GSSP-Java

GIAC

Secure Software Programmer – Java

<http://www.ipass4sure.com/exams.asp?examcode=GSSP-Java>

The GSSP-Java practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The GSSP-Java Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The GSSP-Java exam is very challenging, but with our GSSP-Java questions and answers practice exam, you can feel confident in obtaining your success on the GSSP-Java exam on your FIRST TRY!

GIAC GSSP-Java Exam Features

- Detailed questions and answers for GSSP-Java exam
- Try a demo before buying any GIAC exam
- GSSP-Java questions and answers, updated regularly
- Verified GSSP-Java answers by Experts and bear almost 100% accuracy
- GSSP-Java tested and verified before publishing
- GSSP-Java examcollection vce questions with exhibits
- GSSP-Java same questions as real exam with multiple choice options

Acquiring GIAC certifications are becoming a huge task in the field of I.T. More over these exams like GSSP-Java exam are now continuously updating and accepting this challenge is itself a task. This GSSP-Java test is an important part of GIAC certifications. We have the resources to prepare you for this. The GSSP-Java exam is essential and core part of GIAC certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real GSSP-Java Test and save time and money while developing your skills to pass your GIAC GSSP-Java Exam? Let us help you climb that ladder of success and pass your GSSP-Java now!

Exam Name:	GIAC Secure Software Programmer – Java		
Exam Type:	GIAC	Exam Code:	GSSP-Java
Certification:	GIAC Information Security	Total Questions:	275

Question: 1

Which of the following elements are the sub elements of the mime-mapping element in a deployment descriptor file? Each correct answer represents a complete solution. Choose all that apply.

- A. exception-type
- B. error-code
- C. extension
- D. mime-type
- E. servlet-class

Answer: C,D

Question: 2

John works as a Software Developer for VenTech Inc. He writes the following code using Java.

```
public class vClass extends Thread {
    public static void main(String args[]) {
        vClass vc=new vClass();
        vc.run();
    }
    public void start() {
        for(int k=0;k<20;k++) {
            System.out.println("The value of k = "+k);
        }
    }
}
```

What will happen when he attempts to compile and execute the application?

- A. The application will compile successfully and the values from 0 to 19 will be displayed as the output.
- B. A compile-time error will occur indicating that no run() method is defined for the Thread class.
- C. A runtime error will occur indicating that no run() method is defined for the Thread class.
- D. The application will compile successfully but will not display anything as the output.

Answer: D

Question: 3

Which of the following classes is an engine class that provides an opaque representation of cryptographic parameters?

- A. DSAPublicKeySpec
- B. AlgorithmParameterGenerator
- C. DSAPrivateKeySpec
- D. AlgorithmParameters

Answer: D

Question: 4

Which of the following statements about programmatic security are true? Each correct answer represents a complete solution. Choose all that apply.

- A. The bean provider is responsible for writing code for programmatic security.
- B. It is also called as instance level security.
- C. It is implemented using methods of the EJBContext interface.
- D. It is implemented using the methods of the UserTransaction interface.

Answer: A,B,C

Question: 5

Which of the following functions are performed by methods of the HttpSessionActivationListener interface? Each correct answer represents a complete solution. Choose all that apply.

- A. Notifying the object when it is bound to a session.

Exam Name:	GIAC Secure Software Programmer – Java		
Exam Type:	GIAC	Exam Code:	GSSP-Java
Certification:	GIAC Information Security	Total Questions:	275

- B. Notifying an attribute that a session has just migrated from one JVM to another.
- C. Notifying the object when it is unbound from a session.
- D. Notifying an attribute that a session is about to migrate from one JVM to another.

Answer: B,D

Question: 6

Mark works as a Programmer for InfoTech Inc. He develops the following deployment descriptor code. <web-app . . . > <display-name>A Secure Application</display-name><servlet> ... <security-role-ref > <role-name>Manager</role-name> <role-link>Admin</role-link> </security-role-ref> </servlet> <security-role> <role-name>Programmer</role-name> </security-role> <security-role> <role-name>Admin</role-name> </security-role> <security-role> <role-name>Employee</role-name> </security-role> </web-app>

Which of the following is a valid isUserRole() method call that can be made if request is the HttpServletRequest request?

- A. request.isUserRole("Programmer");
- B. request.isUserRole("Manager");
- C. request.isUserRole("Admin");
- D. request.isUserRole("Employee");

Answer: B

Question: 7

Which of the following methods of the EJBContext interface can be called by both the BMT and CMT beans? Each correct answer represents a complete solution. Choose all that apply.

- A. getCallerPrincipal()
- B. getRollbackOnly()
- C. getUserTransaction()
- D. isCallerInRole()

Answer: A,D

Question: 8

Mark works as a Programmer for InfoTech Inc. He develops a deployment descriptor code that contains three valid <security-constraint> elements. All of them constraining a Web resource Res1, the <auth-constraint> sub-element of the <security-constraint> elements are as follows. <auth-constraint>Admin</auth-constraint> <auth-constraint>Manager</auth-constraint> <auth-constraint/> Which of the following can access the resource Res1?

