**QUESTION: 1**

Firewalking is a technique that can be used to gather information about a remote network protected by a firewall. This technique can be used effectively to perform information gathering attacks. In this technique, an attacker sends a crafted packet with a TTL value that is set to expire one hop past the firewall. Which of the following are pre-requisites for an attacker to conduct firewalking? Each correct answer represents a complete solution. Choose all that apply.

- A. ICMP packets leaving the network should be allowed.
- B. An attacker should know the IP address of the last known gateway before the firewall.
- C. There should be a backdoor installed on the network.
- D. An attacker should know the IP address of a host located behind the firewall.

**Answer:** A, B, D

**QUESTION: 2**

Which of the following security protocols are based on the 802.11i standard? Each correct answer represents a complete solution. Choose all that apply.

- A. WEP
- B. WPA2
- C. WPA
- D. WEP2

**Answer:** B, C

**QUESTION: 3**

Which of the following OSI layers is responsible for protocol conversion, data encryption/decryption, and data compression?

- A. Transport layer
- B. Presentation layer
- C. Data-link layer
- D. Network layer

**Answer:** B

**QUESTION: 4**

You are responsible for security at a company that uses a lot of Web applications. You are most concerned about flaws in those applications allowing some attacker to get into your network. What method would be best for finding such flaws?

- A. Vulnerability scanning
- B. Manual penetration testing
- C. Automated penetration testing
- D. Code review

**Answer:** A

**QUESTION: 5**
