HP0-438

HP

Advanced SAN Architecture

<http://www.ipass4sure.com/exams.asp?examcode=HP0-438>

The HP0-438 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-438 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP0-438 exam is very challenging, but with our HP0-438 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-438 exam on your FIRST TRY!

HP HP0-438 Exam Features

- Detailed questions and answers for HP0-438 exam
- Try a demo before buying any HP exam
- HP0-438 questions and answers, updated regularly
- Verified HP0-438 answers by Experts and bear almost 100% accuracy
- HP0-438 tested and verified before publishing
- HP0-438 examcollection vce questions with exhibits
- HP0-438 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-438 exam are now continuously updating and accepting this challenge is itself a task. This HP0-438 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-438 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real HP0-438 Test and save time and money while developing your skills to pass your HP HP0-438 Exam? Let us help you climb that ladder of success and pass your HP0-438 now!

QUESTION 1:

Which are two of the most important considerations when deciding to expand a fabric?
Select TWO.

- A. maintain the original fabric topology
- B. maintain the original data access needs
- C. expand the fabric for maximum bandwidth
- D. expand the fabric for maximum connectivity
- E. expand the fabric so that it supports future growth

Answer: B,E

QUESTION 2:

Before merging a fabric in a high-available redundant SAN environment with B-Series switches, you change conflicting zoning configurations and domain IDs. What else must you do in case of a mismatch to avoid fabric segmentation?

- A. Adjust the name table entries for one switch at a time.
- B. Adjust the buffer-to-buffer credits settings in one fabric at a time.
- C. Adjust the Core PID parameter bit settings in one fabric at a time.
- D. Adjust the TCP/IP subnet address settings for one switch at a time.

Answer: C

QUESTION 3:

What is the consequence of merging a zoned fabric with a non-zoned fabric?

- A. The fabrics do not merge. They segment and require manual intervention.
- B. Devices that were in the non-zoned fabric are not accessible until they are added to the currently enabled configuration.
- C. Devices in the fabric are not accessible until the devices in the non-zoned fabric are zoned and made part of the effective configuration.
- D. Any devices that were in the non-zoned fabric are automatically configured into a new zone as part of the effective configuration so they can function.

Answer: B

QUESTION 4:

A SAN administrator has an existing test SAN based on 1 Gbps B-series SAN switches with zoning. To evaluate the compatibility of 1 Gbps and 2 Gbps switches, the

HP0-438

administrator powers on a 1 Gbps and a 2 Gbps SAN switch (factory default settings without zoning). An ISL is then installed between the two switches. The administrator notices that the fabric segments. What are two possible causes of the segmentation? Select TWO.

- A. The zoning information is incompatible.
- B. The core PID parameters are conflicting.
- C. The new switch has a conflicting domain ID.
- D. The two switches are not at the same firmware version.
- E. The speed on the port must first be set for 1 Gbps operation.

Answer: B,C

QUESTION 5:

Which two factors affect the merging of SANs? Select TWO.

- A. IP addresses
- B. SNMP configuration
- C. zone naming standards
- D. switch fabric parameters
- E. switch naming standards

Answer: C,D

QUESTION 6:

A SAN consists of two cascaded switches with no free ports and one ISL. The SAN administrator intends to add a new switch and cascade it off one of the existing switches. What is the recommended procedure?

- A. Shut down the SAN and recable it with the new switch.
- B. Use the ISL to connect the two existing switches to the new switch.
- C. Shut down one of the existing switches and recable with the new switch.
- D. Attach the new switch to the least critical device port and recable the SAN.

Answer: D

QUESTION 7:

What is required to consolidate two fabrics with B-Series switches in a Meta SAN with some common storage? Select TWO.

- A. MP Router
- B. fabric merge
- C. proxy devices

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