- A. Only Manager can access the resource.
- B. No one can access the resource.
- C. Everyone can access the resource.
- D. Only Admin can access the resource.

Answer: B

Question: 9

Which of the following statements correctly describe the features of the singleton pattern? Each correct answer represents a complete solution. Choose all that apply.

- A. Singletons are used to control object creation by limiting the number to one but allowing the flexibility to create more objects if the situation changes.

Exam Name:	GIAC Secure Software Programmer – Java		
Exam Type:	GIAC	Exam Code:	GSSP-Java
Certification:	GIAC Information Security	Total Questions:	275

- B. Singletons can only be stateless, providing utility functions that need no more information than their parameters.
- C. A singleton class may disappear if no object holds a reference to the Singleton object, and it will be reloaded later when the singleton is needed again.
- D. The behavior of a singleton can be obtained by static fields and methods such as `java.lang.Math.sin(double)`.

Answer: A,C,D

Question: 10

Which of the following deployment descriptor elements must contain the `<transport-guarantee>` element as its mandatory sub-element?

- A. `<user-data-constraint>`
- B. `<web-resource-collection>`
- C. `<auth-constraint>`
- D. `<login-config>`

Answer: A

Question: 11

Given a code of a class named `PrintString` that prints a string.

1. `public class PrintString{`
2. `public static void main(String args[]){`
3. `/*insert code here */`
4. `/* insert code here */`
5. `System.out.println(str);`
6. `}`
7. `}`

Which of the following code fragments can be inserted in the class `PrintString` to print the output "4247"? Each correct answer represents a complete solution. Choose all that apply.

- A. `StringBuilder str= new StringBuilder("123456789"); str.delete(0,3).replace(1,3,"24").delete(4,6);`
- B. `StringBuffer str= new StringBuffer("123456789"); str.delete(0,3).replace(1,3,"24").delete(4,6);`
- C. `StringBuffer str=new StringBuffer("123456789"); str.substring(3,6).delete(1,2).insert(1,"24");`
- D. `StringBuilder str= new StringBuilder("123456789"); str.deleteCharAt(6).replace(1,3,"24").delete(0,3);`
- E. `String str="123456789"; str=(str-"123").replace(1,3,"24")-"89";`

Answer: A,B

Question: 12

Mark writes a class `Practice.java`. This class needs to access the `com.bar.Test` class that is stored in the `Test.jar` file in the directory `/practice`. How would you compile your code?

- A. `javac -classpath /practice/Test.jar Practice.java`
- B. `javac -classpath /practice/ Practice.java`
- C. `javac -classpath /practice/Test.jar/com/bar Practice.java`
- D. `javac -classpath /practice Practice.java`

Answer: A

Question: 13

Which of the following statements is true?

Exam Name:	GIAC Secure Software Programmer – Java		
Exam Type:	GIAC	Exam Code:	GSSP-Java
Certification:	GIAC Information Security	Total Questions:	275

- A. All UTF characters are eight bits long.
- B. All UTF characters are all sixteen bits long.
- C. All UTF characters are twenty four bits long.
- D. All bytecode characters are sixteen bits long.
- E. All unicode characters are sixteen bits long.

Answer: E

Question: 14

John works as a Programmer for Technostar Inc. He writes the following code using Java.

```

1. class WrapperClass{
2. public static void main(String[] argv){
3. String str2 = Double.toString(12);
4. String str1 = Double.toHexString(12);
5. System.out.println(str1+str2);
6. }
7. }

```

What will happen when John attempts to compile and execute the code?

- A. It will not compile because the Double class does not contain the toHexString() method.
- B. It will compile and execute successfully and will display 8p312 as the output.
- C. It will compile and execute successfully and will display 0x1.8p312.0 as the output.
- D. It will not compile because the Double class does not contain the toString() method.

Answer: C

Question: 15

Mark works as a Programmer for InfoTech Inc. He develops a Website that uses HTML and processes HTML validation. Which of the following are the advantages of the HTML application? Each correct answer represents a complete solution. Choose all that apply.

- A. It provides password protection for a Web page or directory
- B. It can be accessed by more visitors.
- C. It provides faster loading.
- D. It is easier to update and maintain the site.
- E. It protects the source or images of a HTML Web page.
- F. It puts less load on the server.

Answer: B,C,D,F

Question: 16

You have written the following code snippet.

```

1. public class Read {
2. protected int ReadText(int x) { return 0; }
3. }
4. class Text extends Read {
5. /*insert code here*/
6. }

```

Which of the following methods, inserted independently at line 5, will compile? Each correct answer represents a complete solution. Choose all that apply.

- A. private int ReadText(long x) { return 0; }
- B. protected long ReadText(int x, int y) { return 0; }

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
