names must _____ (Choose two.)

- A - B unique
- B - B listed in DNS
- C - B fewer than 16 characters
- D - Disable NetBIOS over TCP/IP
- E - B assigned to a Resource Group

Answer: A, C

Question: 11

A managed IP address can be assigned on NodeA, but not NodeB. What are three potential reasons for this conditions?

- A - NodeA has not unassigned or properly released the managed IP address
- B - NodeB does not have a Network Interface Card (NIC) on the designed subnet
- C - The target Network Interface Card (NIC) on NodeB is not configured or plumbed
- D - NodeB does not have a usable Network Interface Card (NIC) in the designated NIC group
- E - All of NodeB's usable Network Interface Cards (NICs) are already hosting a managed IP address so no available NICs exist

Answer: A, B, D

Question: 12

Which statement describes the functionality of an AAM Sensor?

- A - A Sensor returns the value of the data point to a trigger.
- B - A Sensor fires an associated rule when the value of the data point changes.
- C - A Sensor fires an associated trigger when the value of the data point changes.
- D - A Sensor senses changes in the value of a data point and submits those changes to its associated rule.

Answer: A

Question: 13

A three-node domain is configured with each of the nodes connected to two networks. A network cable attached to node A's Network Interface Card (NIC) is accidentally detached. Later that evening, the maintenance crew unplugs power to the hub on node A's remaining working network. Which statement is true?

- A - The node is considered isolated.
- B - Nodes B and C will report node A as shut down.
- C - The resources running on node A are taken offline.
- D - When the network connection is re-established, node A will determine that its Resource Group objects have changed to a failed state.

Answer: A

Question: 14

How does AAM check the configured network path test IP addresses?

- A - Serially
- B - Randomly
- C - Numerically

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
