HH0-260

Hitachi

Hitachi Data Systems Certified Implementer-Hitachi Content Platform

http://www.ipass4sure.com/exams.asp?examcode=HH0-260

The HH0-260 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HH0-260 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently.
The HH0-260 exam is very challenging, but with our HH0-260 questions and answers practice exam, you can feel confident in obtaining your success on the HH0-260 exam on your FIRST TRY!

Hitachi HH0-260 Exam Features

- Detailed questions and answers for HH0-260 exam
- Try a demo before buying any Hitachi exam
- HH0-260 questions and answers, updated regularly
- Verified HH0-260 answers by Experts and bear almost 100% accuracy
- HH0-260 tested and verified before publishing
- HH0-260 examcollection vce questions with exhibits
- HH0-260 same questions as real exam with multiple choice options

Acquiring Hitachi certifications are becoming a huge task in the field of I.T. More over these exams like HH0-260 exam are now continuously updating and accepting this challenge is itself a task. This HH0-260 test is an important part of Hitachi certifications. We have the resources to prepare you for this. The HH0-260 exam is essential and core part of Hitachi certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real HH0-260 Test and save time and money while developing your skills to pass your Hitachi HH0-260 Exam? Let us help you climb that ladder of success and pass your HH0-260 now!

QUESTION: 1
A customer has an existing HCP 500 consisting of four storages nodes. They have just purchased an additional HCP 500 and you are informed that you will be performing the replication setup. What is the requirement prior to setting up replication?

A. trusted replication server certificates
B. replication link
C. outbound link name
D. inbound link name

Answer: A

QUESTION: 2
You are adding two more volumes into each node of a HCP 500 DL. The storage administrator informs you that all SAN volumes have been created, zoned and presented to the HCP. Which LUN number presented to the HCP will cause a problem?

A. 5
B. 128
C. 130
D. 131

Answer: B

QUESTION: 3
Which three statements are true about encryption on a HCP? (Choose three.)

A. Once enabled, encryption cannot be disabled.
B. The encryption key is accessible through the system management console.
C. Encryption can only be enabled at the time of installation.
D. The encryption key must be written down and given to the customer.
E. The encryption key is displayed several times during the installation process.

Answer: A, C, D

QUESTION: 4

You have performed an upgrade on a customer's HCP. You complete the upgrade and verify that all the nodes are online and then give the system back to the customer. A few minutes later, the customer complains that they can read existing content but they cannot create new content on the HCP. Which step was missed?

A. The install user password was changed.
B. The upgrade was not committed.
C. The rollback was not performed.
D. The system management console is disabled.

Answer: B

QUESTION: 5
How should the RAID group(s) and logical volume(s) be configured on a HCP 300 node?

A. three RAID groups each with three logical volumes
B. three RAID groups each with a single logical volume
C. a single RAID group with a single logical volume
D. a single RAID group with three logical volumes

Answer: D

QUESTION: 6
What is the required zone configuration of a SAN fabric to support a HCP 500?

A. one global zone containing all HCP nodes World Wide Port Names (WWPN) of the HBA ports and the storage ports
B. one zone per HCP node containing two members: World Wide Port Names (WWPN) of the HBA port and the storage port
C. two mirrored zones; one containing the even numbered World Wide Port Names (WWPN) of the HBA port and the storage port; the other containing odd numbered ports
D. two zones: one zone containing all HCP nodes World Wide Port Names (WWPN) of the HBA ports and the second zone containing all the storage ports

Answer: B

QUESTION: 7
A customer expects to store 4 billion objects with an initial HCP configuration. Search is not required at this time. Which configuration will meet the requirements for this customer?

A. HCP 300 with ten storage nodes
B. HCP 500 with two storage nodes
C. HCP 300 with four storage nodes
D. HCP 500 with eight storage nodes

Answer: A

QUESTION: 8
You are establishing a replication link between two HCP platforms. You set the performance level as part of the configuration options. What does this setting indicate?

A. the server priority rate for nodes associated with that replication link
B. the amount of bandwidth made available for replication on the link
C. the number of concurrent replication operations that can occur on each node
D. the data transfer rate associated with each tenant namespace

Answer: C

QUESTION: 9
Which three tenant management console permissions does the security role have on a HCP? (Choose three.)

A. View namespace access protocol configurations.
B. View tenant log messages about security events.
C. View tenant overview.
D. Monitor replication.
E. Modify tenant management console security settings (HCP tenants only).

Answer: B, C, E

QUESTION: 10

A customer wants to ingest around 1 million files residing in several Windows 2003 and RedHat Linux servers into three newly created HCP tenants and namespaces. Which two procedures do you recommend? (Choose two.)

A. Use copy, move and create directory functions available from HCP client tools for Linux.
B. Use copy, move and create directory functions available from Linux server.
C. Use copy, move and create directory functions available from HCP client tools for Windows.
D. Use copy, move and create directory functions available from Windows server.

Answer: A, C

QUESTION: 11
Which two statements are true about the HCP back-end network? (Choose two.)

A. All nodes in a HCP system must be on the same system-specific private back-end IP subnet.
B. All nodes in a HCP system must be split across a dual-redundant private back-end IP subnet.
C. The fourth octet of the back-end IP addresses should not be changed after it has been configured.
D. The fourth octet of the back-end IP addresses must match the fourth octets used in the front- end IP addresses.

Answer: A, C

QUESTION: 12
Which three replication types are supported by HCP? (Choose three.)

A. chain
B. many-to-one
C. one-to-many
D. bidirectional
E. link level

Answer: A, B, D

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- ***Guaranteed Success***.
- **Fast**, helpful support 24x7.
